WORK ON PARKS HELD UP

Bonds Voted Will Not Be Sold Pending Test in Courts.

Before beginning work on the proposed new parks and boulevards, for which \$1,000,000 of bonds were voted at the June election, the members of the Park Board are patiently, awaiting a decision in the courts as to the logality of the Madiston street bridge bonds. On that decision hinges the validity of the bond issue voted for parks and boulevards. A new Madison street bridge is considered the Madison street bridge is considered the improvement that is most urgently needed and on that issue the city auth-

orities have decided to test the validity of the bonds voted last month.

Among the other departments of the city government that are especially interested as to the legality of the pending bond lasues is the Water Board. An appropriation of \$1,000,000 was voted for an additional pipe line and the laying of more pipes, and unless that sum is made available the Board will be unable to grant a majority of the petitions now on file for additional pipes and extensions of the city water service into sections of the city that are not now served. The Board does not have enough funds with which to make the many improvements that have been asked and will be obliged to expend its funds sparingly during the emainder of the year.
At its next meeting the Board will re-

ceive a statement from the City Audi-tor's office showing the unexpended bar-ance of the appropriation that was made from the city funds, based on an estimate from that department, at the beginning of the year. The larger part of that ap-propriation has already been expended.

It is not a melodrama, but a romance of Mexico, Frank DeCamp is appearing as Aguilla, the royal slave, last of the Montexumas, a role he was starred in for a number of years. The acting of Miss Eunice Murdock as the Countess is also of a high order and displays her emotional ability better than snything else she has undertake in Portland.

The annual rifle competition which ended today on the range near this place was productive of some re-markable scores. At the very last mo-ment of the shoot one of the marks-men, firing over a range of 1000 yards, piled up a score of 49 out of a possible 50. The scores speak eloquently for the efficiency of the guardsmen in shooting, which is the most important function of soldiers. Lieutenant Houck's aggregate score over all ranges, rapid and slow firing, was 268 points out of a possible 250. Close benind him was Captain Hamilin, with a total score of 255 points. Corporal Jackson had five 255 points. Corporal Jackson had five points less, or 250. Private Shields was next with 238. Shields, by the
