

HIPPLE IS PROVED TO BE EMBEZZLER

Stole \$5,000,000 He Lent Segal, Says Trust Company's Receiver.

MANY SECURITIES MISSING

Suicide Bank President Was Partner in Select Girls' School—Earle Suggests Plan to Pay the Depositors in Full.

PHILADELPHIA, Aug. 30.—Examination of the list of securities held by the defunct Real Estate Trust Company today developed the fact that Frank K. Hipple, president of the institution, who committed suicide, was an embezzler.

Mr. Earle further declared that Hipple embezzled the \$5,000,000 he loaned to Adolf Segal, the promoter. These loans, Mr. Earle asserted, were personal transactions.

Although they were made in the name of the bank, the directors had no knowledge of them, consequently the money was stolen by Hipple," said Mr. Earle.

Hipple Partner in Girls' School.

Another enterprise in which the dead president was financially interested was discovered today when it became known he was one of the incorporators of Miss Wright's select school for ladies at Bryn Mawr, the suburb in which Hipple had his summer residence.

Miss Wright said today that Mr. Hipple visited the institution two or three times a week. His last visit was made, according to Miss Wright, on Thursday afternoon of last week, the day before he shot and killed himself.

Can Pay Dollar for Dollar.

In an interview today Mr. Earle reiterated his opposition to a permanent receivership for the Trust Company. The proceeding, he declared, would deprive the concern of its trust funds, which are among its most valuable assets.

Hipple Blew Out Brains.

Coroner King today admitted that Hipple committed suicide. When Mr. King made the announcement, Dr. Albert K. Eck, coroner's physician, was standing near, and he added:

"You can say that Mr. Hipple blew out his brains."

"When I went to Bryn Mawr Saturday morning to investigate the death of Mr. Hipple, I found he was the president of a trust company, and when I discovered that he had committed suicide, I decided to suppress the fact for a few days, in order to prevent a run on the trust company. I thought that, if there was anything wrong in Mr. Hipple's transactions, the directors would have a chance to make up whatever defects there were."

The coroner stated that Hipple had placed the muzzle of a .38-caliber revolver in his mouth and shot himself. The ball passed upward, lodged in the brain. The shooting took place in the bathroom. The suicide arose shortly before 6 o'clock, and Mrs. Hipple was of the opinion that her husband was taking a bath. When he did not return to his room inside of half an hour, Mrs. Hipple became alarmed and made an investigation. She found her husband lying on the floor in the bathroom.

Earle's Reorganization Plan.

Mr. Earle said that the plan for the reorganization of the Real Estate Trust Company was to ask the creditors to take preferred stock in the trust company for their claims, and appoint their own officers in the company. This, he felt assured, would give the creditors their only chance to get back their money dollar for dollar. Mr. Earle added that he had just discovered that a large asset of the trust company, which it was supposed was not very good, really was backed by names perfectly good, and which could be realized on. This asset is said to be \$250,000 in value.

PHYSICIANS MUST REPORT

BOARD INSISTS ON RECORD OF CONTAGIOUS CASES.

Deaths From These Diseases Have Been in Excess of Number of Cases Reported.

When last month's report of the state board of health was compiled, the fact that far greater number of deaths were reported from contagious diseases than the entire number of cases on which returns had been received was noticeable, and the members of the board determined to take stringent measures to compel county health officers to pay stricter attention to the enforcement of rules. In this respect, accordingly, orders have been issued by the board demanding that every physician in the State of Oregon report all cases of contagious diseases coming under his care or notice to the county health officer, through whom it will be reported to the state board.

By obeying this important regulation to the letter it will be a comparatively easy matter to trace such diseases to their source and eradicate the cause. Especially in this time of typhoid fever, smallpox and diphtheria, and physicians who do not comply with this state regulation will find themselves in hot water.
