ONION MARKET FIRM

Walla Walla Crop Has Been Disposed Of.

THE CONDITIONS IN OREGON

"dook Good for High Prices This Fall-First Sale of New Oregon Hops Reported_Big Local Demand for Fruit.

President A. J. Fanno, of the Confederated Onlongrowers' Association, has re-ceived word from W. S. Offiner, of the Walla Walla Produce Company, to the effect that supplies of Walla Walla onlone have been supplies of Walia Walla onlone have been practically exhausted. The crop, which was all along known to be light, turned out to be even less than expected. All the globe onlone have been disposed of and the Danvers are about gone. The latter did not hold up as well as expected and growers have been pulling them out of the fields and alpments of late have been heavy.

The onlon crop in other parts of Washington is a light one and the California.

ington is a light one and the California crop is also short. It is regarded by onion men as certain that high prices will prevall this Pall, and by reason of the removal of the Walla Walla crop as a factor, the market is already taking on a firmer tone. The members of the Oregon association are halding their onions stiffly, and while there is no intention to pool their holdings, they are determined to market the onions judiciously, as they did last year, and thus get all that is posisble out of them. In spite of the good market prospects, however, there are a few growers outside the association who are selling rather freely and speculat eagerly buying up such lots at

The condition of the Oregon onlon crop shows no material change since the last report. Some fields are showing improvement, but the total output will not be very

HIDE MARKET IS DEMORALIZED. Prices Are Lower Than They Have Been

appearance in most yards. There is enough vermin with unfavorable weather to cause moid. Since our last report crop prospects are not so promising. Weather is too rainy. Crop promises to be 25 per cent short of last year."

Pincus & Sons also received the following "Vermin is increasing and honey dew is showing. Mold and vermin are causing great damage and the crop promises to be a third short in Sonoma."

The Ireland-Wells Company has received samples of new hops from E. C. Horst's Sacraments yards, which show a crop of ex-cellent quality and very cleanly picked.

FRUIT TRADE OF LARGE PROPORTIONS Watermelons Clean Up and May He Scarce for Some Time.

he hot wove is having a very ethnulating effect on the fruit market. Local stocks have been sharply reduced in the last two days and in some lines, watermelons excecially, a shortage exists. Only a few cars of California melons are known to be rolling and owing to the scarcity of cars in the Scuthern state, it is a question whether further supplies will be available from that quarter. Southern Oregon melons are also slow to put in an appearance, but some may yed later in the week.

Arrivals of peaches were light, and as most of the poor stock has been worked off, the market has a healthier tone.

Two Cars of Eastern Eggs.

Two cars of Eastern eggs were put on the market yesterday, but fresh country eggs were so scarce that some dealers quoted up to 30 cents for ranch stock n the sales, however, were reported at 28 and

Poultry was in excellent demand, hens ly, but Spring chickens also sold. The trade would be gladd to have more hens, but farmers seem averse to parting with them now.

There were no new developments in the butter market, which, on Front street, was generally quoted weak.

Say Union Pacific Discriminates. LINCOLN, Neb., Sept. 10.-Claiming that they represent 42,000 members of the United Commercial Travelers, J. W. Nation and F. W. Hawken, of Fremont, today charged the Union Pacific Railroad with gross discrimination in passenger traffic and demanded that the State Railway Commission make an immediate investigation. They allege that the Union Pacific has barred local passengers from trains Nos. 1 and 2 and 7 and 8, between Council Bluffs and the Wyoming line. Hawken and Nation submit that they were refused tickets and were prevented from going from Council Bluffs to Fremont. The

Mining Stocks Seriously Affected in New York Market.

ENTIRE LIST, FEELS IT

Hill Group Depressed by Rumor of Coming Inquiry of Interstate Commerce Commission. Profit-Taking Sales.

NEW YORK, Sept. 10.—There were various cross-currents in the speculation in stocks today, and the most obvious effect of the conflicting influences at work was to stimulate a considerable revival of activity Prices moved more freely than for son time past, and the professional room traders had their apportunity to operate in and out of the market on a large scale. It is probhad their opportunity to operate in and out of the market on a large scale. It is probable that the day's dealings were made up in an important proportion of this class. Yesterday's seeming defermination to abstain from operations until the result of the New York City bend sale and the Government crop report should become known was abandoned and the business during the morning at the stock exchange was in excess of the average for a full day's aggregate for some days past.

The principal development of the day, and which caused the weakness of the copper stocks and influenced the whole market was the renewed unsettlement in that trade. The reduction of the quarterly dividend disbursent on the Calumet & Heels stock from \$20 to \$15 was an example of the effect of the fall in the price in copper that was of conclusive effect on sentiment, owing to the important share in the production of lake copper enjoyed by the company. Hitherto, there has been a disposition to assume that the decline in copper has not asriously impaired the earning power of the company, partly owing to the fact that the previous high prices were believed to have been made for small amounts, while the level still maintained represented a good margin of profit on production. These assumptions were shaken by the Calumet & Heela Incident. The effect was aggravated by another fractional reduction in the price perpound in the level metal exchange. Reports were in circulation of gloomy anticipations held in the trade of the possible further fall in the metal.

The general list was inclined to disregard the full effect of the copper weakness for a time and did not, at any time, share fully in the weakness of that group. The acute depression in the HIII group owed something to the report that the Interstate Commerce Commission inquiry into the legality of the close relations between the railroads in that group was to be revived and actively pushed.

The fact that considerable profits had accused to speculators long of the marker at

STURGEON APPEAR AGAIN

Restrictive Laws.

OREGONIAN NEWS BUREAU Washington, Sept. 10.—Wise legislation BUREAU enacted by the Government of British Columbia is reviving the sturgeon fish ing industry of that province of Can-ada, according to a report recently made by Consul L. E. Dudley at Vancouver. Commen Mr. Dudley says: Commenting on the situation

For several years previous to 1901 the sturgeon fishery in the Fraser River was an important industry. One million pounds of fresh sturgeon packed in ice was shipped East annually. A very considerable amount of sturgeon roe was shipped each year to Europe to be manufactured into caviare. The sturgeon then almost entirely disappeared from the river, and only a few—barely enough to supply the local demand—were taken. The disappearance of demand—were taken. The disappearance of this fish has been attributed to overflashing. During the last half of July the sturgeon have appeared in large numbers. Nearly all are small, and would easily pass through the sturgeon nets, but a very large number have become entangled in the salmon gill nets. These are supposed to be returned to the water in all cases where they have not been killed.

have become entangled in the salmon gill nets. These are supposed to be returned to the water in all cases where they have not been killed.

Under the law and the regulations, no sturgeon under four feet in length may be sold in the markets here, nor shipped abroad. The fishermen have, therefore, no remptation to fall to return to the water all fish under this length which they have not been obliged to kill to get them out of their nets. One night recently a sturgeon if feet long, weighing more than 500 pounds, was taken in a salmon net. With proper observance of the regulations for conserving this fish, it may again be expected within the process of the market ralconserving this fish, it may again be ex-pected within the next two or three years to become a profitable industry.

Bullish Government Crop Report Is Offset by Failure of Predicted Frost to Materialize_Ca-

CHICAGO, Sept. 10.—Fallure of froat to ma-terialize in the Northwost offset a somewhat bullish crop report by Government officials on the condition of Spring wheat, and caused an

to indicate that little damage had been cone by frosts. An official forecast of warmer weather throughout the Northwest also added the selling movement. Later, the market ralled slightly because of a decrease of 2,062,000 bushels in the visible supply against a small increase for the corresponding time last year. The Government crop report which showed the condition of Spring wheat to be 77.1, against 70.4 on August 1, was construed builtshiy. During the last half hour the market weakened, on heavy realizing sales and closed easy. December opened 16c to 965 lower, at 90c to 994 a sold off to 985c, and advanced to \$1.00%. The close was at 995c.

Clearances of wheat and flour were equal to 270,000 bushels.

The world's visible supply, as shown by

The world's visible supply, as shown by Bradstreets, increased 300,000 bushels, against 3,575,000 bushels for the same time last year. Primary receipts were 774,000 bushels, against 1,167,000 bushels last year.

1,167,000 hushels last year.

The corn market was weak nearly all day. The market closed stendy. December opened 4stillar to 15 to 5co lower, at 60%c, and solid between 50c and 60%c, and closed at 50% 50%c. Local receipts were 585 cars, with 188 of contract grade. The Government crop report which made the condition of cate 55.5 per cent, as above the low point of the day. Early in the session the market was weak in sympathy with wheat and corn. December Building Permits.
