BANANAS COME IN BAD SHAPE. Shipment Received Yesterday Was Too Long in Transit.

Vesterday forenoon five cars of bananas had condition that most of the shipment was disposed of to hucksters at almost any price offered. All of the shipment was over-ripe with a small proportion fit for handling, and barely enough could be found that would The cause of the poor condition in which the fruit arrived was on account of delay in transit from New Orleans.

Sweet potatoes were in better receipt yes terday, but the demand was so brisk that price was maintained at 7c@746c per pound. Regular shipments are expected from the Merced district, California, from now on.

Peaches and cantaloupes from California that came in last Saturday were moved off rapidly yesterday, and as none arrived during the day stocks were generally run down pretty low. No change from last week's

it was said on the street that few more are to be had in that country.

SULPHUR STOCKS FOUND AMPLE.

Fears of Over-Supply Dispelled by New Circular From Washington.

There was some fear among importers of sulphur that an oversupply might be on hand at the close of the year's business on account of the action taken some time ago by the Pure Food Commission at Washington.

A circular was issued in which it was hinted thas fruit treated with sulphur in bleaching might come under the ban of the department. Large quantities of first quality sulphur are used in this industry by fruitgrowers, and importers had brought in their usual supply before the notification from the department was issued. Later on the department was issued. Later on the department made its action by announcing that aulphur might be used as heretofore, but that caution should be employed so that danger from excessive usemight be avoided.

To many people this aiarm by the department came as a surprise, as it had long been the opinion that sulphur not only is harmless but was regarded as a household remedy for generations past. In the words of an importer: Wa all remember the days of our childhood when we stood by define of resulphir rot reme time and the supply has been found to be ample for ain purposes. Prices this year are about the same as last, \$23 a ton in carlots and \$26.50 in smaller lots. The importations this season are said to be of the very best and brightest grade, which is most satisfactory to users.

USE COUNTRY BUTTER AT HOME.

USE COUNTRY BUTTER AT HOME.

USE COUNTRY BUTTER AT HOME.

Harvest Time Requires Country Stores to Hold Back Shipments.

Country creamery butter is becoming gradually in less receipt This failing off is principally accounted for by the large demand from farmers during harvest time. It is said that at times city dealers are called on during harvest to send butter to farming localities to meet requirements. This reversal of conditions is explained by the fact that zome of the heaviest graingrowers have only enough cows on their farms to furnish milk and butter for family use, without making surplus. When harvest hands are to be taken care of, it becomes necessary for the farmer to seek elsewhere for his butter. City creameries report the demand keeping up to the limit of their output and that the market is firm at the recent advance.

Dealers report ne change in the egg situation, 22c being about best, though in some isolated cases an additional hair cent is named for fancy fresh stock.

As is customary on Mondays, the receipts of poultry and fresh meats was not excessive and there was little inquiry.

The course of the trading was the further outgrowth of the tendencies developed since the speculation in the Harriman stocks was checked last week. With the perception that the leaders' tip of this group in a speculative movement was not to be forthcoming for the present, any considerable operations for an advance have been abandoned.

It was obvious also that the uncertainties of the money outlook bore heavily on septiment. The Saturday bank statement was

of the money outlook bore heavily on sentiment. The Saturday bank statement was nartly responsible with its showing of the equal pace with which credit expansions were keeping up with the reserve increase, in spite of the imminent need of the cropmoving demands.

The resumption of the gold export movement to France confirmed the expectation of the latter part of last week, but it was none the latter part of last week, but it was none the less impressive of the manifested demands for banking reserves. Still more impressive was the scramble which occurred for the \$5.700.000 of bar gold available in the Londan market. Good Weather Played Against Rust and Weak Minneapolis Market Has Better of Strong Liverpool Cables-Corn Firm.

CHICAGO, July 29.—The excellent weather sport received from the Spring wheat countoday to open weak. On the decline, commis sion houses became active bidders, because o Kansas and reports of black rust in South Dakota. This feeling sent prices up more than Ic above opening figures. Pit traders, however, continued to sell freely, because of the weakness at Minneapolis, which seemed to discredit the black rust stories. During the remainder of the session sentiment was bearish and in the last half hour the market became decidedly weak. The close was weak and the lowest of the day. September opened 1/2 to 1/3c lower at 921/2 to 921/3c, ad-vanced to 551/3c and then declined to 921/3c, where it closed. HOGS-Best, \$6.65@6.85; lights, fats and
