LONDON, July 12.--William J. Bryan, having had the opportunity of reading American newspapers, consented today to discuss some of the questions which have been raised since he has again be-

have been raised since he has again be-come prominent as a Presidential possi-bility. He said: "I notice that I am not regarded by some as conservative, and in order that there may be no misunderstanding on the subject, permit me to say that in one sense I always have been a conservative. The Domografic college as conservative. sense I always have been a conservative. The Democratic policies are conservative, in that they embody old principles ap-piled to new conditions. There was noth-ing new in principle in either of the plat-forms on which I stood. We were ac-cused of attacking property, when in fact the Democratic party is the defender of property, because It endeavors to draw the line between honest accumula-tion by honest methods on the one side and predatory wealth and immoral meth-ods on the other. It is to the interest of every honest man that dishonesty should be exposed and punished; otherwise the deserving are apt to suffer for the un-deserving.

Position Not Changed.

If, however, by the word conservative they mean that I have changed my po-sition on any public question or mod-erated my opposition to corporate aggrandizement, they have a surprise waiting for them. I am more rad-ical than I was in 1836 and have nothing to withdraw on economical questions which have been under grandizement.

The only question we discussed in The only question we discussed in 1596 upon which there has been any apparent change is the silver question, and there has not yet been any change in the advocates of binnetallism but in conditions. We contended for more money and urged the free coinage of silver as the only means then in sight of securing it. The increased produc-tion of sold hes brought in nort the tion of gold has brought in part the benefit we expected to secure from the restoration of silver.

Silver Not an Issue.

'I believe in bimetallism, and I believe "I believe in bimetallism, and I believe that the restoration of sliver would bring still further prosperity, besides restoring par in exchange between gold and sliver-using countries, but I recognize, as do all bimetallists whom I have met abroad, that the unexpected and unprecedented increase in gold production has for the present removed the silver question as an issue

Issue. "While the money question has waned in importance, other questions have been forging to the front, and to those ques-tions we must apply the same principles we applied to the money question and seek to secure the greatest good to the greatest number, by legislation which con-forms to the doctrine of equal rights for all and special privileges for none." Mr. Bryan added that he would discuss the trust, tariff, railroad and labor ques-tions, imperialism and other issues at
