PETER GRANT TALKS

Gives Story of Failure of Sullivan Trust Company.

WILL SOON PAY ALL DEBTS

Affairs Were Honestly Conducted, as Examination of Books Will Show. Development of Mines Not Interrupted by Crash

ASTORIA, Or., March 5 .- (Special.)-Peter Grant, treasurer of the L. M. Sullivan Trust Company, of Goldfield.
Nev., was in the city yesterday visiting
his mother, and left this morning for
Portland en route to his home. Mr.
Grant takes a very hopeful view of
affairs of his company, and believes
that within a short time all the debts
will be cancelled and a good surplus
left. In speaking of the matter this
evening he said:

"The L. M. Sullivan Trust Company is in much better condition than many people imagine. Why. T. B. Rickey, president of the State Bank & Trust Company of Nevada, who is one of the board in charge of our company's affinite, and who is also the richest man in Nevada, says that, with proper management, the entire indebtedness can be puld and leave a balance of not KATHERINE BOMES. be paid and leave a balance of not less than \$1,000,000 for the stockhold-ers. Our company's indebtedness amounts to in the neighborhood of \$500.000, and at the time of the crash we had securities and properties worth not less than \$5,000,000, but so soon as the confidence of the public was shak-en, down went the values with a rush. Arrangements have been made, how-ever, so that the company is transact-ing business as usual, and in the de-velopment of the mines excellent re-

welopment of the mines excellent remults are being attained.

"As to the cause of the failure of
the company, it must be laid to poor
management, or perhaps a mistaken
policy. It was certainly not dishonsury, for, had it been, we could never
have effected so satisfactory an arrangement with the creditors after
they had examined the books.

"The Sullivan Trust Company was
incorporated with a capital stock of
\$250,000, every deliar of which was
paid up. G. G. Rice was the manager

\$250,000, every dellar of which was paid up. G. G. Rice was the manager of the husiness, and he directed its every detail. The company purchased a number of mines, floated the stock and began development work. The business we handled was enormous, and the mines we were developing were showing excellent prospects Just how much money we handled I do not know, and could not estimate without referring could not estimate without referring to the books, but it ran well into the millions of dellars, and we must have paid out more than we took in or the paid out more than we took in or the trouble would not have arisen. Now to show what caused our financial difficulties, our company made a rule that there should never be a time when our stocks were not salable. That is, if a purchaser of any of our stock wisned to dispose of it, the company would buy it in at the ruling market price, and every stock was kept as high or higher than it was first listed. Thus, when we sold the stock in a mine the when we sold the stock in a mine the profits were placed in a pool to stand behind all the stocks we were han-ding. All went well until the miners' strike commenced. This resulted in a strike commenced. This resulted in a big slump in the market, and in an effort to keep the price of our stocks up Mr. Rice invested fully \$400,000 of the company's funds, all the cash it had on hand. Had we had another million dolhand. Had we had another million dol-lars to work with, the plan would have been a success; but as it was he over-reached the limit before the slump in prices was stopped, and the crash came. "It was the fact that the failure re-sulted from an effort of this kind that rendered it easy to effect a settlement with our creditors. I have just returned from San Francisco where I met all the creditors of the company. They are the creditors of the company. They are the State Bank & Trust Company of which Mr. Rickey is president, a few brokers in San Francisco, Sait Lake and Nevada. After they had made a thorough exami-nation of the books we reached an agreeent without resorting to the courts. In fact, each creditor signed an agreement not to take the difficulty into the courts.
Under this agreement Mr. Sullivan, Mr.
Rice and myself retire from all active connection with the management of the connection with the management of the company, which is turned over to a commission with Alex Russell as manager. The other members of the commission are Mr. Rickey, James A. Pollack, of San Francisco, Charles A. Hudson, of San Francisco, and W. H. Moise, of Sait Lake. This commission holds all the company's assets in trust and as it realizes on them to per cent is to be paid to the State Bank & Trust Company, to per cent ie the brokers, who are crediper cent to the brokers, who are credi-tors, and 16 per cent to the L. M. Suili-van Trust Company. This arrangement permitted the company to proceed with the transaction of business and under it on excellent showing is being made. Since the commission has been handling the business a rich strike has been made in the Eagle Nest mine, a hoist has been placed in the Lou Dilion, which is de-

"How long it will require to straighten up the affairs of the company is of course a matter of speculation, but the indications are that it will not be many months. In the meantime I am giving my attention to a number of mining in-terests which I own outside those beld by

Four weeks ago, on Saturday fore-noon, February 9, young Olson and two ompanions, all members of the High School, went in a boat for a day's hunting and pleasure. Arriving at Hogulam the two companions of Olson went uptown for a stroil, leaving Olson in charge! of the heat, which had been drawn up on the bank of the Henniam River. Olson was on the dock when the two other boys started, but he was nowhere to be seen when they returned, nor has anything when they returned, nor has anything been heard of him since. Down Stairs.'

BOISE, Idaho, March 8.—(Special.)— Though the hour set for the Legislature to adjourn was 1 o'clock this afternoon, the gavel did not drop for the last time until 7:20 o'clock. The clocks were stopped at 1 o'clock, but the work went on. There was an immense amount of business to be cleared and the clerks could

not get through with it sooner.

A very sensational incident occurred in the Senate during the morning session. Senator John W. Hart, of Fremont County. expressing contempt for the Governor in a manner that astounded everybody. It came about over an anti-pass bill that had been reposing with the state affairs had been reposing with the state affairs committee ever since a similar bill from the House had been defeated in the Senate. They moved that the committee be discharged from further consideration of the measure. The motion was defeated by a vote of 8 to 10. Then Hart arose with passion in his face, and taking the bill from his pocket, tore it to pieces. He said:

There is the bill, and there is the report on it. That is what I think of it. You may send a messenger to the man down stairs, who has been trying to run this session and tell him what I think

of him and his bill."

A little later on a motion was made to reconsider the vote by which the House bill had been passed, prohibiting appointment of members of the Legislature to offices which they had assisted in creat-ing. The member making the motion said he thought it was not fair to the Govmor to pass such a bill during the clos-g hours. Hart arose and said: "I move to lay that motion on the tible. Further, I wish it understood that

made this motion to further show my outempt for the man down stairs."
His motion carried.
There were no important bills discussed during the closing day, though a num-ber of minor measures got through. The statement that the employers' liability bill passed was an error. It went to conference, where it died. The test oath bill also died in conference. In all, 172 bills were sent to the Governor.
