Consort of Traveling Palmist Then Commits Suicide.

TOLEDO, O. Nov. 25—Mr. and Mrs. James Ecott Mitchell, of Salem, Mass. were found dead in bed in a rooming-house at Believue, east of here, this morning. When their room was entered a strong odor of formaldehyde gas was noticed. Coroner Vermilya rendered a verdict of double suicide. Later investigation, however, revealed facts which it is said tend to show that Mitchell drugged his wife and caused her death and then committed suicide by the same means. They had been traveling together for several years, the woman as # palmist known under the name of Oille Courtland. No cause for the tragedy is known.

Leoncavallo Says the Charges Against Tenor Are False,

It is what you Americans would call bosh, rot and nonsense, these charges that are made against Signor Caruso in New York," remarked Ruggero Leoncavallo, the great Italian composer, at the Portland Hotel last night through his interpreter and private secretary, G. CANADIAN TRADE AFFECTED

Reason for Raise in Mail Rates on American Periodicals.

Department will be guided by Congres-sional legislation in dealing with the is-sue raised by the Canadian Government in abrogating the provision of the postal convention between the two countries relating to second-class matter, which, according to Canada's notice, will expire May 7, 1907. The provision permits the transmission through the mails of periodical publications, which include newspa-pers, at the rate of one cent a pound. A joint commission of the Sensie and the House, of which Sensitor Penrose is chairman has been engaged since Octo-ber 1 in taking testimony covering the whole subject of second-class mail matter and as an outcome of the inquiry the general expectation is that some legisla-tion will be enacted. If no legislation be enacted, then the two Governments will fall back on the International Union post-al rates, when the provision in the existing treaty expires, unless in the meantime Canada shall come forward with a new proposal for the consideration of this government. The International postal ates on second-class matter is one cent

For some time past the Canadian government has found fault with the con-struction placed on some classes of sec-ond-class mail matter by this Government, when it came to the matter of its application for transmission through Ca-nadian territory. Probably 100 different periodicals which are transmitted through the United States mails at second-class rates have been denied similar privileges the Canadian mall service, although

ome of them were subsequently restored the privilege. American periodicals have enjoyed a large circulation throughout Canada which, with their attractive advertisements, it is suggested at the Postoffice Department, have worked prejudicially to the trade interests of the Canadians and to the periodicals withinhead them.

Light on Coal Land Frauds.

Not the least interesting feature of the coming session will be the reports made to Congress by the Interstate Commerce Commission, in response to instruction given at the last session. Considerable data on the manner in which trunk lines owning coal mines have crippled individual coal operators is expected in re sponse to the Tillman-Gillesple resolution much light on the coal land frauds alleged to have been perpetrated by the Union Pacific Railroad is looked for; data on railroad control of grain elevators is about due and discrimination in elevator charges will also be exposed

None of this information is likely to bring about legislation this session, but seek to secure favorable consideration will probably result in something at the opening session of the Sixtleth Congress when the information of the Interstate Commerce Commission is more complete and the weak points of the new rate law have been discovered.
