New and Interesting Phase.

If it is true that two of the election officials in Sellwood precinct are among those named in the incriminating documents to be returned by the Grand Jury probably upon the charge of official misconduct, a new and more interesting phase will be placed upon the situation. If they are convicted of the charge to be placed against them, it will have the effect of invalidating the election in that precinct, and, if this should come to pass action at law will probably be brought set aside the vote in that precinct. As Sheriff-elect Stevens - received a ma jority of 17 votes in that precinct, the casting out of the entire vote there would affect the general result, and might determine whether Stevens or Word should be the next Sheriff. Otherwise the result of the investigation will have no effect upon the election so far as the general results are concerned.

Witnesses Before Grand Jury.

The witnesses who appeared before the jury during yesterday's session were H. J. Crouse, Edward H. Bollinger, Ran-dolph Brown, R. B. Urfur, W. T. Kinsey and Mr. Bell. Chairman John A. Grace Church Filled With the

QUEEN OF ALL FLOWERS

Frederick V. Holman Delivers Lecture in Which He Urges Portland to Plant More Roses and Keep Its Title.

The Portland rose was queen at Grace Methodist Church last night. The Ladies Aid Society gave a show of roses that splendidly represented the beauty of Portland's favorite flower. Blossoms of every color and variety known to Portland rose gardens were there, the parlors of the church being lined with them. The roses showed to splendid advantage, and the large crowd attending commented most

favorably on the exhibition.

Frederick V. Holman delivered a short address on the rose that was the feature of the evening, and was carefully listened to by those who love the queen of all flowers. Mr. Holman urged the planting of more roses and the making of this city worthy of the title of the "Rose City" above all other places.

Urges Planting of Roses.

"Plant roses," said Mr. Holman, "plant more roses and keep on planting roses. Then get your friends to plant roses. I am not fighting other flowers. Plant them, too, if you want to, but plant roses first. Give Portland a wider fame as the city

Roses have been the flower of the dom inant races of all history. The Persians grew them when at the height of their power. Rome cultivated the rose while the city on the seven hills was in her prime. The flower is not found south of the equator, but grows to perfection

among the conquering nations. "The masters of Greek poetry wrote of the rose, the Biblical authors praised it. With the Aryan races the rose goes back as far as tradition goes, and the blem of the race. But the roses of those days were not the roses we have today. The flower had not reached the perfection it now presents

Portland Specially Suited.

"But few places anywhere are so well suited to the best development rose as is Western Oregon. In and Southern Germany the rose is cultivated extensively, but in neither place does it grow so well as in this climate. The Winters in England are more severe: it takes more care and expense to bring the flowers to a good stage of de-velopment, and while the wealthy classes of England spend a good deal of money in the cultivation of the flower, it does not have so general a culture nor en-joyment as it has here. In Germany the cose is also confined largely to the richer classes, but here in Oregon there are one so poor that they may not enjoy this

beautiful flower.
"California lacks the climate for the perfect roses that Western Oregon grows. Experts have tried for years to make the rose attain its best development in Cali-fornia, but in vain. While they can grow the roses in houses to shut out the hot rays of the sun, they cannot substitute the moisture in the air of the Oregon climate that brings out the roses in the

Appeals to Beauty Hunger.

"In growing roses all over Portland it s not the commercial spirit that animates us. In growing more of this queen of flowers we are feeding the beauty hunger in the child, which is just as important

as to meet the wants of the physical or mental hunger."

Mr. Holman commanded close attention throughout his address. He closed by exhibiting some rather rare roses that are not in general cultivation, which he picked from his own garden.
