MUST STOP SALE OF VILE CARDS

Authorities Decide to Keep Up Vigorous Prosecutions Until Evil Ends.

FOUR COMPLAINTS MADE

Exposure Is Followed by Prompt Action on Part of Police and the District Attorney's Office in Order to Stop Violations.

Complaints were issued yesterday by Deputy District Attorney Haney in four cases against violators of the law pro-hibiting the exposure and sale of imhisting the exposure and sale of immodest and indecent pictures. The compiaints were sworn to by Patrick J. Maher, detective for the District Attorney's office, who had gathered the evidence in the shape of mailing cards, upon which are printed pictures that would bar the cards from the mails. The use of the wards 'spost card' on the face of the wards is said to be simply a subterof the wards post card in the late of the cards is said to be simply a subter-fuge to deceive purchasers, as it is well known the postal regulations forbid the handling of indecent pictures or writings. Dealers, therefore, in case any question is raised by a purchaser concerning the legality of having these pictures in his possession may turn to the address side and show the lines where an address is to be written, leaving the inference that the cards are not pronounced unmallable by the Government and must be within

the exceptions of the law.

The four complaints signed yesterday were against A. A. Wise, Sixth and Stark; Samuel L Beary, Marquam building; John Fisher, 52½ N, Sixth street and Vald Latell, 50 North Sixth street. The fact that Wise was found guilty of the same offense yesterday in the Municipal Court and was fined \$10 by Acting Judge Strode, does not act as a bar to the proceedings in the present instance, Mr. Hancy explaining that the action in the Municipal Court was brought for violation of a city ordinance, whereas the com-plaint filed yesterday is for the violation of a state law. If the arrested persons are convicted in the Circuit Court the minimum fine is \$500 or imprisonment in the penitentiary for a year.

Mr. Haney expressed the opinion that the evidence he has in his possession is of such a character that the offenders will have some difficulty in convincing the court that the pictures are innocent and that the selling of them was not clearly forbidden by state statutes. Judge Strode yesterday in passing sen-

nce upon A. A. Wise said from the The authorities have wisely started a

crusade against the exhibition and sale of immoral or suggestive postcards. I give notice now that anybody else who is brought before me on this charge will be severely dealt with."

Chief of Police Gritzmacher said yesterchief of Police eritamacher said yester-day afternoon that the sale of vulgar plc-tures and the running of "peep-hole" exhibitions have increased right along since the Lewis and Clark Fair, and had become so bad that finally he issued orders to the patrolmen and detectives to bring in samples of any indecent pictures found that might be used as evidence in a prosecution of the sellers. He added: "The result has been the accumulation

of quite a lot of pictures, the most of which are suggestive of vice rather than positively indecent. I have ordered the arrest in any instance where there was a palpable violation of the city ordinance or state law, and when in doubt I have referred the pictures to the City Attorney or to the District Attorney for determination of the character of the evidence. "I have received no opinion on most of is pictures submitted—those of a suggestive nature-so that little has been done in the way of making arrests, except in the case of a North End 'peep-hole' show and the Wise case yesterday. I think the exposure in The Oregonian will help very much to put a stop to the sale of vulgar pictures and to suppress the sale also of those that might not come under the scope of the law, but are

not fit for public exhibition."
. Postmaster Minto was asked concerning the use of the words post card on vile pic-tures. He said the department made a nice distinction between the words post card and postal card. The latter is the official name of cards issued by the Government, and no others are permitted to employ that term on picture cards or on private mailing cards.

The authorities seem to be in earnest in the work and all express the inten-tion to push the prosecution of offenders until there are no more doubtful pictures offered anywhere in the city for sale or permitted to be placed on exhibition.

WHERE FARMER STANDS

Asserts His Right to Form a Little Trust of His Own.

LATOURELL FALLS, Or., Aug. 28 .- (To the Editor.)-Let us see for a moment how it stands with equity between the farmer and the individual worker and if the new farmer trust, the Society of Equity, really belies its name. In the first place your in-dividual worker has the right by law to de-mand the pay for his labor at any time, even if it was unsatisfactory, defective and bad. The farmer has no such rights by law; because if he brings his labor to mar-ket in the shape of products, which is the only way he can offer it for sale, and it is only way he can offer it for sale, and it is not satisfactory, or defective and had, it is condemned and taken away from him by law and he gets nothing whatever for his labor and is possibly fined on top of it. Do you call that equity? Besides that, the farmer has to credit his work to society not only for months, but for years, and often half a lifetime, which he does for society in the shape of building roads through wildernesses, improving the country, clearing land and raising produce for sil, before he is able and entitled to collect some pay for it, provided that the latter is the wise thing and taking it. There all, before he is able and entitled to collect take a long vacation, and he is doing some pay for it, provided that the latter is not confiscated by law and that he finds a buyer for it, when the worker has the right able to act again." in this society to demand the pay for his labor at any time. Do you call that equity? In this way the farmer is compelled to credit his labor to society, but if he wants some credit from society he is compelled to pay high interest for it. Do you call this equity? Capitalists, tradesmen, and the greatest part of the indi-vidual workers referred to in a recent Or-egonian, editorial, have banded together in unions or trusts for the purpose to force other individuals of our society under their will, to defy our laws, to create state laws for their own selfish interests and to elect county and state officers to uphold them, to work shorter hours and do less work and get higher pay for it than other individuals will, to defy our laws, to create state laws for their own selfish interests and to elect country and state officers to uphold them, to work shorter hours and do less work and get higher pay for it than other individuals unorganized to such trusts, to kill free competition and to raise the price for their lebor and labor products at will to the damage of other people and other classes of inhor, not exempting the farmer. Do you call that equity? The farmer waited a long time for relief; he saw how all these trusts yebbed him and pulled the money out of his pocket when he had to buy something.

Now, in order to get even with all those trusts and in order to create a little, more equity in our society, he himself goes into the trust business and calls the latter perfectly rightfully, "Society of Equity."

I would be the last man on earth who would be in fayor of any kind of union or trust in our National life which tries to cripple or stop free and unlimited exchange of labor and labor products among its members therein, because it is against the laws of nature which create and maintain the real weifare, health, happiness and prosperreal welfare, health, happiness and prosper-ity of any special life, not excepting that in our nation; but for the sake of a good lesson to all other trusts in our nation, I wish that this farmer trust will prosper and that it will screw the prices up in the sam degree or a little better than the othe trusts, just to show them how utterly worthless for their real welfare and pros erity the whole trust scheme is if all othen numbers of our National life form trusts

and prosperity of any special life, not ex-cepting the special life in our families. cities, states and nation, are created and maintained by natural regulations or laws. If we violate any of these laws or regula-tions then we have to suffer for it and just the contrary will happen in spite of all that we may do in the way of laws and regthat we may do in the way of laws and regulation. And do you ever forget that?

One of these natural laws or regulations,
which create and maintain to a very great
extent the real welfare of all special life,
is: "The unlimited and undisturbed exchange of labor and labor products between
all its members or units." Any crippling
up of this distribution of exchange causes
unhealthy conditions therein, and any local
eston of it causes local paralyzation or estop of it causes local paralyzation or collapse of life. The strikes of our labor unions are such paralyzers in our state and National life, and their disturbing the free exchange of labor and the cornering of labor

healthy conditions therein.

No individual of any family, state or nation has a right to form unions in violation of these natural laws. They should be declared by law as felons of the worst kind and be punished as such.
