

HEYBURN'S SPEARS ARE ALL IGNORED

Four More Great Forest Reserves Created in Idaho Mountains.

AREA IS 7,406,556 ACRES

Great Slice Taken Out of Heyburn's Home Counties in North by the President's Proclamation—All Resources May Be Used.

OREGONIAN NEWS BUREAU, WASHINGTON, Nov. 8.—President Roosevelt, before leaving for Panama, signed a proclamation creating four new forest reserves in Idaho, and enlarging two others, adding to the reserve area of the state 7,406,556 acres.

The Shoshone reserve is created in conjunction with the Coeur d'Alene reserve, adjoining it on the north, and two others to be known as the Coeur d'Alene reserve, their aggregate area is 2,520,000 acres.

The Shoshone reserve is created in conjunction with the Coeur d'Alene reserve, adjoining it on the north, and two others to be known as the Coeur d'Alene reserve, their aggregate area is 2,520,000 acres.

The Lemhi reserve, next in size, embraces 1,965,400 acres in Lemhi and Custer counties. This reserve consists of three narrow strips of land running northwest and southeast adjoining the Montana boundary.

In extreme Northeastern Idaho, on the British Columbia and Montana lines, 185,240 acres have been reserved, forming but a small segment of the larger Kootenai reserve in Montana.

The Salmon River reserve in Lemhi and Custer counties embraces 2,301,120 acres. It comprises a solid block of mountainous country lying between the Salmon River and the middle fork of the Salmon river.

In Cassia and Oneida counties 291,976 acres have been set apart as the Hart River reserve, embracing many tributaries of Hart river and Deep creek.

ONE FIGHT WOULD FINISH ALL Crozier Points Out Danger to Coast Defense Guns.

WASHINGTON, Nov. 8.—That the 12-inch gun now in use at most of the Coast fortifications of the United States would not last through an engagement of two hours, the period that would elapse from the time the leading vessel of a fleet would come within range until the last vessel would pass beyond the range of the guns, is the statement of Brigadier-General William Crozier, Chief of Ordnance, whose annual report was made public at the War Department today.

General Crozier thinks that it is of the utmost importance that some method be devised whereby the necessary gunpowder can be secured with less expense than that involved in using the very high velocities of projectiles now employed, with the accompanying rapid wearing away of the rifling in such a manner as to destroy the accuracy of the gun after a few rounds.

The 12-inch gun will last for about 60 rounds and, as the gun is capable of firing for a considerable interval at the rate of 40 rounds per hour, it can be seen that the limit of the life of this gun could be reached in less than an hour and a half.

Consulate Opened at Mukden. MUKDEN, Manchuria, Nov. 8.—The American Consul-General's office has been opened here.

Policyholders Appeal to Secretary. WASHINGTON, Nov. 8.—The policyholders of San Francisco today appealed to the State Department to aid them in forcing a settlement with three German insurance companies and one Austrian company that refused to pay for any of the property destroyed by fire and earthquake, which damages aggregated about \$11,000,000.

Penalty for Car Thieves. CHICAGO, Nov. 8.—A meeting of the big Central and Western railroads which own most of the freight cars of the country, is being held in Chicago today for the purpose of raising the per diem now charged by them for the use of freight cars when on the rails of roads other than their own.

Distant Club Windows Broken. CHICAGO, Nov. 8.—A small powder magazine owned by the I. B. DuPont Company at Hanley Park, 30 miles distant, exploded today, killing one man and breaking windows of the Midlothian Club, three miles distant.
