TROUBLE FOR THE BARBERS

Recent Decision of Judge Snell Upsets Regulations of the Unions.

TACOMA, Wash., April 16.—(Special.)— The State Beard of Barbers will appeal from Judge Snell's decision declaring the state barbering law unconstitutional,

It alleges that two similar cases have been appealed with a result favorable to the Board's contention, but examina-tion of the cases appealed does not bear out the assumption that they are vitalout the assumption that they are vitally similar to the Walker case.

One of Tacoma's prominent boss barbers said today:
"Anybody with any common sense would know that that law was unconsti-

cutional, but if it had been closely ad-hered to it would have been good just the same. It was devised by the union barbors to keep out these young appren-tices who take a month's course in some barber school and then try to break into the trade

"But it isn't enforced. Of course, the fight on this Walker woman is being made just because she is a woman, and so can't be admitted into the union. Perso can't be admitted into the union, Per-sonally, a lot of us have nothing against her, but if we let her work it will be opening the way for other non-union shops, and then where will the union he? This decision of Judge Snell's is go-ing to raise an awful row with the head men."

HOME PRESCRIPTION

Speediest Relief Known to Science for Coughs, Colds and Consumption .

This home prescription has been fa miliar to druggists for years. Its wonderful effectiveness on coughs, colds and all affections of the bronchial tubes and mimonary organs spread its fame from city to city with rapidly increasing popularity.

Inquiry into the origin of this prescription develops the fact that it emanated from a prominent Philadelphia physician, who gained fame amongst his profession for the development of a truly soluble preparation from the active principle of the pine tree, which although known to contain wonderful curative powers or the mucous membrane, yet was not generally used by doctors on account of its

erally used by doctors on account of its insolubility. This new form of pine is known to doctors and druggists as the concentrated oil of pine, and it forms the chief ingredient in the famous "Home Prescription," which is here given to the public and is as follows:

Concentrated oil of pine, half ounce; pure whiskey (spirits frumenti) eight ounces, glycerine, two ounces. Mix and shake thoroughly and take a tablespoonful every four hours. This will frequently cure a cold inside of 24 hours.

These ingredients can be secured at any good drugstore, and can be easily mixed at home in a ten-ounce bottle. The concentrated oil of pine comes put up for dispensing in half-ounce vials securely scaled in a screw-top package which retains all the original ozone. It should be borne in mind, however, that there are patent medicines put up by so-called chemical companies to imitate the wonderful pine oil. These can be avoided by making sure to get the "Concentrated" oil of pine. It is also said to be very effective in curing lumbage and urle acid rheumatism. For this purpose it is taken raw, a few drops on sugar, night and morning. rheumatism. For this purpose it is taken raw, a few drops on sugar, night and
