Senator Bourne is urging the Depart-ment to locate the laboratory at Portland, but before this can be done Portland must convince the Department that its food imports exceed those of Seattle, or else offer advantages in the way of quarters that cannot be obtained at Seattle. The Department desires to locate the labor-atory in a public building. It is of the greatest importance to Port-

land to make a creditable showing, for if the laboratoy is located there rather than at Seattle, it will have a tendency to increase importations of food products at that port, where they can be properly examined, rather than at other ports where there would necessarily be delay.
