CHANGES ARE SMALL

Readjustment of Prices Is Under Way.

PRODUCE LINES AFFECTED

Influence on Grocerles and Other Commodities Will Not Be Felt at Once-Conditions in the Potato and Onion Markets.

The readjustment of commodity values a lower basis—the result of the altered financial situation and one of the remedies for the disorder—is slowly but surely taking clace. The process is necessarily a slow one is this section of the country, because of the continued good demand for most products. The purchasing power of the bulk of the consumers has not been impaired, but buyers are more cautious and this has caused some diminution in the volume of local trade, and likewise a weakening of values in a few lines.

In the grocery list no changes of importance have yet taken place. Canned corn an high-grade canned tomatoes are likely to remain strong, because of the light pack, but there may be a decline later in hightrade canned fruits. It is understood that he California packers are delivering 100 per cent of this quality and with any cessa-tion of the demand, the opening prices may not be maintained. Short deliveries of the cheaper grades of canned fruits are considered to insure steady prices on this class of goods. The sugar market in the East has weakened because of lighter consumption, prices dropping 20 cents per hundred Wednesday, but the Pacific Coust refiners so far have ignored the change. Rice, beaus, coffee and tea are in a good statistical position and are not likely to be affected in price very soon. The bulk of the season's pack of other grocery lines is in the hands of jobbers or retailers and it will take six months at least for any general decline to come effective.

The produce markets were quicker to respend to the change. Butter was the first to decline, but the drop has only amounted to 21s cents per pound, and with the Eastern butter market again advancing, it is loubtful whether there will be any further reduction this Winter. Eggs hold their own, as lower prices are out of the question at this season of the year when the production is only nominal Poultry, however, is cheaper than it has been for many months and the Thanksgiving turkey price will doubtess he fixed at a more reasonable price than

has been the case for several years. Potatoos are 25 cents per hundred under the high mark of the early Fall, and the indications are that a further reduction will be necessary before the big Oregon crop is all moved. Onlone have not declined, as the yield is very short, but the lighter buying has checked the advance which at one seemed inevitable and may yet be box and the jobbers may find it necessary reduce prices again to prevent their stocks from accumulating.

POTATO AND ONION OUTLOOK GOOD Oregon Products.

In reviewing the potato and onion situa-George L. Burtt, the representative of L. Scatena & Co., and Wolf & Sons, of San Francisco, said yesterday:
"The potato-growers as well as onion-

growers of Gregon should not be discour-aged by the present condition of the Oregon and California markets. While the financial conditions have caused the murkets to slump temporarily, not only in potatoes and enloss, but in many other commodities, the farmers need not be alarmed. We do not ook for high prices in potatoes, as very large crops are reported in all sections, but there will probably be a fair demand for all the potatoes grown in this state. The farmers should not hold them back, but should continue moving them at the pre-valling prices, otherwise there may be too many left in Oregon at the close of the

"I have no doubt there will be a good demand for onions in January, February and March at prices profitable to the growers. At

"The intest advices from California are that the dealess have not been materially affected by the prevailing financial conditions and are fully reliable for all their ob-ligations. At the present time we are willing to pay either cash or by checks on Portland banks for all the purchases we make in Oregon."

FRESH PRODUCE TRADE FAIRLY GOOD First-Class Demand for New Oranges Grapes Clean Up Well.

A first-class local and out-of-town de-mand for new oranges is reported which holds the market in very steady trim. Medium sized grapefruit is scarce. A car of lemons is due today. Grapes are cleaning up well and a fair demand for storage peaches in reported. Apples are slow and rather The sweet potato market is very firm

Vegetables of all kinds move readily at On the whole, business on Front street

was better yeaterday than on the two pre-eading days. The retailers, as a rule, have allowed their stocks to run low and any better feeling in the retail trade is at once felt on the street.

Trade in the Hop Market.

There was not as much doing in the hop market yesterday as on the preceding day, but both buyers and sellers are disposed to transact business and a steady volume of trade is looked for from now on it is estimated that Wednesday's transactions in the Willamette and Yakima Valleys involved an acceptance of 2000 bales. aggregate of 2500 bales.

Live Turkeys Are Wenker.

Live turkeys are coming in freely and a sight decline in prices has been found necessary to keep stocks moving. There is a fairly good demand for hens, but enough are arriving to supply the trade and with any heavier receipts, prices could be main-tained only with difficulty. Eggs continue very firm with Oregon

ranch stock eagerly sought after.

The butter market presents no new fea-

Wheat Buying Under Way.

Wheat trading, though still light, is grad-ually increasing in volume. A moderate movement is reported in outs at firm prices. The barley market is quiet.

Steel, Pennsylvania and St. Paul Under Pressure.

GENERAL LIST IS STEADY

Interior Banks Suspected of Hoarding-Recall of Government Deposits Is Not Considered of Importance to Wall Street.

NEW YORK, Nov. 14.-The stock market was decidedly weak at some points today. The renewed liquidation of an urgent kind was inferred to be partly responsible for this. It was suspected also that there was a certain growth of activity on the part of the professional bears in the market, the circulation from time to time of rumors of an unfavorable character, which failed of confirmation, tending to confirm this im-pression.

an unfavorable character, which failed of confirmation, tending to confirm this impression.

The prominent factor in the market was the emphatic testimony from the iron and steel trade of the wide reaction in the trade and the belief that it is to go further. The seiling induced by this development naturally converged on the securities of the United States Steel Corporation. The Pennsylvania Railroad was sharply affected and in close sympathy. The Pennsylvania is the railread system which responds most directly to the fluotuations in the fron and steel trade, owing to the large proportion of its tonnage which is made up of materials for all branches of that trade. The supposition was that some large individual accounts in those stocks were being closed out and the selling orders were believed to have their origin in the iron and steel centers.

St. Paul was another distinct center of acute weakness, for causes individual to inself, apparently, as related stocks were much less affected. The explanation may be found in the approaching date for the payment of a large installment of subscriptions to new St. Paul common and preferred stock. The amount of the new stock of both classes in round numbers is \$109,000,000, and on December 1 subscribers are committed to the payment of a 20 per cent installment, which calls, therefore, for approximately \$20,000,000. It needs no explanation to understand that conditions are not propitious for meeting such a requirement. Notwithstanding the considerable sympathetic effect of these special centers of weakness, a scrutiny of the general list will show that it was effected comparatively little.

Some high premiums were paid on currency again early in the day, but the ten-

weakness, a scrutiny of the general list will show that it was effected comparatively little.

Some high premiums were paid on currency again early in the day, but the tendency was toward relaxation. The point of interest on the subject has shifted to the interior, from which the urgent demands are most responsible for present conditions. The opinion is heard among New York bankers that conditions may be due to what is, in effect, hoarding by the interior banks themselves, which have been moved to strengthen their reserve position as a precautionary measure, but seem to have overdone the matter in some instances. The drawing down of balances of interior banks in New York depositories is a prime factor in the dislocation of domestic exchange. The consequence is that no form of remittance is obtainable for payment of debts to New York merchants who are receiving checks on interior banks for that purpose, which are received subject to collection by New York banks, a process that proves slow under present dreumstances.

Reports published prior to the close of the stock exchange of the nature of the negotiations under way for a large sum of gold for New York from the Bank of England, despite the large supplies of gold furnished to New York, was accepted as highly encouraging. The accompanying decline today in the French bank's buillon holdings was evidence that Paris had been helping London to supply the New York demand.

The recall of 10 per cent Government deposits with the New York and helping London to supply the New York demand.

The recall of 10 per cent Government deposits with the New York builds were unchanged on call.

SOME NOT IN COMBINE

Independent Fuel-Dealers Cut the Trust Prices on Millwood.

That several wood dealers of the city till hold aloof from the slabwood combine was asserted yesterday by S. G. Reed, of the Portland General Electric Company. His statement would seem to be borne out by the prices at which his company is selling slabwood: Mr. Reed company is sening stanwood: Mr. Reed said yesterday that the electric company went into the wood business in order to provide fuel for its steam plant, which must be operated at certain seasons in order to furnish the power needed for the street railways and by local manufacturers.

"Before we went into the slabwood business," said Mr. Reed yesterday, "we were held up continually by the fuel dealers, who asked more for wood than it was worth. Since we have been pur-chasing direct from the mill we have not made a cent from our customers, in facchasing direct from the mill we have not made a cent from our customers, in fact the cost of the wood and of handling it has been a little more than the sales have amounted to, but I hope to be able to break even in this department this month. The wood for our steam plant costs us just what the public is paying us for its wood, but we are paying the mill-owners more than some of the other local dealers are for their wood.

"Our prices range from \$3 a load for local dealers are for their wood.

"Our prices range from \$3 a load for the blockwood, cut; \$2.50 a load for green, and \$2.75 a load for four foot, to \$5 for the blockwood on Portland Heights. The average price paid us by the consumer for the short wood hauled to his door is \$3.25 a load. We have not raised our prices since last May.

"A problem which very rarely comes have to be average or made for the short of the short of made for the short of the

ome to the average purchaser of wood is he cost incident to seasoning wood. A lece of land on which 800 cords can be plece of land on which 800 cords can be stacked costs us \$150 a month. At this rate it costs \$1 a cord to store wood for five months, it will cost 25 cents a cord for reloading, 10 cents a cord for delivering, and we must allow 10 per cent for shrinkage. This makes the dry wood cost \$2.27 a cord more than the green. We take the output of the Eastern & Western Lumber Company's mill, which is about 1200 cords a month when the company is running 22 hours a day. We have only about 200 cords on hand now." company is running 22 nours a day. We have only about 200 cords on hand now."

Donald MacKay, president of the North Pacific Lamber Company; gave its prices on slabwood and blockwood last night as follows: Green, 16-inch slab, \$3 a load; block wood, \$4 a load; inside wood, \$4 a load; and dry planer trimmings, \$2.50 a load.

Wheat Market Influenced by Light Receipts.

DECEMBER OPTION HIGHER

Corn Is Weak Early in the Day at Chicago, but Soon Rallies Most of the Loss in Oats

Is Regained.

CHICAGO, Nov. 14.—The wheat market sarly in the day was weak because of the depression in the stock market. An advance of nearly I cent early had no effect. About hoon the market turned strong and stayed that way for the remainder of the day. The market was builtship inclined, influenced by small receipts at the principal grain centers of the country. The close was strong. December opened % 9% c lower at 94% 985% c, sold off to 94% c and then advanced to 96%c. The close was at 95% 95% c. May sold between \$1.03 and \$1.04% and closed at \$1.03%.

The corn market was weak early in the day. Commission-houses sold freely during the first hour. The market railled later with the advance in wheat, and on an active demand by shorts and cash houses. The close was steady. December opened % 9%c lower at 55% 955%c, sold off to 34% and then advanced to 56%c. The close was at 55%c.

Osts declined almost 1 cent early in sympathy with wheat and corn, but regained the greater part of the loss or covering by shorts. December opened % o lower at 47c, sold between 46%c and 47a and closed at 49%c.

Provisions were weak all day. At the close January pork was off 12%c. Lard was down 7%c and ribs 3c higher.

BUSY AGAIN AT CITY HALL

Only Civil Service Department Han-

dicapped by Holidays.

All departments at the City Hall are

conducting business practically as before the holidays, with the exception of the

Civil Service Commission, Secretary Mc-Intosh of the Commission said yesterday

Intosh of the Commission said yesterday that while examinations are being conducted for laborers and that from 15 to 18 are passed on every Tuesday as usual, there is a legal obstacle to considering applications for city positions. The city charter provides in article IX, section 3H, that "Notice of the time, place and general scope of every examination shall be given by the Commission by publication in the city official newspaper once each week for two successive weeks and

each week for two successive weeks and by posting such notice in a conspicuous place in the office of the Commission for

not less than two weeks preceeding the examination."

There are now on file with the Commis-

sion II4 applications for positions with the Police Department and 87 for the Fire Department. Both these departments are clamoring for additional men, but

Auditor Barbur has informed the secre-tary of the Commission that under advice of the City Attorney no printing nor ad-

vertising can be ordered during the holl-days, so examinations cannot be con-ducted for the positions referred to until the Auditor decides to give the required

public notice.

The eligible list is entirely exhausted and until the City Attorney sees his way clear to advise the Auditor to proceed

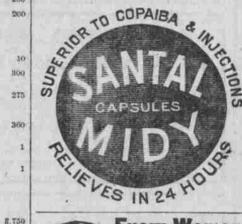

the departments must get, along with

HAND

FOR TOILET AND BATH

FRANK ROBERTSON. Failing Building Third and Washington Sts. their present forces. The last examina tions for firemen were held July 18 and for policemen July 11.

The laborers filing applications come under a different rule of the Commission and the two weeks' public notice of ex-amination is not required. As a con-sequence upward of 20 men are available most of the time. These laborers are em-ployed in the Water, City Street Cleaning, Engineer and Park Departments. Hood River, Or.—When William Fleming and bride returned home last night they found everything they penessed in the way of household goeds and wearing appared smashed or cut up. Everything was in ruins. No clew has been obtained.
