# QUAINT FURNITURE

IN FUMED and WEATHERED OAK

The furnishing of the hall, the library, the living-room, the dining-room and the den is not a difficult matter when quaint furniture is selected, and the above rooms furnished in this manner present an artistic, pleasing and home-like effect. The beauty of the "arts and crafts" designs lies in its plain, solid lines, and the fact that it is fashioned after the original hand-made furniture which graced many of the old missions. To complete its strong and simple beauty, many finishes have been applied, the most popular of which have been the "fumed" and the "weathered." The former, however, has proved to be the most characteristic. This color is of a soft nut-brown shade, of a tone that will harmonize perfectly in any surroundings. Our gathering of quaint furniture embraces designs which are the foremost creations of the craftsmen designers and builders. To our showing of such we have recently added many new pieces for the hall, living-room, library, dining-room and den.
