AFTER DATA ON INITIATIVE

Massachusetts Institution Sends Here for Information.

SALEM, Or., March 22—(Special.)— Professor George H. Haynes, instructor in political science in Worcester Poly-technic Institute, of Worcester, Mass, has written an important letter to Scoretary of State Benson, which has been made public today. It reads:

I am interested in getting data as to the working of the Oregon initiative and referendum. A stock argument against such modes of legislation here in the East is that it puts questions to decisions of majorities who knew little of real issues involved. There is no riste. American or foreign, which has taken such pains as has Oregon to avoid this by giving each voter ample opportunity to inform himself as to the matters to be voted upon. At least, so it matters to be voted upon. At least, so I judge from the reading of the law.
Secretary Benson will furnish full data and other information asked by Profes-sor Haynes, which is to be used by the classes in debating direct legislation.

"If it is true the National Government anticipates any such action, it could not be done without the State Legislature first receiving a proposal of this kind from the Government, which, if they approved it, then a special session of Congress might be called, and action taken. If the State Railroad Commissions should be taken over by the National Government, every state should have at least one commissioner whose power would be one commissioner whose power would be one commissioner wasse power want he absolute and final.
