VESUVIUS IS MORE ACTIVE

Fusillades! People Flee Naples. Church's Tower Is Impounded by the Enemy Artillery Troops.

APELPE, April 1-The news that Vesuvius has been more active today is the sensation of the day. The mountain has been known to scientists as the most destructive volcano in the world. The view was at such a great distance that it was believed to be safe for people to go up and see it. The volcano, however, is now more than 3,000 feet high, and it is feared that it may cause destruction to property in the surrounding area.
