The Crook County practically comprises the valley of the Deschutes River. It embraces to the most of the transportation of less than one person to the square miles in area, have to the square mile its agricultural possibilities, structural possibilities, structurate in a average. These tests were made from the top of the sport is instructure, which has a population of abound structurate possibilities, structurate in area than those of Mase and the transport is the structural possibilities, structuration as a structurate and boundieses possibilities, structurate and the transport and the transport and the transport is a main possibilities, structurate and the transport is a structurate and structurate and the transport is a structurate and structurate and the transport is a structurate and the transport is a structurate and the structurate and the transport is a structurate and the structurate and the transport is a structurate and the transport is a structurate and the transport is a structurate and the tr

or two paopositions there and working them. Samples of rock were taken from there mines a few days ago that assayed over \$70,000 to the ton. An excursion is planned for October 25 and 26 for the purpose of showing every-one who will go the entire district. An interesting programme has been arranged, and the occasion is one of vast import-ance to those inferested in mining.

ALBANY, Or., Oct. 21.-(Special.)--Ru-mors of a plan to electrify the street-car line running from the Southern Pacific depot in Albany through the principal business street of the town, and to extend this road, installing a complete street rallway system in the city, have aroused considerable interest in Albany. For years the traveling public have been carried stated that he took samples of the rock indiscriminately around one of the por-phyry dikes on one of the claims, and also the dirt for several feet from the dike, and found it to assay \$50 to the ton on an average. These tests were made from rock and dirt from the top of the ground. Some very rick strikes have been made recently in the Pine Creek mining dis-trict. Wealthy mining men from Nevada are now at Pine Creek looking into the mines, with a view to taking hold of one

experiment can be estimated.

pletes Work of Assessment. GRANT'S PASS. Or., Oct. 21.-(Special.) The assessment roll of Josephine County for 1996 has been passed on by the Board of Equalization, and a reduction of but \$1310 was allowed, and this was due to technicalities. None of the large tax-payers made a protest against the work of Assessor Fallin, though he had raised their valuations, the Southern Pacific be-ing raised \$175,000. This raise was largely on the company's land holdings, the average value for this year being put at \$4 per acre. The roadbed and rolling stock of the Southern Pacific is valued at \$12,000 per mile, while the telephone and telegraph lines are put down at from \$300 to The roll shows that there are 25,159 acres of tiliable land in the county, valued at \$469,265. The improvements thereon are valued at \$235,015. The value of town lots is \$353,045, and the improvements \$466,470. Improvements on undeeded land are placed at \$157,190, this property being mines. There are 32.5 miles of railroad in the county, and 347.9 miles of telephone and telegraph lines, of a total valuation of \$206,715. The valuation of machinery, etc., is placed at \$237,530, merchandise \$245,445, implements, etc., \$35,630, money, \$19,550, notes \$35,440, household furniture. etc., \$56.770.

Mr. Flake is afraid the excessive rain-fall of the Winter searon here may injure his crop, but he is providing thoroughly for the protection of the erop. Ginseng must not be exposed to the sun, and he perennially shaded with lath or other lumber. The cultivation of the crop re-quires but a little work, weeding being the most essential. Mr. Fiske is anxious to see how his crop shows up how per to see how his crop shows up by next Spring, by which time the crop will have been planted two years. That length of time must elapse before the success of the

Josephine County Assessor Com-

North Bend Will Probably Secure

Denatured Alcohol Plant.

Company, New York, came to the Coos Bay country about two weeks ago in an endeavor to interest the farmers in de-natured alcohol. He was accompanied by Dr. Withycombe, who conducted several farmers' institutes in the country and at these meetings the system of conducting denatured plants was explained to the farmers. It was explained that if 75,091 tons of polatoes were promised the com-pany it would at once prepare to begin operations. The distillery could easily handle twice the quantity named, but was willing to start on a small scale.

name twice the quantity named, but was willing to start on a small scale. Contracts were entered into with a number of farmers on a basis of §5 per ton for three years, the distillary to take potatoes of all sizes. It is estimated that at this price farmers will receive nearly

feet in length. During the last two months the com-pany has opened up some very rich ore bodies in the Champion lead, even richer than the ore that was being extracted last Winter when there was so much ore

saling. The Veguvius Mine will start its mill in

ore from the Alex Pugh property that is rich in free gold. Clackey & Peterson while doing their

at the Ringe instel district four dimer-ent finds of good pay ore have been opened this season. Some free gold can be seen with the naked eye. With a number of other good showings reported the camp is gradually forging to the front, and the day is not far distant when the whole State of Oregon will feel the effect of the production from the the effect of the production from the

Progress of New Community.

Trogress of New Constants, The development of Brighted Lands near Redmond, Bend' and Laidlaw, has already here such that it was determined this year to bold a fair at the town of Redmond, and last month a fair was held there. A fract of 50 acres was cleared, a half-mile, kite-shaped track suitable for faces was put in order and an exhibition of grains, grasses,

touches its borders. From Portland to Shaniko by the railroad we pay 60 to 75 cents per hundred for freight, and from Shaniko to Bend we pay ine freichter \$125 per hundred pounds. There can he no wealth without distribution Coal, copper, sliver, gold, without distribu-tion are not wealth but dross. Agricultural products without transportation must rot on the ground. Production and transporta-tion must go hand in hand; each without the other is valueless. Xx Bullmode as Xet

No Railroads as Yet.

No Railroads as Yet. The two great railroad kings, Hill and hardman, have not yet attempted to open up this great emptre. But now when capit-ing the second statempt of the statempt of the enterprise to build a railroad up the Des-dutes Canyon to Madras, which is the northern gateway to this magnificent coun-try, where it may be done with a grade of less than 1 per cent, when the surveys have been made, a company organized and the sequence signs in makes a filing for water power and causes part of the public and on either side of the stream to be shall not have a right of the stream to be shall not have a right of tway. It may inter-fere with our benevolent schemes. We want power for an experimental project. We want to use the water power to develop the to use the water power to develop the to use the water in 100 miles and use to use the carry it 100 miles and use the to may bus stream.

Vast Tracts Lying in Waste.

If the Reclamation Service is intelligen if it is honest, if it is beneficent, if it not a catapaw in the railroad game of th Northwest, than it should keep its hands off and let this railroad go in and heip de-velop this great empire, and protect the capital already there. There are hundreds of thrusands of acres in this County of Crook upon which are raised wheat and eats on dry hund, of which the owners would be giad to give 25 per cent for water.

Yields Four Crops Annually.

CORVALLIS, Or., Oct. 21.-(Special.)-A fifth crop of alfalfa on the Agricultural College farm is a foot high. It stands thick on the ground, and affords excellent pasturage. The four crops that have b cut have given an aggregate yield of 27.16

IMPROVING LUMBER PLANT

Hoquiam Mill Company Is Spending \$500,000 in Betterments.

HOQUIAM, Wash., Oct. 2L.-(Special.)--The Hoquiam Lumber & Shingle Company has decided to improve its plant and build necessary improvements, beginning immediately. The company will expend on the work proposed within the next six months \$500,000. The new mill office, a structure 24x60, has been started and will be ready for occupancy in two weeks be ready for accupancy in two weeks. The large brick drykin has been com-pleted and the foundation for two more of these kins is being hai. Work of con-struction will begin as soon as the concrete hardens. These kilns cost \$12,000

each. The machinery for the new bandsaw is here and is being installed. This will in-crease the cut of the mill materially. This mill is running day and night and is cutting every 24 hours an average of 350,000 feet of lumber. Owing to the shortase of cars, very little lumber is being shipped East, but a ready market is found in California.

During out, en built Now, however, representatives of

the Summer First street has been built up greatly and where Front formerly had a monopoly of the business of the town, First street is now forging rapidly to the front. Many of the property holders are suggesting that the street be paved in order to secure an advantage over the older street, and there is some likelihood that this will be done. David Eccles of Salt Lake is in Baker

the promotor, for the greater part of the week, and together they went over the various details of the proposition, and will, it is stated by those who know, reach a final agreement in the near future. The business interests of the future. The business interests of the town are anxiously awaiting the news that the contracts have been finally

that the contracts have been many signed. With the coming of the railroad there are indications of a boom in the mineral properties of the Copper belt, and in the Cornucopia gold mining region which the road is tapping. These two localities are the most promising in the entire Baker mineral field today.

Is Boosted by the Cornucopia.

The announcement that the owner of The announcement that the owner of the Cornucopla mine is building an elec-tric line from Cornucopla to Hathaway or Carson to meet the Eagle Valley rail-road has placed that property uppermost among those of the Cornucopla district. and has been a big boost for the entire

the front street has present be paved in order to secure an advantage over the older street, and there is some likelihood that this will be done. David Eccles of Salt Lake is in Baker looking after his interests in the Sumpter Valley and the Oregon Lumber Company, enterprises which he owns, and also clos-ing up the deal for the Eagle Valley line, which he will in all likelihood build. Mr. Eccles was closeted with W L. Vinson, the promotor, for the greater part of the work and together they went over the

from the Albany depot to the streets will be operated with electric power within a short time.

LAIDLAW SEEKS PUBLICITY.

Development League Gathers Data Concerning Country's Resources.

LAIDLAW, Or., Oct. 21 .- (Special.)-The

LAIDLAW, Or. Oct. II.-(Special.)-The Laidlaw Development League has had a committee at work for the past four weeks gathering data as to the resources and possible development of the country surrounding Laidlaw. The committee has just made its report and the following data was given to the league: "Six irrigation companies have systems in operation within a radius of 20 miles of Laidlaw and these systems have over 20,000 acres of irrigable land under their ditches. There are about 12,000 acres now ditches. There are about 12,000 acres now

The borses and mules number 1474, and are valued at \$80,155, cattle 4525, valued at \$50,055, sheep and goars 1216, valued at \$50,005, sheep and goars 1216, valued at \$3300, swine 1057, valued at \$2548. The total valuation of taxable property in the county is \$4,711,630, a gain over last year of \$512,075.

The delinquent roll is now being made p by Sheriff W. J. Russell, and it will c advertised in a short time. It is quite mall, about the same as last year.

NEW MILL FOR WALLOWA.

Plant Operated by Water Power and

Well Equipped.

WALLOWA. Or. Oct. 21.-(Special.)-Work is progressing rapidly on the Wal-lowa Lumber & Manufacturing Com-pany's main building. This will be 20 by 120 feet and will be equipped with a com-plete line of the latest and best wood-working machinery obtainable. More

porarily by steam power. Steam power will also be used in operating the huge modern drykiln, which will be part of the

\$100 per acre for their product. It was explained by the promoters of

the enterprise that when the distillery was running at its full capacity it would require S7 tons of coal per day for ten months in the year to convert the tubers into alcohol, and this would prove a great stimulus to coal mining. Furthermore, a number of by-products would be manu-factured that would greatly increase the payrol

Although the site for the distillery has not been definitely announced it will prob-ably go to North Bend.

WORK ON LYTLE ROAD.

More Than Twenty Miles of Track

Laid Out at Hillsboro.

HILLSBORO, Or., Oct. 21.--(Special.)--Thirty-six head of work horses arrived here yesterday from Eastern Oregon, con-signed to the Pacific Railway & Navigation Company, and the outfit will tomor row start overland for Tillamook, to be used as a nucleus for a grading camp on the Tillamook end of the Lytie line, which already has 20 miles of track laid out of this city. The horses and camp equipment will go

to Tillamook over the Wilson River road, and it will take three days to make the trip, owing to the muddy condition of the mountain highway.

Four carloads of steel arrived here the last of the week for further extension of the line beyond Buxton out of this place. General Manager C. E. Lottle now has over 225 men at work between Hilleboro and the front, and the first tunnel, beyond Buxton, has been opened. Tunnel work will be prosecuted all Win-

ter, and there will be over a half-mile in this classification. By midsummer the Washington County end of the railroad will have been built into the Nehalem country.

MONMOUTH NORMAL'S WORK

Midycar Graduating Class Will Be

Largest in Its History.

Determining the equipped with a complete line of the latest and best wook working machinery, obtainable. More than 100,000 feet of timber will be used in the construction of the building. The material is all on the ground and work will be rushed as fast as possible to provide room for machinery now on the way and due to arrive within ten days.
The completion of this plant will give wallows every facility for the economical manufacture and shipment of lumber and iumber products. The company has surveys completed, right of way secured, and much preliminary work done on its power to the line to a 35-inch turbing a barrel flume 2390 feet in length and special methods of the school, as worker will be conducted through a barrel flume 2390 feet in length and substantial character, and will develop about 290 horsepower. Which can be increased at small expense to 399 horsepower.
The machinery will be operated temport of completed temports of the second and up of essional books have been ordered for the linery. The executive commutities to the symmatium.
