STRAIGHT SHOTS GATHER IN CAMP

Oregon Competitors Early on Ground for National Rifle Tournament.

THOUSAND CRACKS THERE

Training Makes Sharpshooters, Handful of Whom Could Fight Army_Camp Perry Puts Skill to Very Severe Test.

CAMP PERRY, Port Clinton, O., Aug 17 .- (Staff Correspondence.) -- One thousand of America's best riflemen are under canvas on the south shore of Lake Eric for participation in the National rifle tourna-ments, which are now being got under way. From Florida to Maine and from Oregon to New Mexico men who can drive a bullet straight have made the pligrimage to Camp Perry to try for a Na-tional trophy or a medal of honor. Teams from the regular Army, Marine Corps, Navy/and United States training schools and from nearly every state in the Union are here to enter the struggle for suprem-

acy.

The competition will be watched with interest, not only in the United States, but abroad. The value of the present-day soldier is determined by his ability to shoot straight. The fighting ability of Uncle Sam's regular and volunteer forces may therefore be largely judged by the marksmanship displayed during the tour-

Government Foots Bills.

The tournaments are fostered by the Government, which foots most of the bills. The various competitions are planned and conducted by the National Board for the Promotion of Rifle Practice. The benefits extend not only to those that are actively engaged on the range, but to the thousands of guards-men and regulars throughout the country, who try to win places on the vari-ous teams. It is a movement to develop a nation of sharpshooters—and since one sharpshooter is worth from five to ten ordinary shots in actual service, the value of the training is obvious. Experts de-clare that the 1009 riflemen in camp here could be pitted against a brigade success-

fully.

During the five years that the National shoots have been held interest in marksmanship has apread rapidly. The first tournament at Sea Girt, N. J., attracted comparatively few teams. The second year brought a marked increase of at-tendance, and this year the majority of the state guards are represented. Sev-eral civilian shooting organizations are

Wind Tests Men's Skill.

The Camp Perry range is in many re-spects ideal for the National tournaments It hugs the south shore of Lake Eric, several miles west from Sandusky, O., and the targets are so arranged as to give the en a northern light all day. The wind, which seems perennial, makes it necessary for marksmen to use their judgment in rating it. The sharpshooter who has found himself able to score a buliseye every shot in calm weather is apt to find bimself ridiculously low in his first few tryouts here. With a 8 o'clock wind one instant and the indicator at 8 o'clock one second later, the successful marksman must keep his wits about him every in-stant that he is on the line.

This difficult condition is regarded as al-

together desirable in official circles, in asmuch as it throws the competitors of their resources and increases their utility for active service where all manner o conditions might have to be contended with. The man who can clip a hole in an eight-inch bullseye at from 500 to 1000 yards during a gale can be depended upon to perforate the head of a foe under most any conditions. And it is for just such unhappy work that the marksman is trained, for so long as the world is tenacious of its barbarian instincts and insists upon breeding wars now and then it is well to be prepared. There is no better course of training for soldiers than to teach them to shoot.

Oregon Team at Practice.

Oregon's infantry team, one of the first to get on the ground, is ready sizer sev-eral days of preliminary work on the range, to enter the National competitions. men have become adjusted to the conditions obtaining on the Omo range In this they have had to overcome con-siderable difficulty in mastering changes of wind velocity. The breezes work 24 hours a day and change in velocity possibly a dozen times an hour. To the trick of cheating the wind in firing is no triffling feat. Thus far the Ore-gonians have piled up good scores on long and short dutant ranges as well as In slow and rapid bring. There is every indication that the team will give an ex cellent account of itself.

At Sea Girt last year the Oregon marksmen finished ahead of 22 competing rule teams of the 42 entered in the National competition. The state has an even stronger team this year and is confi-dent of making an even better showing. First place, of course, is not even thought of, although Oregon intends to finish ahead of say ω of the 45 teams entered. Adjutant-General W. E. Finzer entered. Adjutant-tieneral W. E. Billion is in command of the team, with girst were terribly to eleutenant G. E. Houch as coach. Thus badly damaged. far the team has confined as preliminary work to skirmish runs, making a team average of 70 out of a possible 100. The Washington team is camped a short distance from the Oregon cam

and the Montana delegation is near at hand. A Camornia team is expected shortly. The states that already have their teams in the field are New York, New Jersey, Pennsylvania, Delaware, Maryland, North Carolina, Georgia, New Hampshire, Vermont, Massachusetts, IIlinois, Colorado and Oklahoma. Additions to the list are being made daily. The regular service teams are all nere and in-clude representations from the cavalry, infantry, navy, marine corps, West coint

Sounds Like Real Battle.

From now until well along into Septem ber the Camp Perry range will be a battlefield, so far as sounds are con-cerned. From the opening of the range at 7 A. M. until nearly dark an incessan rifle fire is being kept up. Every shot fired costs an average of four cents and a fraction, so that the cost to the Gov-ernment runs into thousands of dollars per day for ammunition alone. The men engaged in the shoot receive regular army pay, which falls far short of meet-ing their expenses, so that it is neces-sary for the riflemen to make considerable sacrifice in attending the tourns

and slow firing and a ekirmish run. Members of the team are also planning Mombers of the team are also planning to participate in the National individual match and in the pistol match. The officers of the team will declar shortly just what contests to enter of the scores that will be held.

Plague's Ravages in India Call Forth Message From King.

LONDON, Aug. 18 .- (Special Cable Dispatch to the New York Sun.)-The buhonic plague in India, statistics of which have from time to time been printed by the Sun, bas reached such a pitch that although the most extreme efforts have been made to cope with the disease, King Edward has written to the Viceroy a leter which is made public today. It says: "My Dear Viceroy: I have followed with anxious interest the later course of that epidemic by which India for 11 years past has been so sorely afflicted. The welfare of my Indian subjects must ever be to

me an object of high concern, and I am deeply moved when I think of the misery that has been borne with such silent pa-tience in all those stricken homes. "I am well aware how unremitting have been the efforts of your excellency's pre-decessors and yourself to make out the causes of the pestilence and mitigate its

"It is my earnest hope and prayer that the further measures now being prepared by your excellency in consultation with zealous and able officers may be crowned with merciful success. I desire that you communicate this expression of my heart-felt sympathy to my Indian subjects. Believe me, sincerely yours.
"EDWARD R. L"

The figures of the plague mortality, as given in the latest blue book, are appalling. From \$2,800 deaths in 1900, the deaths had grown in 1904 to 1,143,900. In 1905 there was a decrease to 1,069,100, but the present year, it is feared, will show record proportions. In the first three and a half months of 1907 there were 495,000 deaths recorded. The total recorded deaths from 1809 to 1905 were

UNITE FOR LABOR PEACE

Van Cleave Starts Movement to Combine All Employers.

NEW YORK, Aug. 19 .- Delegates from various manufacturing and employers' associations met here today and discussed the proposition to form a National federation which shall have for its pur-pose the furtherance of peace in the industrial world by combining the efforts of dustrial world by combining the efforts of all the employing interests. The meeting, which was held behind closed doors, at the Waldorf-Astoria, was presided over by James W. Van Cleave, of St. Louis, president of the National Association of Manufacturers. After a general discus-sion of the proposition, it was decided to adjourn in order to permit the delegates to return to their homes and consult with the organizations which they represent the organizations which they represent regarding the projected National federa-

The meeting today was called by the National Association of Manufacturers, which met here last May, Mr. Van Cleave said today's meeting was called to form an organization which would en-deavor to "institute an educational campaign, which would endeavor to promote

ndustrial peace and mutual goodwill be-tween employers and employed." He said that the organization did not propose to crush labor unions. Officers of the National Association of Manufac-turers hope to induce the new federation to incorporate the platform of the manu facturers' association, which, in part, stands for the open shop, no limitation of output, no boycott and no sympathetic

HARRIMAN FOOLS NEWPORT

Lets Steward Take High Dive Soclety Wants to See.

NEWPORT, Aug. 16.-All Newport, or at least the curious part of it, sat up until 6 o'clock this morning on the strength of a statement that Edward H. Harriman was going to do a high dive for his nerves from the main truck of his eacht, the Sultana, which arrived yester

aunches with muffled engines, and all kinds of spyglasses were out. Suddenly there was a splash and the boats began circling about a figure in

"Where is Mr. Harriman?" shouted a

man with a megaphone.

"He's not aboard, sir," came back in a gurgling answer. "And who are you?" Insisted the mega-

came straight and true; 'but I'm a goner If you people don't get back and give me a chance to get on deck again." Mr. Harriman is just now in California, but Newport doesn't min- -at; it saw a steward take an early morning plunge.

BODIES TORN TO PIECES Six Men Killed by Boiler Explosion

NEW YORK, Aug. 23 .- Six men who were testing the boiler of a donkey engine on the coal barge Patterson were instantly killed, the boiler ex-The dead include Captain Hopkins and Engineer Gibbons, both

MILLIONS DIE BY BUBONIC All Phases of Irrigation on Sacramento List.

LEADERS OF THOUGHT TALK

Conservation of All Natural Resources of West Keynote of National Irrigation Congress. Important Speakers.

SACRAMENTO, Cal., Aug. 22. - The programme of set speeches and prepared papers at the Fifteenth National Irrigation Congress will be the broadest in scope of any convention ever held in the United States for the purpose of promoting the public welfare. Conservation of resources will be the keynote and the programme will include addresses by representabe the keynote and the programme will include addresses by representatives of all of the great National organizations which seek to promote conservation and development along broad and National lines. The Irrigation Congress has long been a forestry congress, because of the close connection which exists between the preservation of the forests and the use of water so conserved for irrigation. It is now recognized that there is a community of interest between irrigation and drainage, between irrigation and deep water transportation and between irrigation and all of the great deep water transportation and be-tween irrigation and all of the great industries which are or may be de-veloped in the territory adjacent to the

Irrigable land.

The programme of the Sacramento Irrigation Congress, which is now nearly complete, will include addresses by the president or other distinguished representatives of the National Drainage Association, the National Rivers and Harbors Congress, the American Forestry Association, the American Mining Congress and the Trans-Mississippi Commercial Congress. Hon. Mining Congress and the Trans-Mississippi Commercial Congress. Hon. George E. Barstow, of Barstow, Texas, president of the Drainage Congress, will deliver an address. The Rivers and Harbors Congress will be represented by John A. Fox., of Cincinnati, O., special director; the American Mining Congress will be represented by J. J. Calibreath, of Denver, Col.; the Trans-Mississippi Congress by President H. D. Loveland, of San Francisco.

Many Prominent Men Speak.

The programme will be divided into sessions, each of which will be devoted in the main to the discussion of some particular subject. The first day's session will open at 1:30 P. M., and will be devoted to addresses of welcome and responses and to speeches by distinguished visitors. The feature of this session will be the number of men of prominence who will be in attendance. Probably never before on a Western programme have there been assembled so many men prominently identified with the affairs of the Na-tion and of the respective states. The Vice-President of the United States will deliver an address on this day. Governor Chamberlain, of Oregon, president of the National Irrigation Congress, will deliver his address

will be made by visiting Governors.

Those who have, up to this time, responded favorably to invitations to deliver responses are Governors Albert E. Mead, of Washington: John C. Cutler, of Utah; Joseph H. Kibbey, of Ari-zona. Among others whose presence is confidently expected and who no doubt will be glad to respond are Gov-ernors John Sparks, of Nevada; Gov-ernor Gooding, of Idaho; Governor Toole, of Montana; Governor Buchtel, of Colorado; Governor Hoch, of Kansas, and Governor R. B. Glenn,

Conservation of Resources.

The second day of the session will he "conservation day," and will be de-voted to discussion along very broad lines of subjects relating to the con-servation of natural resources and especially to governmental action, Na-tional and state, designed to accom-plish such conservation and develor plish such conservation and develop-ment. One of the principal addresses of this day will be by United States Senator Francis G. Newlands, of Nevada, who will speak of the work of the Inland Waterways Commission. This Commission was lately appointed by President Roosevelt to work out and report to him a plan for correlat-ing and extending the work of the National Government with reference to the navigable streams of the country. Its appointment is considered one of the most important acts of President Roosevelt's administration, it being regarded as a step in the di-rection of much greater Governmental activity on behalf of the waterways and watersheds of the country. Hon. Gifford Pinchot, United States Forester sifford Pinenor, United States closest and one of the President's closest friends, will deliver an address of friends, will deliver an address." Dr. J. "Conservation of Resources." Dr. J.
W. McGee, also a member of the Inland Waterways Commission, will deliver an address onl "Conservation of liver an address onl "Conservation of Soil Resources." Professor J. H. Holmes, of the United States Department of the Interior, will talk on "Conservation of Mineral Resources." M. O. Leighton, Chief Hydrographer of the United States Department of the Interior, will talk on "Conservation of Water Resources of the Country." Dr. H. Fosier Bain, Director of the Geological Survey of Illinois, will talk of "State Conservation Effort." Ex-Governor George C. Pardee, of California. ernor George C. Pardee, of California, who was twice president of the Irri-gation Congress, will deliver an ad-dress upon the "Forest Reserve Policy of the National Government."

Many Talks on Forestry.

Other days of the session will be devoted respectively to forestry, practi-cal irrigation and practical irrigated agriculture, to settlement and other elated questions.

The forestry session will be uncom-monly interesting and valuable. The work of the United States Forest Service will be presented by Hon. A. F. Potter, Chief Inspector of Grazing, and by Charles H. Shinn, Supervisor of the Sierra Reserve, of California. "State Forest Laws and Administration," will be discussed by F. William Rane, State Forester of Massachusetts, Addresses on the proposed Appalachian and White Mountain forest reserve will be delivered by Governor R. B. Glenn, of North Carolina, and Congressman Frank D. Currier, of New Hampshire. E. A. Sterling, formerly of the United States Forest Service, now chief for-ester of the Pennsylvania Railway Company, will tell of the forestry worl now being carried on by that great railway corporation in the mountain districts of the Eastern States. Francis Cuttle, of Riverside, will tell of in 3000.

the reforestration work now in prog-ress in Southern California under the direction of an association which has for its object the increase of the water

supply of that territory.

A feature of the forestry session will be the participation therein of Hon. R. H. Campbell, of Ottawa, Canada, who is in charge of the forestry branch of the Dominion of Canada. Mr. Campbell is now on his way to California for the purpose of delivering an address before the con-vention upon the work of his government.

Work of Reclamation.

Hon. F. H. Newell, Director of the United States Reclamation Service, will deliver an evening lecture, illustrated by stereoptican views, on the work of the Reclamation Service. This will be one of the most interesting of the sessions, for Mr. Newell will tell of the greatest engineering work ever undertaken by any government in the world, and will show in picture how this work is being carried on. Hon. Morris Blen, head of the Legal
Department of the United States Reclamation Service, will speak at the same
time on the subject of the "Community
Idea in the Reclamation Act."

United States Senator Reed Smoot of

Utah will deliver an address on "Irriga-tion by private Enterprise." There will also be an address on "Irrigation Under the Carey Act" and one on "National Irrigation Methods." "Practical Irrigation Methods." be discussed by Dr. Elwood Mead, Chief of Irrigation and Drainage Investigations, United States Department of Agriculture, and Professor Samuel Fortier, Irrigation, engineer, University of of Agriculture, and Professor Samuel Fortier, irrigation engineer, University of

The work of the Department of Agaicul-ure will be represented by Willet M. ture will be represented by Willet M. Hayes, Assistant Secretary of the Department, Dr. A. C. True. Director Experiment Stations, and by Dr. Albert F. Woods, Assistant Chief, Bureau of Plant

Father of Carey Act.

Among the most important discussions will be that on the legal questions in-volved in the reclamation and settlement of the arid lands. The feature of this discussison will be an address by ex-Senator J. M. Carey, of Cheyenne, Wyo., author of the Carey act and leading authority on the subject of the land laws of the country. L. L. Dennett, attorney for the Turlock irrigation district, of Modesto, Cal., will tell of the workings of the California district law, known locally as the Wright act and as the Bridgeford act.

"The Water-Users' Association" will be discussed by Jos. H. Kibbey, Governor of Arizona. Mr. Kibbey has been, since its organization, the attorney for the Salt River Valley Water-Users' Association. This was the first organization under the National reclamation act and it has made and solved, it is believed, all of the problems which confront the Water-Users' Association, which seeks to co-operate with the Reclamation Servi is under the provisions of the National reclamation act. Mr. Kibbey is the leading authority in this country on the subject which he will discuss and his address will be one of the most valuable of the entire pro-

Settlement problems will be discussed by William K. McAllister, agent of the Southern Pacific Company, Denver, Colo.; by C. M. Mott, general immigration agent of the Northern Pacific Company, of St. Paul, Minn., and by M. J. Costello, general industrial agent of the Great Northern Railway, of St. Paul, Minn. These gentlemen have had many years' exper-lence in the settlement of Western land and they are leading authorities on the question of how to bring together "the landless man and the manless land."

Many Congressmen There.

The Congress of the United States will be represented by many members, all of whom are expected to participate president of the National Irrigation Congress, will deliver his address which, by reason of his leadership and his abilities, will be one of the great speeches of the congress. Addresses of welcome and similar speeches will be made by Governor James N. Gillet, of California; United States Senator Perkins, of California; Mayor M. R. Beard, of Sacramento; Dr. Benjamin Ide Wheeler, president of the University of California, and Hon. Arthur R. Briggs, president of the California State Board of Trade.

Responses to addresses of welcome Gronna, of North Dakota: James M. Miller, of Kansas; Charles N. Pray, of Montana, and George Bartlett, of Nevada.

A feature of the programme that will delegates will be the large proportion of the time that will be devoted to colunteer discussion. Fully half of the sessions will be taken up with three

and five-minute talks and open discussion on the floor of the congress.

The programme as above outlined is declared by the congress managemen to be the broadest in scope and the greatest in its possibilities for good that has even been arranged for any that has even been arranged for any convention in this country. When Sec-ertary Garfield was in Sacramento a short time ago, the members of his party who visited the Irriagtion Con-gress headquarters and learned of the plans for the programme were enthus-

CALLS JUSTICE HYSTERIA

New Yorker Says Railroad Agitation

Will Kill Liberty.

DETROIT, Aug. 23. - W. J. Pauli, of Seattle, addressed the American Institute of Banking convention on "What China's Awakening Means to the United States." Milton L. Wycks, of New York, discussed the efforts of so-called hysterical legislation. He said the present efforts to restrain the profits of railroads will make consti-tutional liberty a hollow mockery unless the Supreme Court Intervenes to

Fogarty's Verdict Set Aside.

SAN FRANCISCO, Aug. 23.-Errors n the part of the trial court are ason the part of the trial court are as-signed as reasons by the Supreme Court for reversing the judgment which was given Thomas Fogarty in his suit for damages against the Southern Pa-cific. Fogarty was a car-repairer in cific. Fogarty was a car-repairer in the employ of the company and, while at work, sustained the loss of both of his legs. He sued for damages and was given a verdict for \$50,000. This was later reduced to \$40,000. The railroad people appealed and were today granted a new trial. The judgment was the largest ever assigned in a damage suit for personal injuries in the history of the courts. The accident occurred at Los Angeles.

Fire Checked by Change of Wind.

CINCINNATI, Aug. 23 .- A shift in the fire which started in the Eagle white lead plant last night. The flames were controlled after burning five hours and destroying \$753,000 worth of property. Nearly everything in the irregular block bounded by Broadway, Court and Hunt streets and the Norfolk & Waster railway tracks was destroyed. Western raliway tracks was destroyed. The largest loss is Kroger Grocery Company's warehouse, from which 80 retail stores are served. The company's oss is \$350,000.
Other losses vary from \$100,000 to minor losses by groceries, saloons, oc-cupants and tenants.

Amnesty to All but Murderers.

BUCHAREST, Aug. 23. - King Charles has granted amnesty to all implicated in the recent agrarian revolt, with the excep-tion of 200 priests and those already sentenced for murder. The number released
