Commander Fullam Threatens to Seize Telegraph Lines.

HIS TELEGRAMS DELAYED

American Naval Officer Tells President Order Must Be Preserved. Keeps Marines in Interior to Prevent Outrages.

PUERTO CORTEZ, May 7, via New Orieans, May 12.—Commander Fullam of the United States sunboat Marietta has had another unpleasant experience with Central American administrative methods. This is the tampering with his official telegrams by a Honduran commander. Commander Fullam had given orders that the American marines be withdrawn from San Pedro, one of the few interior towns to which American soldiery has been sent. On the day the troops were to leave, he learned that Manuelito Bonilla, commandant at San Pedro, has been reading his telegrams and delaying their transmission until it suited him to forward them.

ward them.

Commander Fullam wired provisional President Davita at Tegurigalpa that he hoped it would not be necessary for the Americans to take possession of the Honduran telegraph lines to maintain order. Davita replied condemning the San Pedro and later on wired

They will, however, probably be withdrawn in a few

The American Commander's view of the situation in Honduras is shown by the following extract from his letter to Commandant Bonilla:

mandant Bonilla:

"You and I very well know that many violent and outrageous acts have been perpetrated against foreigners. The time has come to protect foreign interests in Central America by demanding of officials and by holding them personally responsible for the same degree of security that is assured at all times in other civ-

Freight is pilling up at an enormous rate at all the docks here, and apparently the steamship companies have but few men to move it. The blockade is causing much inconvenience to shippers, and merchants. Transportation companies and strikers are losing thousands of dollars daily. The loss to shipping interests alone is said to aggregate \$5,000,000 thus far, while the loss in wages to the long-shoremen also runs into seven figures. According to the strike leaders, 20,000 stevedores are on strike in Manhattan. Brookiyn and Hoboken, and, considering the number of men out on strike, is remarkable for the lack of disorder. The Civic Federation, despite the rebuffs of last week, will this week renew its attempts to settle the strike by arbitration. In this connection, it is stated that Samuel Gompers, influential with workingmen generally, has been called upon to endeavor to bring about a peace conference. The strikers, it is believed, are ready to fall in line for arbitration, but they want the steamship companies to take the intitative. ate at all the docks here, and apparentthe steamship companies to take the in-

THE AMERICAN HABIT

One in Every Three Affected.

Of the 75,000,000 people in the United States, it is estimated that 25,000,000, or one in every three, is partially disabled from a broken down nervous system. America is the greatest consumer of cof-fee in the world. Can you draw the corfee in the world. Can you draw the rect inference from these two facts?

Many a person will exclaim, "Non-sense!" It is easy for any thoughtless person to jump at a conclusion that a philosopher would atudy carefully over before reaching. Think of the members of your own family. How many of them are perfectly and completely well in every respect? How many of your friends are perfectly healthy? Inquire of them and

from the brain to all parts of the body, and in some it will show in trepidation (well-known nervous condition); (well-known nervous condition); in others this is hidden, but the work goes on from day to day, until the accumulation of forces climaxes in some organic disease. It may be the kidneys become affected and Bright's disease sets up, it may be weak eyes, may he catarrh, stomach trouble, palpitation and heart failure, (which is becoming more and more noticeable among Americans.)

Somewhere, you may depend upon it

once, for the tearing down element of coffee has been eliminated, and in its place the strong rebuilding effects of the elements contained in Postum, go directly to work to rebuild the broken-down and delicate and delicate gray matter in the nerve centers and brain. The Cook Knows or should Know that his

reputation is safe when he prepares a cup of Ghirardelli's Cocoa. He may be sure that its delicious fragrance will please the most exacting guest. With his own breakfast, also

a cup of

Ghirardelli's Cocoa
