Local Trade Prepares for Advance in Prices.

MARKET IN EAST VERY FIRM

Higher Schedule of Quotations Is Looked for Any Day-Steady Trade in Produce Lines. Condition of Hop Crop.

The wholesale grocery trade is daily exsecting an advance in the sugar market. There has been no definite announces ent from the refinery centers that such will be the case, but there is a feeling in the air that prices will go up soon.

The New York market is in a very firm oxition and refined grades are constantly gaining in strength, owing to the firmness of raw sugars. The latter factor may at any time force the refiners in the East

advance their list prices. It is impossible to say what effect as Eastern advance would have on the Pacific Coast refiners, but, judging from their actions in the past six months, the trade believes they will quickly follow any higher prices quoted in the Eastern markets. The local retail trade is preparing for a possible advance by doing some heavy buying at the present time.

### EGG MARKET IS COMPLICATED. Prices Unsettled by Presence of Much Off-

TACOMA, Wash, July 12—(Special.)— Ascording to a cable from London received by a local hopdcaler this morning, there has been a favorable change in weather con-

ditions, and accordingly the outlook for an excellent crop is encouraging. The market remains the same, but a change is expected in a very short time.

There is absolutely no market for 1906 hops, the dealer declares. Prominent hopgrowers in the Valley in and about Puyaliup all express themselves as highly pleased with the hop prospects and while allup all express themselves as highly pleased with the hop prospects, and while spraying is in progress, there is but little trouble as yet with vermin. The vines are atrong and sending out strong arms, and the prospects for a fine yield are favorable, if careful spraying is continued.

### Hops in the Woodburn Section,

There will be a good crop of hops in this section, and if the weather continues good throughout July there will be no honeydew, do not make a good showing, while others look well. There has not been the proper cultivation that there should have been, some growers being somewhat discouraged on account of ruling prices. It is not ex-pected the output this year will be as large. as last year, although all the deficien will be fully made up with what is hanging over from 1906.

Mr. Cotton appeared for the railroads in the joint rate lumber hearing on June II, and again in the Spokane case which came up June 26. The first of these cases will not be argued until Fall, and in the second, Mr. Cotton says, a de-sision is not expected for several months. He declines to discuss the outcome in either case.
