## CONGESTION GETS **WORSE EVERY DAY**

Situation Is Now So Serious That Interests Involved Are Alarmed.

EMBARGO ON THE O. R. & N.

No Freight Will Be Moved Westward From Huntington for 72 Hours Hope to Relieve Local Conditions.

Congestion of freight in the terminal yards in this city is growing worse daily. The situation has reached such a serious state that the interests involved are becoming alarmed. Orders were issued yesterday by the officials of the Harriman
system suspending for 73 hours the movement of all westbound freight over the
O. R. & N. between Huntington and Portland. The order took effect at once, and no freight will be moved over this system west of Huntington until after Sunday. This action is taken by the company with the hope of relieving the situation in

Forthand by permitting the free and unin-terrupted movement of freight eastward, to the exclusion of all incoming freight. The transportation committee of the Chamber of Commerce held a meeting yes-terday and reviewed the situation. It was decided to appeal to the shippers, trans-fer agencies and the railroad companies to co-operate for the more expeditions movement of freight. Members of the committee declare united action is imperative on the part of all interested if a condition already alarming is to be controlled and the movement of freight is not throttled entirely.

throttled entirely.

"This matter has been carefully investigated since April I." said Joseph N. Tesi last night, "and the committee is still working to remedy matters. Owing to an increase in the congested condition of the terminal yards in this city, shippers must do everything in their power to expedite the movement of freight or the situation will become very serious. In the C. R. & N. yards at Albina there are 400 loaded cars and between 200 and 300 carloads are on the way to this city, having already passed Huntington. These 600 cars repre-sent the condition regarding the O. H. & N., and does not include cars belonging to the Northern Pacific and the Southern

The more rapid handling of this freight is imperative if a serious condition is t be averted. Irrespective of the cause leading up to the situation or speculation as to how a like eltuation can be avoide in the future, the fact remains that the condition exists and the united action of condition exists and the united action of everybody is necessary to remedy matters. Only 32 cars are being unloaded daily from the team tracks. This movement of freight should be doubled. The committee representing the Chamber of Commerce has plans in view by which it is expected to be able to hasten the work of unloading these cars. The plan proposes a systematic movement by which transfer men will be informed every morning just what cars are to be unloaded. This will greatly expedite the work and avoid much confusion that now exists. The committee also expects to adept a plan for more quickly loading

scient a plan for more quickly loading less than carload lots for shipment from this city.

"Other plans for treating with the situation will be suggested as they are devised by the committee, but in the measurement, with the assistance of shippers and transfer men, we expect to be able to meet the condition and avail a serious state of confusion that will certainly ensure without united and systematic effort."

pected rates to the various Eastern terminals will also be considered and adjusted.

A. D. Charlton, assistant general passenger agent of the Northern Pacific, denies that the Hill lines are responsible for the delay in aumouncing Exposition rates. Discussing the subject yesterday, he said:

The Hill lines are not standing in the way of east-bound rates. The naming of these rates is a matter of agreement believen all lines. These lines as yet have not been able to determine just what rates are necessary, or to what points, and the question is up for consideration by the Transconting to be held May's next, at which time undoubtedly the matter will be fully determined. As this cast-bound business does not move until after the closing of the schools in Johne the meeting referred to is ample time to determine the rates.

There are a great many things to be considered in connection with such matter, such as dates of saic.
