English Hop Yards Show No Improvement.

### SLOW GROWTH IN GERMANY

In New York State, New Yards Look Well, but Old Ones Do Not Promise a Very Large Crop.

here are no new developments in the ho narket. So far as can be learned, no order re being held by dealers nor are any lot dny offered on the open market. It is said ist some of the speculators who bought on the late flurry would be willing to sell the ps for what they paid for them or less, there does not appear to be any demand for the goods. The Eastern market dragging, as there is no inquiry from rewers, but the undertone of the New York parket is firm in view of the light stocks and reports of erop damage in that state. In the coast everything is still favorable. All reports from Europe of crop condition are being received with close interest. The latest advices show no particular change. The

Kentish Observer of May 24 said: Tying is now general in all districts. Growth is been retarded by the cold weather of the past week, and the young shoots present a rather unhealthy appearance in some grounds. There is a lot of flea at places, and whereverm is also troublesome. The showers of the last few days have been beneficial, but a spell of warm weather is great-

The Observer prints the following reports from dealers:

From Cattley, Gridley & Co., London-A steady demand for useful English hope con-tinues at late values, and also a strong in-quiry for choice Pacifics. These latter, how-ever, are scarcely to be found on this mar-ket, and the advance in value that has taken place on the other side prevents exports for general trade. The plantations in England and on the Continent are making slow progress, owing to the continued low temperature. From Exchange & Hop Warehouse, London—There has been a better demand during the week, but few sales have taken place, owing to the limited offers. Type in the owing to the Himited offers. Tying in the plantations is in progress, but the plant is somewhat bookward, owing to the cold weath-

experienced lately.

From Manger & Henley, London—The inulry continues for good sound copper grades,
high are scarce. Buyers begin to find it
o sasy task to meet with hops suitable for
heir requirements. Prices remain firm with

heir requirements. Prices remains

hardening tendency.
From J. H. Moredith & Co., Worcester—
Owing to cold nights, and absence of sunshine, the young plant grows clowly, and in
many grounds tying has not yet commenced.
From Adolf Heller, Prague—During last
week rather an active inquiry prevailed on
the Saax bop market for both home and
German breweries. This last fact proves
German breweries. what intrnisic value the Sazz hops contain, when German breweries do not hesitate to become very small. Although the weather was very genial, neither in Bohomia nor in Germany the hop plant made an adequate progress in growth, but is sound and strong rogress in growth, and tree of vermin.

The Waterville Times of June 1 thus reported conditions in New York State: There is nothing new to say of hop condi-na and there have been no transactions, he cold weather has retarded the growth that the crop is later than usual. The sti-

untion seems to be that the newer and best yards are looking well and promise a good yield, while the older and worn-out yards do not promise a very large crop. A meeting of the Willametta Valley Hop-

burn on June 20 for the purpose of electing a president in place of John Kennedy, deceased, and for such other business as may be brought up relative to sending delegates to a general convention of hopgrowers, which is being arranged to be held in Portland

The Woodburn Independent has started an agitation for a combine of Oregon hopgrow-

It does not require columns nor many words to warn the happrowers of Oregon that this year-and the sooner the better-they must combine for their own protection. Every hopprower of Oregon should see by now that he is vitally interested and that he must enter into a purchasing and selling combine or he is liable to come out at the little end of the horn. There is no guesswork and trusting to luck this year. The poar future has been opened up sufficiently for him to see clearly and behold a smast in prices if he does not pool this year's crop. The combine, if backed by all, would prove a potent factor in reducing the price of necessary bur-lap, twine, suiphur, etc., and would make a living figure to the grower for the product. But there would be no use in only a portion and others standing aloof. All must unhest-itatingly go into it or the conditions this year will be worse than last. It roses with the growers to the man. It is their own in-terests that are concerned, and surely they have had enough experience to have their eyes folly opened by this time and have sense enough to know that in 1908 they must work together—that this year particularly in unity there is alrength. Timidity in this in-stance would be reckless waste. Temerity is stance would be reckless waste. Temerity is an absolute necessity or many will go to the

## BANANAS ARRIVE GREEN.

More Canteloupes Received From Southern

Four cars of bananas arrived yesterday and all proved to be green. Three crates of cantaloupes were received from Brawley and some are promised from Coachella today. Yesterday's lot brought \$4.50 for pony crates and \$12 for process. and \$12 for specials. The melons were ripe and yellow. A few crates of Legan berries came in and sold at \$1.50. Strawberries were scarce on the street, but there were hig arrivals at the market, most sales being at \$1.25 a crate. California cherries were @1.25. Apricots were quoted at \$1.75@2.

day, after several days of scarcity, but all the best offerings were taken up readily, A lot of poor Oregon peas of the Alaska vaat any price. Telephones were in demand. A quantity of green corn was received from Winters, Cal., and sold at 47% conts a dozen. A car of Sacramento cabbaga is due today, also a car of mixed small vegetables.

absence of any Elastern frozen poultry helps the local trade. Eggs are active and firm at 20 cents, with

The creamery butter market is unchanged. City prices are not uniform yet. Country store butter is firm with a good shipping demand.

Whent Market Firmer.

market, and dealers now quote club at 73 cents and bluestem at 75 cents. Trading has been settled. Foreign markets are improving, but the advance abroad has not been sufficient yet to permit of export business

ugar in the local market have run very low. A large quantity, however, is being shipped north by rail, and there will be plenty of sugar on hand early next week.

It is learned that the Spreckels refinery at earthquake, can be put in shape for the coming campaign. Repairs are now being made 150 to 200 to as fast as possible. It is said that the cost up, 76716c. will probably amount to from \$200,000 to \$250,

Coarse Wools Quoted Lower, Wool dealers yesterday received wires from

Valley wools. Quotations were, therefore, lowered on this grade to 22% to 28 cents. Bank Clearings.

NEW YORK, June 8.-Closing 

BOSTON, June 5.—Closing quotation 

July Wheat Advances Three-Quarters Cent at Chicago.

BULLISH MISSOURI REPORT

Continued Wet Weather in Minnesota Is Another Strengthening Factor-Demand Is Urgent During the Last Hour.

CHICAGO, June 8.—The Missouri crop report rendered the wheat market firm at the opening today. Another factor that strengthened prices was the continued wet weather in the Red River Valley in Minnesota. Toward the end of the first half hour, improved weather conditions in the Southwest caused free selling by local longs and commission houses, which brought about considerable declines, but during the last hour the demand

GENERAL PUBLIC KEEPS AWAY FROM WALL STREET.

Present Stock Market Purely Professional-Grangers Affected by Course, of Wheat Prices.

NEW YORK, June 8, — The professional limitations of the present stock market were still manifest today. In fact, the slight evidence of small commission-house huging, which was reported yesterday and which are used hopes that the professional campaign was meeting its first success in attracting outside interest, was no longer perceptible today. The aggregate of the sales underwent a decided abrinkage.

The character of the market was not materially changed from recently prevailing conditions. Fewer stocks were picked for a demonstration to attract attention by large

prespect. The sharp advance in Delaware & Hudson was accompanied by active dealings in the convertible bonds on the curb and application was made to list the bonds at the stock exchange.

The week's currency movement did not indicate a large change in cash reserves of the banks on the actual movement, but the easy tone of call money indicated a strong bank statement. The loss reported on sub-Treasury operations of \$539,000 includes return of Government funds advanced to the banks against gold imports to an amount larger than that, and as the gold has arrived this loss is offset. A small gain in the express movement with the interior is also indicated. Gains made late last week figured but slightly in the showing of averages upon which the lass hank statement was made up, and the discrepancy is expected to be rectified in tomorrow's statement.

A slightly firmer tone was reported for time money today, due to decrease in amounts of offerings. The sterling exchange market continued to advance in response to the earlier money conditions and demand for remittance against maturing finance bills was said to be an important factor in that market. Attention was given to published expressions by a prominent banking official in a tone of warning against an assumption of security against money stringency beyond the immediate future and pointing to the requirements still unimet for payment of San Francisco insurance losses and the liquidation of assets yet to be effected on that account.

The continuance of the injunction against the enforcement of the suit to test its constitutionality, caused feverish fluctuations in Coning a decision in the suit to test its constitu ing a decision in the suit to test his constitu-tionality, caused feverish fluctuations in Con-solidated Gas The closing was easy. Bonds were irregular. Total sales, par value, 34,250,000. United States old as coupon adavaced is per cent on call.

Commodity Prices Reach Highest Point in 20 Years.

RAILWAY EARNINGS GROW

Weakest Feature of Cotton Goods Industry Is Entire Absence of Export Demand-China Out of Market.

NEW YORK, June 8.—R. G. Dun & Co.'s Weekly Review of Trade tomorrow will say: On the whole, the week's results were encouraging, and monthly reports for May show spicalid gains over last year's figures. Prices of commodities rose to the highest point in 20 years, \$105,794 on June 1, comparing with \$105,009 a month previous and \$38,710 a year ago. Railway carnings in May were II.2 per cent heavier than in 1905, and foreign commerce at this port for the last week commerce at this port for the last week showed a gain of \$1.346,180 in exports and a less of \$11.508 in imports, as compared with the curresponding week last year. The weakest feature of the cotton goods industry at the present time is the utter ab-

sence of export demand. China is out of the market, and a heavy accumulation of goods is noted at Shanghai, while the out-look for their absorption is far from promising. Footwear factories receive only a fall volume of new Fall business. Hides are

Fallures this week in the United States are 206, against 174 last week, 188 the preceding week, and 216 the corresponding week last year. Failures in Canada number 18, against 13 last year, 8 the preceding week and 20 last year.

GENERAL BUSINESS UNUSUALLY GOOD Fall Orders Are of Good Volume-Canned Ment Trade Poor. NEW YORK, June 8.—Bradstreet's tomor-

NEW YORK, June S.—Bradstreet's tomorrow will say:
Jobbing and wholesale lines are commencing to reflect the usual seasonal quietness.
Nevertheless, business is more active than is customary at this season, and Fall orders for drygoods, clothing, shoes and inter-related lines are of very good volume. As a whole the situation is equal to a year ago. The labor situation, though disturbed at different points, is considerably better. A good demand for is considerably better. A good demand for dry goods and general supplies for San Fran-cisco, where conditions are rapidly approach-ing normal, is noted. The return flow of muney from the country is unmistaxably large, and easier rates are expected.

large, and easier raies are expected.

Railway sarnings continue very heavy, the increase for May being no less than 14 per cent on roads operating outside the anthractite coal field. On the other hand, reports about the meat packing industry adversely affect trade in that line, while high prices tend to cause deadlocks in some lines, notably wool and some lines of, building material. Lower prices for yellow pine are reflected in ease in northern soft woods and have evoked some new business.

aone new business.

Business fallures for the week ending June 7 number 162, against 127 tast week, and 194 in the like week of 1905. In Canada failures for the week numbered 17, as against 19 last for the week numbered IT, as against 19 last week, and 25 to this week a year ago. Wheat, including flour, exports from the United States and Canada for the week ending June 7 are 3,501,007 bushels, against 2,566,739 last week and 1,476,849 this week last year. From July 1 to date the exports are 128,627,013 bushels, against 60,013,247 last year.

Bank Clearings. NEW YORK, June 8.—The following ta-ble, compiled by Bradstreet, shows the bank clearings at the principal cities for the week ended June 7, 1006, with the percentage of increase and decrease as compared with the
