It finally appeared that the main purpose of these visits to Black was to induce him to stand as a candidate for Governor. To one and all he declared, it is said, that the only conceivable condition upon which he would consider such a proposition would be the unanimous demand of the convention. This, of course, the leaders could hardly guarantee.

Colorado Springs Is Celebrating Discovery With Much Ceremony.

COLORADO SPRINGS. Colo., Sept. 24. With the city gay in the buff and white of the revolutionary period, the National colors floating from almost every building and the strains of martial music resounding through the streets from early morning, the Pike Centennial celebration, commemorating the discovery of Pike's Peak by the man whose name it bears, opened here today. The chief feature of the day then.

and the chief military display of the week was the parade of infantry, cavalry and artillery, followed by members of the G. A. R., Colorado National Guard, Spanish War Veterans, High School Cadets and other local military organizations, which moved from the Colorado College campus at 10 A. M. and proceeded through the streets of the city. Cowboys and Indians held the conspicuous positions in the parade, the column being fully two miles in length and requiring an hour to pass the reviewing stand, where Vice-President Fairbanks officially reviewed the parade.

INFERNAL MACHINE ADDRESSED TO NEW YORK BANKER.

Suspicion Is Aroused at the Philadelphia Postoffice and Package Dumped Into Water.

PHILADELPHIA, Sept 24—An infernal machine, addressed to Jacob Schiff, the New York banker, was picked up on the street here today by David Thompson, a colored boy, who found it near a mail box. The boy gave the package to Henri Sulaman, a postman, who carried it to the station and deposited it with the outgoing mail. Superintendent J. C. McNaught noticed that the wrapper was torn, and while handling it he observed a grain of powder which fell from the box, and he immediately threw the package into a pail of water.

After it had remained submerged for several hours it was taken out and ex-

A Life Income for You

I Have Made Millions of Dollars for Thousands of People by My Patents

I expect to make millions more. This stock has increased in value more than 100 per cent since September 1st, 1905. The natural increase of business and inquiries for motors has forced the price up several times, it will soon go still higher. This stock should make a life income for you.

PROF. BENSON BIDWELL

The Opportunity of a Lifetime

My Patents Will Double the Capacity

of Any Motor

I never made an unsuccessful invention. My first invention was the electric fam, just as it is run all over this country in hot weather. I didn't get a patent on it, but see what a tremendous success it is.

I next invented the trolley car system, just as it is run today. I made it perfect and successful right from the start. It has never been improved since I invented it. Look at the millions of money it has made for the stock-holders. The stock in the trolley manufacturing companies sold below 18 cents a share in 1893 and 1894. Poor men could buy that stock them. Thousands of them did buy it, and every one who held on to it is a rich man today.

No Man on Earth Ever Lost a Penny He

Invested With Me

If so, I will make it good. Next I invented the Railway Car Telephone System. It is a system by which passengers or train crews can telephone from still or moving cars anywhere the same as if seated in an office. It is a more perfect system in operation than any other telephone you ever saw. This is on the road toward millions for the stockholders.

This Is My Greatest Invention

Now I have invented something bigger and greater than either of the above. It is called the Bidwell Cold Motor. It is guaranteed not to burn out, and is exactly the kind of a motor the steam railroad people have been looking for. It will be cheaper to run than steam and can be run faster and more safely than any present method.

The one drawback the railroads have had in changing over to electricity has been that no motor as at present mide can be run 150 miles at 60 miles an hour without burning out. It would melt the very wires.

By using the Bidwell Cold Motor a train of cars could be run from New York to San Francisco without a step at the rate of 60 or 80 miles an hour and not even warm up and without a hitch.

Besides running faster they would be more safe and sure than steam, cost leas to operate, and would last longer than any other motor now known.

The Bidwell Cold Motor is the greatest invention out since I invented the trolley car.
