In All Eight Men Perish From Fire That Breaks Out in Rocky Fork Property in Montana.

ANACONDA, Mont., June 7 .- One of the most serious accidents in the history of coal mining in Montana has occurred in the mines of the Northern Pacific at Rocky Fork, near Red Lodge, Carbon County

Eight men are dead, all victims of the fatal white damp that filled the corridors of the mine after the fire, which started Wednesday. Their bodies have been re-Wednesday. Their bodies have been re-covered, and the story of the work of the rescue parties is a tale of unexcelled bravery and heroic self-sacrifice.

Of the dead, two were members of one of the parties that entered the mine in the effort to reach the men known to be

The fire which caused the trouble started in incline No. 6 Wednesday. This was believed to be under constrol after a long, hard fight. At 7:30 this morning the first rescue party started down No. 6 incline proceeding cautiously, as it was found that there were still traces of the fire. When they reached a depth of 1300 teet all were overcome. Seven managed to struggle back to where they could be reached.

By this time a dense volume of smoke burst from No. 5 incline, and the air in No. 5 was so foul that the rescuers were driven back. At 16 o'clock another rescue

party, was formed. Business men and townspeople volunteered when the Finnish minegs held back terrified.

A special to the Standard from Red Lodge says the scene about the mines was terrible. Frantic women and crazed men ran about harmoring the work of men ran about, hampering the work of rescue. The second volunteer party was aucoessful. The fans were reversed, and the smoke forced back out of No. 6 ineline. In the stopes, brattices were made of canvas, and water was let in from vein §5. The rescuers were let down slowly in cars. They first found the unconscious forms of six of the first res-All were revived but Carey and Bracey, It is believed the injured will entirely re-

Several of the second rescue party, among them Pit Boss Haggerty, were overcome during the day, but were restored, and Haggerty returned to the work of rescue. It is believed that all bodies have been removed from the mine. The work of fighting the fire is now being maked vigorously.

The State Coal Mine Inspector and local officers of the company are on the ground and characterize the work of the rescuera as brave to the point of foothardness. The outbreak of the fire in incline No. 6

is inexplicable, as it was believed the flames had been completely extinguished during the night.
