

STRIKE AND TRADE

First Effects Are Only Great Inconvenience.

SERIOUS LOSS MAY FOLLOW

Wheat Market, Just Opening Actively, Receives a Set-Back and Prices Suffer—Other Lines Are Not Yet Hurt.

The strike has caused considerable inconvenience to the grain and jobbing trade, and its continuance for any great length of time will mean serious loss to the business interests.

The wheat men are especially affected by the loss of wire service, and business in the new crop which was just opening up in a satisfactory manner, was almost completely knocked out in the head. Until normal conditions are restored not much progress can be made in this line. The long-distance telephone is being used as extensively as possible and telephone messages have passed back and forth between San Francisco and Portland, but until the strike of the telegraphers is ended wheat trading must necessarily be restricted.

One local wheat firm reports a result of the strike the failure of a deal by which it is out \$500, owing to the delay in the transmission of two telegrams. In this instance the loss of 20,000 bushels of wheat was involved.

Anticipating trouble in carrying on their business, the wheat exporters have reduced their limits to the following: track prices at Portland: Club, 75 cents per bushel; bluestem, 90 cents; red Russian, 75 cents; valley, 80 cents.

Wholesale grocers are handicapped in their operations by the failure of wire communication with their customers and the centers of manufacture and production. Being in the dark as to conditions in the leading Eastern and Southern markets, they are billing out goods at prices current before the strike was inaugurated.

The handlers of produce, being unable to keep in touch with shipping points, expect to face a shortage in some lines if the strike is not soon settled, as they are too low for carrying on this business with distant points. Fruit brokers are especially inconvenienced, as they depend almost wholly on the telegraph, but they are continuing their efforts to keep this market supplied and taking conditional orders.

Coming at this time of the year, the strike has no such effect on the hop trade as it would have if the trouble were to occur in October or November, when business would be at its peak. As it is, a lack of trade and crop news from the East and abroad is the only result.

HOPS PROMISE FINE QUALITY

Untroubled Reports Are Being Sent Out—Views of J. J. Metzler.

Hop men, both dealers and growers, protest against the sensational reports being made in certain quarters and most frequently through the medium of an evening paper of this city, as to the quality of the coming Oregon crop. It seems to be the wish of some people, who have not the interest of the state at heart, to do what they can to give Oregon hops a black eye. These practices have been indulged in in previous years and it is to be regretted that notice of the unfair reports has been taken occasion by the Eastern trade to the prejudice of the product of this state. Even at the present time the effect is apparent in the subsidence of the demand for crop trials or in orders made by Easterners for Oregon hops at ridiculously low prices.

The facts are that the Oregon hop crop is not in bad condition and never has been since the vines began to grow. The some isolated sections like have appeared in numbers and honeydew has collected, but the vitiation has not been general, and even in the affected districts conditions have improved. Taken as a whole the Oregon crop bids fair to be of excellent quality, no matter what the quantity may be. It is the duty of every Oregonian interested in hops to make this fact known in every way possible. Nothing can be gained by telling the world that our crop will be inferior when in reality it may turn out to be the choicest grown on American soil.

J. J. Metzler, a dealer of this city, who has had years of experience in the selling and growing of hops, believes the Oregon crop will be of excellent quality this season. Mr. Metzler has visited several sections of the state and just returned from Yamhill County, where he made a thorough inspection of many yards. He said yesterday:

"I found the crop looking much better than I expected. Some few lice were to be seen, but if the weather continues favorable we will have a fine quality. I saw no honeydew."

Mr. Metzler gives it as his opinion that the crop will be less than that of last year.

"The bottom yards," he said, "will not go 100 pounds to the acre, where last year they went 150 pounds to the acre."

"I would like to say, for the good of the Oregon growers, that if there is no change in the market in the next two weeks, it will be money in their pocket to let hops stand on the poles. At the present time buyers are picking up the hops which will simply put them into debt."

"If the hops are picked, under the conditions of the market, the most important thing is to have the work cleanly done. If the growers will only pick the best quality they will find they will get a fair price for them. The poorer hops should be left on the vines."

EGG MARKET IS ADVANCING

Prices Improve With Reduction of the Surplus.

Eggs sold in some instances at 35 cents yesterday, but 24 cents was the general quotation for fresh candied stock. Seconds, of which the supply is much reduced, sold at various prices down as low as 30 cents.

Poultry receipts continue fairly large, but the demand is satisfactory, especially for hens, though Springs are also moving well. There is some inquiry for large young ducks, but those weighing less than 3½ pounds each are not wanted. Large young ducks and turkeys also sell well.

Condition of Washington Hop Crop.

Western Washington hops will likely be of good quality this year, according to the latest issue of the Seattle Register, which says:

"While the growing hop crop is backward on Puget Sound, the quality is reported as superior to any crop so far raised. Weather conditions, dry and hot, have been very favorable to the growing season, and hops have so far been few and easily kept down. The yield of the crop is now placed at about 400,000 bushels. On the other hand, in the Yakima country,

LOSS IS REGAINED

Change of Sentiment in New York Stock Market.

ADVANCES ARE GENERAL

Low Level to Which Prices Broke on Monday Induces Liberal Buying—Bears Rush to Cover.

The following summary of the New York stock market and range of quotations is furnished by the Overbeck & Cooke Company, of this city, whose communication with New York by private wire was not interrupted by the strike:

PORTLAND QUOTATIONS.

GRAIN, FLOUR, FEED, ETC.
WHEAT—(New crop) — Club, 75c; blue stem, 80c; valley, 85c; red, 75c.
OATS—New crop, 25c; old, 26c.
