Interesting Papers Are Read by Experts in Science of Imparting Knowledge-Rev. John A. Ryan's Address.

Why a Teacher Should Keep in Touch With Ec With Economic Conditions," "The Teaching of English," "Interest and Attention" and "The First Modern Schoolmaster" were among the subjects discussed at yesterday's sessions of the institute. Dr. I. Haaron said that the first modern school-master, Vitore de Feitre, who lived in the 14th century, anticipated all the best elements of modern instruction. He it was who first introduced recreation and athletic into instruction. athletics into instruction.

Dr. Hasron was followed by Miss Aphia
L. Dinick, who took for her subject "The
True Aim of the Teacher." She said the
teacher should always realize her greatest
work to be in the molding of characters
of her pupils. Dr. Hasron then spoke on
"The Principles of Method."

"We have represent protect, medicing

"We do not want any patent medicine principles in the schools," he said. "Let us do as the physicians and work out a treatment for individual cases. Some of the best teachers are those who have never heard of pedsgogical principles and the other but the case who have never heard of pedsgogical principles and the other but the case who was a supplied to the case of the case who was a supplied to the case of the theories, but they can work out and form-ulate their own ideas. There are some general principles of education, but we must be careful not to treat them as infallible maxims and be sure first that

they will work."
In speaking on "Interest and Attention" yesterday afternoon, Dr. Haaron disussed Herbartian pedagogy and the theory of appreciation. He discouraged the idea that competitive prizes are of any great value as an incentive to study on the part of pupils.

Rev. Hugh Gallagher, vice-president of Columbia University, said in regard to the teaching of English that more time should be given to English literature in

the teaching of English that more time should be given to English literature in the schools, as it is the best cultural element in the course of study.

Rev. John A. Ryan, Ph. D., of St. Louis Seminary, said that the class prejudice which arises among different classes of society enters the school life as well, and that here the first friction begins.

"The teacher," he said, "should understand the economic conditions of the country and be able to point out to the children that real worth does not consist in the amount of money or property one holds, but in the character of the individual. The children of wealthy parentage should be taught that they are no better than the children of the poorer class except as they build characters which are better, and which make for a better life."

Dr. Ryan also said that he thought a salary of more than \$4000 a year tended to work a moral and spiritual injury upon the one who received it. At the close of his address he was asked if he considered the monopoly of the labor of the country to be as dangerous as the monopoly of wealth, and if he thought it monopoly of wealth, and if he thought it would become as much of an evil, and he
