"The peoriasis first made its appear-ance in red spots, generally forming a circle, leaving in the center aspot about the size of a silver dollar of sound flesh. In a short time the affected circle would form a heavy dry scale of a white silvery appearance and would gradually drop off. To remove the entire scales by bathing or using oil to soften them the flesh would be perfectly raw, and a light discharge of bloody substance would conse out. That scaly crust would form again in twenty-four hours. It was worse on my arms and limbs, al-though it was in spots all over my body, also on my scalp.
