JEROME MAY BAR MRS.THAW'SSTOR'

Criminal Lawyers Urge Him to Exclude the Girl's Testimony.

FRESH FACTS FROM EUROPE

Assistant Garvin Has Gathered Sensational Evidence Which Will Be Used in Cross-Examination of Evelyn-Trial Begins Today.

NEW YORK, Jan. 5.—On the eve of the second tril of Harry K. Thaw, which will begin tomorrow before Judge Victor Dowling of the Superior Court, it was reported that District Attorney Jerome may attempt this time to bar the testi-mony of Mrs. Evelyn Nesbit Thaw, wife mony of Mrs. Evelyn Nesbit Thaw, wife of the accured man. At the first trail this testimony was allowed to go before the fury with the consent of the District Attorney who said the precedent set in the case of the state against Wood seemed to cover the matter. Special criminal lawyers of prominence in their profession have argued the point with Mr. Jerome since the close of the first hearing and have urged him to oppose this line of testimony at the trial about to begin. These attorneys declare a vital principle of law is involved, and that it should go to the highest courts for determination. Mr. Jerome has given no definite answer to his fellow members of the bar, and may feel impelled to consent the bar, and may feel impelled to consent to another recital of Mrs. Thaw's story to prevent an appearance of inconsistency with his course of a year ago. But the representations made to him as to the importance to the community at large or testing the legality of such testimony have been usually strong, and many of the prosecuting officer's closest friends would not be surprised if he should rise in his place when Mrs. Thaw is called as a witness and contend against the admissibility of her testimony

Story Vital to Defense.

Young Mrs. Thaw was allowed to testify at the first trial upon the theory that it was her story, told to Thaw in Paris in 1903, two years before their marriage, that planted the seeds of tem-porary insanity in his brain. The prose-cution was not allowed to test the truth or falsity of the story, the court rule being that, regardless of its truth, the issue had to do solely with the effect upon the defendant's mind. Mr. Jerome offered witnesses who, he declared, would contradict certain of the girl wife's state-ments, but they were not allowed to be teard. The prosecution had its only re-ourse in a severe cross-examination but wen this was allowed only on the ground of testing the credibility of the witness

of testing the credibility of the witness in a general way.

Already the rule laid down in the Thaw case has served as a precedent in another. A former judge in Virginia recently shot and killed a young man against whom his daughter had made charges of having drugged her. The young woman admitted that she had not told her father the truth, but he was accultted on the ground that her story. acquitted on the ground that he was acquitted on the ground that her story, true or false, had the effect of inflaming the parent's mind to an insane degree. The presiding judge followed the rule set down in the Thaw case.

Feature of Wood Case.

The lawyers who have approached Mr. erome on the subject are inclined to the opinion that there are vital differences between the Thaw case and that of Wood, which served as a precedent at the trial before Judge Fitzgerald. The Wood case was one in which Woods' wife told him that her father had been guilty of improper relations with her before her marriage and had but recently sought her again. Wood, in the heat of passion, straightway emptied a shotgun into his father-in-law, killing him in-stantly. The defense was one of insan-ity, brought on by the awful story of ity, brought on by the awful story of the wife. The defense pointed out that in the Thaw case the killing did not occur until three years after the recital which is alleged to have incited the deed. The lawyers say the defense is just as vital as that which the law makes in various degrees of murder—a homicide committed in the heat of passion being widely distinguished from a coolly planned and deliberate one.

New Facts From Europe.

District Attorney Jerome has consistently declined to discuss the Thaw case for publication. His course as regards the all-important testimony of Mrs. Thaw will be watched, however, with the keen-est interest. If her story is decided ad-missible by Judge Dowling, it is expected the cross-examination to which she will be subjected will be far more severe even than the first one. Assistant District Attorney Garvin spent several months last Summer and covered much of the ground included in the travels of Harry Thaw and Evelyn Nesbit during the two trips abroad which preceded their marriage. The District Attorney seemed last year to have every detail of the young woman's life at command, but it is said that this year he will be able to confront her with incidents of the European trip not binted at in the first hearing.

The trial tomorrow may not begin until noon. It is the first day of the January court term, and it will be necessary for Justice Dowling to charge the new grand jury and dispose of a number of routine matters before taking up the Thaw case. be subjected will be far more severe even

But one death, directly or indirectly due to violence, has resulted, and it is a matter of conjecture as to whether death in this case was due to mental shock or from physical stress. On the night of August 5, Mrs. Catherine Senften, an aged Swiss woman residing near Cedar Mill, was assaulted and robbed, and although Sheriff Connell made immediate search the robber has not been apprehended. The old woman, who was 75 years of age, was budly bruised by the burglar, who secured about \$80 in money. The robbery was effected about midnight, and for several days the woman complained of internal injury but declined to tell how she was injured. Two weeks later her house was again entered and the premises disturbed. From the night of the first robbery the aged woman commenced to fail, and she died within two weeks.
