#### AUSTRO-HUNGARIAN LABOR

Alleged Immigrants Are Enticed to Avery Island and Then Kept There in a State of Virtual Slavery by Armed Guards.

NEW ORLEANS, La., Dec. 6 .- (Special.) -That John Avery McIlhenny, member of the United States Civil Service Commission, holds more than 1000 ignorant foreigners in a state of peonage, and that brutality and cruelty are practiced to force these people to remain on Avery Island, La., where the McIlhenny interests operate vast cyster canning and tobacco manufacturing properties, is the charge brought by Stephen Jozca, special com-missioner of the Austro-Hungarian government, to which nationality most of the

alleged peons belong.

The stories of peonage in certain sections of the South recently were called to the attention of the Austro-Hungarian government, and official warning was given intending emigrants of the dangers ahead of them. Mr. Jozen, who is assist ant secretary of the Louisiana State Board of Immigration, was sent to Avery Island by Emile Hochn, the Austro-Hungarian Consul in New Orleans, following plaints made by one of the immig who escaped the McIlhenny guards.

## MAP OF THE STATE MADE

Government Is Proceeding Rapidly With Topographical Work.

BERKELEY, Cal., Dec. 6 .- (Special.) During the past Summer the United States geological survey has been mapping several districts in Oregon, and within a few months a number of new detailed topographic maps will be issued rom the main office in Washington, D. These maps are the most complete published, and contain every road, build-ing and stream, together with a complete system of contour lines showing all

a quadrangle on the Columbia River just east of Arlington, the Iron Mountain quadrangle south of Sumpter, the Grants Pass quadrangle and the Kerby quad-rangle just west of it. Each of these quadrangles embraces a territory of about 500 square miles.

The Mount Hood quadrangle has been surveyed for the purpose of giving the forest service a better idea of conditions existing pear the mountain and in the Bull Run reserve. The territory em-braced extends from the headwaters of Hood River to the headwaters of the Santiam. The quadrangle east of Arling-ton lies north and south of the Columbia River, and is to assist in the irrigation problems near Irrigon. The mapping in the other quadrangles is simply in line with the policy of the Government in getting a complete map of every state. In most of the states the work has progressed much farther than in Oregon, owing to the fact that the states themselves have appropriated large sums of money to co-operate with the Govern-

Maps already published containing ter-Riddles, Ashland, Klamath, Crater Lake, Special, Coos Hay, Port Orford, Telocaset, Baker City, Sumpter, Mitchell Butte, Welser and Nampa. Of the recently surveyed areas, the Grants Pass, Iron Mountain and the Columbia River sheets will scope be ready. The Mount sheets will scope be ready. sheets will soon be ready. The Mount Adams sheet in Washington was issued recently, and work is progressing on the quadrangle south of North Yakima, and the Pullman quadrangle. The maps may be secured from the gelogical survey in Washington at 5 cents a sheet.

Conference, interchange of views and co-operation are most helizful in such undertakings, not alone because they make for progress in thus coming together from the different sections of the country, but because you contribute to a better understanding of the needs and opportunities of all our people. A few days ago I took occasion to say to one of our inrge commercial organizations that out of our financial disturbance had come a spirit of co-operation that promised well for the future.

May that spirit be more and more evidenced in your relation to the people and in the relation of the people to you.

At I o'clock the congress adjourned and the delegates were received at the White House at 2:30 P. M. by President Rooseeit. #### MUCH MONEY NOW AVAILABLE

#### About \$240,000,000 Can Be Used for Improvement of Waterways.

WASHINGTON, Dec: 6.-Speaker Can on today received a committee of the ice-presidents of the Rivers and Harbors Congress, who presented resolutions in behalf of 35 states "urging the Amer-ican Congress to adopt at its present session, a plan for the improvement within the next 10 years of all the meri-torious and deserving waterways in the Union which have been approved by the engineering department of the Army or may be approved. In reply Mr. Cannon said:

may be approved. In reply Mr. Cannon said:

I have no doubt that in the years to come Congress will make progress along the lines already laid down and so successfully carried out in the development and improvement of the country harbors and rivers. There is now in the United States Treasury available in large part or in whole, for these purposes a surplus of \$240,000,000; and we have also the income revenues that will take care substantially, if not in its enlirety, of the great public service which grows by leaps and bounds. That surplus is more than possibly could be expended during the lifetime of the present Congress in carrying out these works.

Our wonderful growth in population, in wealth, in development of resources—producing as we do one-third of the whole world's products of the mines, the fields and the factories, compels us to make all necessary improvements of our waterways and our harbors, to the end that we may produce conomically, and care for extending commerce. These improvements and development, I say are so necessary that the members of the succeeding Congresses will be compelled in their day to recognize them for the sake of the public service.

#### Defendant's Hopes of Retrial Raised by Delusive Sign.

OREGONIAN NEWS BUREAU, Washington, Dec. 6.—The closing argument on appeal of ex-Representative Williamson was made in the Supreme Court today by Charles A. Douglass for the defendant. For the first time the court interrupted with many questions, which led counsel for Williamson to expect the case to be remanded for new trial. Experienced of-ficials of the court, however, declare that questions from the bench are no indication of the opinion of the court. They venture no predictions.

### Prevention Better Than Cure.

CHICAGO, Dec. 6. Governmental regulation of railroads rather than state regulation and more prevention and less cure are among the things the Western Fruit Jobbers' Association belleves are urgently needed in the trans-portation world. The report of the transportation committee presented to the annual convention says that states

cannot effectually regulate railroads, and that their efforts in that direction are confusing and occasionally harmful and that rigid statutory freight and passenger rates are founded on wrong principles. The committee says that regulation of our great rallroads must be left entirely to the Federal Government, whose opposition to peoling and combining must eventually be abandoned and that increasing governmental supervision and watchfulness over the operating and accounting departments of every must in a large measure take the place of the many prohibitions and 'don'ts' in the present law.
