Robert Waddell Resents Criticism of Marriage Ceremony at The Oaks.

OTHER LINES WILL FOLLOW

Rate Applies From Duluth, St. Paul and Missouri River Points to the States of Oregon and Washington.

So urgent has become the demand for laborers in the Northwest that the Northern Pacific Railway has decided to make a reduced rate from the East to all points in Oregon and Washington to induce men of the working class to come to the Coast.

The rate will be good only in parties of 25 or more, where one ticket is used, and will permit those taking advantage of the reduced tariff access to the day coaches only, giving them no accommodations in sleeping-cars or diners.

The rate applies from Duluth, St. Paul, Minneapolis and Missouri River gateways to North Coast points. The 25 tickets will also be good from intermediate points where the fare is now in excess of 25c.

The great need for workers in the two Northwestern States and the pressure applied on the railroads for a low rate that will attract large numbers of laborers from the East are the reasons for the announcement by the railroad. The need for common labor was never so great in the two states, and the step just taken seems the only way to relieve the situation.

The 25 tickets for laborers in parties of 25 or more will be on sale daily from now until September 14, when the usual colonial rates of 25c from the Missouri River to the Coast becomes effective. The rate is now 40c for a second-class fare between the points affected by the new laborers' rate.

This concession on the part of the railroads will be hailed with delight by contractors, who employ laborers in Oregon and Washington, who are hard put for men to fill their construction camps and complete their contracts. It is expected that with such a substantial reduction in fare large numbers of men will come West.

Western Pacific Will Use Hammond's Line Across Oregon.

SAN FRANCISCO, Aug. 20.—The Chronicle says today that the fact that the Gould lines have obtained an entrance to Oregon has leaked out through the announcement of A. B. Hammond, president of the Portland, Eastern and Astoria & Columbia River roads, that the first named will be extended from the terminus at Indiana, Oregon, to a point in the Klamath country, some point on the Snake River, probably Ontario.

The road also will be started from Astoria in the same connection, as it will be pushed south along the coast from Seaside to Nehalem and Tillamook. These projects will aggregate more than 150 miles of construction for the two roads within the next two years.

It is said that the terminal of the Corvallis & Eastern may not be Ontario, but a point in the Klamath country, where a junction may be effected with the California, Nevada & Oregon road, an acknowledged Gould line, which it is intended shall be pushed north from the main line of the Western Pacific at Reno, Nev., to Lakeview and the Klamath. The latter project has been completed as far as Madeline Plains.

The building of the Corvallis & Eastern to a junction with the Western Pacific, or the California, Nevada & Oregon, and then closing the gap to Albany and Portland, or Yaquina and Tillamook, will be a most important access to all the important northern harbors, except Coos Bay.

This story is substantially what was printed in The Oregonian several weeks ago when A. B. Hammond made the official announcement of the projected extension of both the Corvallis & Eastern and the Astoria & Columbia River roads. At the time it was predicted that the Gould interests, who are allied closely with Mr. Hammond's associates in the ownership of the two roads, are to make use of the extension of the Corvallis & Eastern across Central Oregon in order to connect with a branch of the Western Pacific stretching north from Reno, Nev., while the closing of the gap between Yaquina Bay and Tillamook would afford an entrance to Portland by easy grades. That Oregon will become the battleground for the Gould and Harriman forces, as well as the point of conflict between the Harriman and Hill interests, is believed by many.

INJUNCTION HEARING PUT OFF Court Grants Postponement Asked by Harriman Company.

A postponement of the hearing of the injunction asked by the Portland & Seattle Railway against the Northern Pacific Terminal Company to restrain the latter corporation from acquiring any more of the lands adjoining the terminal yards which are claimed by the suing company, was granted yesterday in the Federal court upon application of counsel for the terminal company, a Harriman concern. The date for the hearing was set for October 1. The temporary injunction will remain in effect until that time.

BETTER POWER ON SPRINGWATER ROAD A change has been made in the manner of providing power for the Springwater division of the Oregon Water Power & Railway Company that will make a decided improvement. Generators have been added to the Boring steam plant, which now feeds direct current on the line there. Formerly the current from the Boring power plant went to the Gresham and Eagle Creek substations before it was fed onto the line, which is a direct current in conjunction with the new substation at Lentz.

The new arrangement at Boring will be a benefit to the operation of the Springwater division.

Portland-Vancouver Fare Reduced.

The Portland Railway Company announces a reduction in fare between Portland and Vancouver, which will become effective immediately. Hereafter the fare for one way will be 20 cents instead of 25 as formerly, and round-trip tickets will be sold for 35 cents instead of 45 cents as heretofore. This fare is for the Columbia River ferry also have been materially reduced. The lower fares are the result of a series of conferences between the officials of the Portland Railway Company and the Commissioners of Clark County, Wash.

Talbot Vice-President of A. & C.

Guy W. Talbot, general manager of the Astoria & Columbia River Railroad and the Corvallis & Eastern, the latter of which he has been elected to the office of vice-president of the A. & C. to succeed T. H. Curtis, who recently resigned. Mr. Talbot was appointed general manager some time ago by Mr. Hammond and the associate owners of the two roads, but the vice-president is elected by the directors. He retains the position of general manager of both lines.

WEDDING NOT LIKE HANGING

Robert Waddell Resents Criticism of Marriage Ceremony at The Oaks.

That one place is as good as another to be married, and that when a man begins to trot in double harness no long face or funeral appearances are necessary is the belief of Robert E. Waddell, whose marriage to Miss Dorothy White was celebrated last Friday night on the wharf at The Oaks. Mr. Waddell resents the criticism the informal ceremony has called forth, and says it is of the same value to matrimony with a smile as with a frown.

"Because a couple does not want to go up the aisle in some half-darkened church, where everything has the appearance of a hanging, there seems to be good deal of unjust criticism of our act," said Mr. Waddell last night. "Many marriages remind one of a man going to the scaffold. We did not feel that way about it. If we had, we probably would not have been married at all."

"I do not see any more odium being attached to being married at The Oaks than would result from the marriages at other places," he said.

The firm of Klaber, Wolf & Netter, the most extensive handlers of hops on the Pacific Coast, has furnished The Oregonian with a statement of conditions in the hop market, as affected by the coming crop, which will give the greatest interest to every one connected with the hop industry in this part of the country. The firm has connections in every part of the world with the growers of hops, and in the past few days has received dozens of cables and telegrams bearing on the situation. From this mass of reports and crop predictions, a conservative estimate of the 1906 crop of America and foreign countries has been arrived at, which is set forth in the accompanying table. The figures given for the previous years are official.

M. J. Netter, who has charge of the Portland office, returned a few days ago from a stay of several months in San Francisco. Herman Klaber, whose headquarters are at Tacoma, came over from Puget Sound Sunday and since then both have been busy in sifting down the reports and estimates sent them by their correspondents. The conclusions, as furnished by Mr. Klaber and Mr. Netter to The Oregonian are as follows:

Oregon crop—The crop of this state in 1906 was about 115,000 bales. Enough new acreage would have come into bearing this year to have produced 140,000 to 150,000 bales under favorable climatic conditions. However, owing to the long, dry spell, there is a great deal of black blight, and, therefore, we do not estimate a crop of over 115,000 bales this year. This we regard as a very conservative estimate. Some estimates are as low as 100,000, but we believe this figure entirely too small.

Both Mr. Friedlander and Justice Olson acted like gentlemen and the affair passed off smoothly. It is only people who had no connection with the case selected, who made themselves disagreeable and in doing so they have interfered in something which cannot concern them in the least.

There are different ways of looking at these things, and the way we chose of getting married suits us. I do not know that there is any necessity of pleasing anyone else.

Mr. Waddell is from Goldfield, Nev., where he is interested in mining properties. He says he probably will make his home in Los Angeles.

California Crop Light. California crop—Our estimate is from 35,000 to 40,000 bales. Original estimates were 100,000 bales, but the crop is not looking so good now. Picking is under way in the Sacramento and Yuba sections, where it will be general by August 27. By September 1 to 5 picking will be general in other sections.

About one-half the California crop has been contracted for at prices ranging from 8 to 10 cents per bushel. The contract with Durat for 2000 bales. The crop of California is practically 35,000 bales. The quality of the crop promises to be better than last year, and it looks as if Soнома and the best sections would produce a quality of crop superior to last year's.

New York crop—From the latest estimates, our reports have been reduced, but we do not care to place it at less than 50,000 tons, though a number put it under 40,000, and some of the more conservative say 30,000 tons.

1906 and odds—These are practically exhausted and the stocks of such in dealers' hands are much smaller than for many seasons past at this time. In the San Francisco crop 3500 bales were consumed.

Belgian crop—Last year the crop was 110,000 centners, a centner being 100 pounds. This year the crop will be about 80,000 centners. The average consumption is about 100,000 centners, so Belgium will be compelled to buy hops in America to make up the deficiency. The market in Belgium is now advancing, and prices range from 120 to 140 francs. The quality of the Belgian crop is always inferior.

Bohemian crop—The Saaz section has a fairly good crop, but the Auscha and Dauba districts are badly affected by worms and at best they cannot have more than half of last year's crop in Bohemia. Last year the yield was abnormally large. Some estimate the Bohemian crop at 50,000 centners under our estimate. The crop will hardly be sufficient for their own consumption, therefore their forward contracts for exportations to England and America put them in the position of being compelled to get along with their surplus or emergency stocks, which brewers hold, or purchase their requirements elsewhere.

German crop—The estimates range from 300,000 to 400,000 centners as against 445,000 centners last year. We have placed our estimate at 400,000 for the reason that there has been a slight improvement in the conditions in the past few days and also because the German crop is generally under-estimated. This is the smallest crop Germany has had in ten years, except in 1901, when the yield was approximately 275,000 centners, and some dealers are in-
