The Constitutional Democrats intend to halt at no half way settlement of the agrarian question, judging by the pre-liminary draft of the programme elaborated by the executive committe for submission to the caucus of the Constitutional Democratic members-elect, which will convene in St. Petersburg tomorrow. The essence of the programme is the appointment of committees representing each province to determine the size of farms through government expropriation each province to determine the size of farms through government expropriation of lands exceeding the maximum, these to be expropriated even if the owners are cultivating them properly, and, inaddition, to expropriate without exception all lands not cultivated by their owners, whether rented to tenant farmers or farmed on shares by peasants. There is also a recommendation for the expropriation of lands devoted to extensive crops, grazing, etc., if the local committee finds that it can be cultivated to advantage.

DURNOVO'S SCHEME EXPOSED

Loquacious Agent Betrays Plan to Control Peasant Delegates.

ST. PETERSBURG, May 2.—The scheme hatched and put into operation by Durnovo to control peasant members of Parliament as soon as they arrive in St. Petershurg has come to grief. It transpires that Koreneff and other secret agents had for weeks been traveling in Russia, trying to organize a governmental peasant party and to secure the adherence of the members-lect to Parliament ence of the members-elect to Parliament, for whom lodgings in government build-ings at low prices had been arranged by Durnovo, and secret instructions were sent to the Provincial Governors to insent to the Provincial Governors to in-duce the peasant members to occupy these lodgings. The plot was exposed in several provinces and aroused excite-ment among the peasants and protests from 18 governors. Nevertheless, it was partially successful. About 40 members-elect were already occupying government lodging by pursue vertexing.

BARU. Caucasia, April 18.—(Corre. spondence of the Associated Press.)—A daring plot of Armenian revolutionists to rob the magazine in the arsemil here, guarded by the Salivansk regiment and containing over 1,000,000 rifle cartridges, the entire reserve supply for all the regiments composing the garrison, has been accidentally discovered when the conspirators were already on the very verge of success. They bored a tunnel 700 feet long in the direction of the arsenal. It was one of the most pretentious examples of subterranean work in revolutionary annals since the days of the terrorists of the 80e.

These two names alone are enough to put the Ministry under eternal ban with the Liberais.

The delay in the appearance of a message accepting M. COMING ATTRACTIONS.

Great Play Well Acted.

Portland has a surprise and a treat in tore. "The Christian" company, opening for three nights, commencing Sunday ing. May 6, at the Heilig Theater, is a beau-

tiful production.

The story of the play is too well known to require reteiling, and the production has been a tremendous success wherever it-has been presented. "The Christian" has made the phenomenal record of having played to over double the average receipts of the representative theaters of the continent. The reason of the success is easily understood. "The Christian" appeals not only to all classes of theatergoers, but to those who seldom or never attend a dramatic performance. Though powerful, the story is strictly moral, and advises a liberal religion, which, acceptable to all, does not offend any sect or creed. One of the strongest proofs of this was offered up in a special matines given at or creed. One of the strongest proofs of this was offered up in a special matines given at the Knickerbocker Theater, in New York, it being attended by 230 divines of all different denominations, many of whom had never before been inside a theater. IAP-A-LAC is a high grade colored varnish for renewing the finish on any old, dilapidated piece of furniture, interior woodwork or articles of wood or metal. It dries quickly, with a hard, beautiful luster, and retains its brilliancy through wear and tear right down to the surface.

There are many methods of making varnish, but no manufacturer has been able, so far, to make anything

which will take the place of JAP-A-LAC. Colored JaP-A-Lac is made from pigment colors. Pigment is a dry, organic coloring substance which is unaffected by atmospheric or chemical changes. Any one of the JaP-A-Lac colors will retain its original shade throughout its entire life. Aniline colors are frequently used to color varnishes, and although varnishes colored with aniline appear brilliant and effective when first put on, they soon fade and become dull. Chemical changes in the atmosphere will kill their brilliancy in a very short time. The air is often contaminated with sulphurous gases from furnace or heating apparatus—other injurious gases are constantly coming in contact with varnished surfaces; and unless the varnish is colored with the best pigment, it cannot withstand the damaging effect of such an atmosphere. Aniline is nothing but a dye. If you want a lasting, brilliant finish, don't accept a substitute for JAP-A-LAC. JAP-A-LAC is the original colored varnish, manufactured by our special process which makes it more beautiful, lasting and artistic than anything else on the market. You can reclaim many an old piece of furniture which you are ready to throw away—you can beautify everything about your home from cellar to garret at small cost—you can do your own varnishing and take pleasure in the work as you see its wonderful effectiveness wherever applied. Natural JAP-A-LAC is a clear varnish of the highest grade. All varnish used in the manufacture of JAP-A-LAC is as good as can be made. The name GLIDDEN on a can of any kind of varnish stands for highest quality; quality demonstrated by one of the oldest and best known varnish manufacturers in the United States. When your floors become scuffed and dull, you can refinish them yourself at about what it would cost to pay a finisher for his time. The dealer who offers you something which he claims is just as good as, or better than JAP-A-LAC, does it ONLY for the reason that he makes more money on the substitute.

Manufacturers of substitutes, having no reputation to sustain, are not particular about quality, but depend for their business on the ability of the dealer to sell you something else than the goods you ask for. Insist on JAP-A-LAC. Any dealer can get it for you.
