Judge My Ability By My Success

I do not wish people to judge my work merely upon what I say about it. I want them to note the evidences to prove my statements correct. The proof of a physician's ability is to be found in the results he obtains, and though I am not at liberty to supply individual names of patients as references, the marks of superior skill and service are so prominent and conspicuous as to render my doing so unnecessary. Sixteen years of success and constant growth of practice is certainly a practical demon-stration that argues the merit of my work. Estimate for yourself my volume of practice as compared with the practice of other Western specialists. Is there the slightest probability that if unable to back up all my claims, I would have won and retained the foremost place among physicians treating men? Could I fail to cure and yet succeed as I have? Have you ever heard of promise of mine remaining unfulfilled, or of one of my patients being dissatisfied with the treatment received?
