were given with a dramatic power that aroused the audience to great enthusiasm and were sung with the brilliancy of a Caruso. In other passages Mr. Alexander's voice was limpid and soft, and his notes were of amber. It is seldom one hears any-thing more beautiful than the Schu-mann "Dichterliebe," when it, is well done, and it is also seldom one hears it as well done as it was by Alexander. A feature of this recital quite as

notable as the Alexander tenor was the Alexander accompaniments. They were exquisitely played and the poetle Von Fielitz music and the glorious Schu-mann melodies were one with the voice. In the "Moonlight" of the Eli-and cycle one heard the brook rip-pling by, to the song of "Roses" the fragrance of the flowers was there. There was a wall to the "Silent Woe" which another than a genius could not which another than a genius could not have produced by mere playing, and in the concluding "Resignation" the words of the song were unnecessary to express the composer's idea when
