MANY CHEAP ORDERS IN

Large Quantity Secured for Shipment to London—Operations in Washington—Review of the Foreign Situation.

The hop market is gradually working toward a lower level and a little more business seems to be in sight at the reduced prices. Dealers have a good many orders on hand, but at prices still lower than those now quoted, and they believe if there is further decline, the buying, both on Eastern and English account, will be heavy.

Ed. C. Heron yesterday secured a lot of 157 casks from an Aurora grower which grade as choice at 104 cents. Mr. Heron's recent purchases in the Aurora section aggregate 960 bales, and all the hops will go to London direct. Stocks still unsold in that district amount to 1700 bales, or about 14,000 pounds.

H. L. Hart returned yesterday from Washington, where in the past three weeks he bought about 2400 bales at prices ranging from 9 to 12 1/2 cents. The hops purchased by Hart were of a fine quality and are expected to be a big factor in the London market.

The J. W. Heavey Hop Company purchased 100 bales of primes from a Lane County grower at 9 1/2 cents. The London Brokers' Journal, in a long review of the European market, shows that the brewers of that country stocked up so heavily in 1905 that they were indifferent to the short crop of last year. It was an open secret, says that paper, that several of the large brewing firms at the opening of the crop year carried 35, 40, or even 45 months' reserve supply.

Reviewing conditions in England, Manager & Hellen, hop factors of London, says that the London market is in a long review of the European market, shows that the brewers of that country stocked up so heavily in 1905 that they were indifferent to the short crop of last year. It was an open secret, says that paper, that several of the large brewing firms at the opening of the crop year carried 35, 40, or even 45 months' reserve supply.

HOPS MAY HAVE BEEN INJURED.

Tolk County Growers Fear Frost Caused Damage to Vines. Independence, Feb. 4.—(Special.)—Hop men are not in the best of spirits and it is not due to the prevailing prices of hops, as one would expect on first thoughts, but to the fact that the frost how far the late freeze has been instrumental in causing permanent damage to hopvines. A number of prominent growers have been asked whether there has been much damage to the vines as a result of the freeze, and while it is admitted that some damage has been done, there is some hesitancy that there is some damage, just how far it has extended will not be known until the Spring work opens up in earnest.

Several growers who had done some work before the recent heavy rains reported that they never before had been so much missing hills, and that a careful examination shows that the frost has had the better class vines and as such was subject to the unusual alternate freezing and thawing that prevailed for fully a week. It is believed that this, before the freezing weather many hopvines were overfrozen.

ADVANCE IN POTATOES CHECKED.

San Francisco Market Weakened by Large Arrivals. The advance in a potato market received somewhat of a check yesterday when advices were received from San Francisco of a weaker feeling there, due to the accumulation of rivers and Oregon of inferior grade. Large shipments are also on the way from the North, both by steamer and rail, and when these strike the Bay City markets it is feared there will be a further decline.

EGGS ARE IN STRONG DEMAND.

Receipts Very Light and Price Very Firm at 40 Cents. Eggs were generally quoted at 40 cents yesterday. Buyers did not hesitate to pay the price and were more concerned in getting a good quality than in getting a large quantity. The trade still believes there are many eggs in the country, but for some reason they do not come forward. There are no cold-storage stocks on hand and not many Eastern orders have been consequently fresh ranch eggs are at a premium.

Sweetened Prunes in Eastern Market.

Advices from New York dated January 30 say of the prune market that quotations had concessions from the general situation and the tone throughout is easy. It is possible to shade holders in some instances report a shade more interest from the 7 1/2 to 7 3/4 in 25-pound boxes on cases, though most holders quote the outside figure. The New York market continues steady, but held very firm, owing to the small available supply. Lark was quoted at 22 1/2 to 23 1/2, and 24 1/2 to 25 1/2, and 26 1/2 to 27 1/2, and 28 1/2 to 29 1/2, and 30 1/2 to 31 1/2, and 32 1/2 to 33 1/2, and 34 1/2 to 35 1/2, and 36 1/2 to 37 1/2, and 38
