

SENATOR PILES IN HIS FIRST SPEECH

Makes Hit in Supporting His Bill for Exposition Appropriation.

GREATLY HELPS CAUSE

Speaks for Hour and a Half, Outlining Resources of Northwest and Showing How Fair Will Stimulate Trade With Orient.

OREGONIAN NEWS BUREAU, Washington, Feb. 3.—Senator Piles, of Washington, made a decided hit in the Senate today with his speech in support of his bill appropriating \$700,000 for Government exhibits and buildings at the Seattle exposition.

It was his first set speech in the Senate, and the manner in which it was received and the comments it evoked were very gratifying to the Senator. That he materially helped his cause was generally conceded; that he helped himself was equally apparent. In fact many Senators who congratulated him told him he had remained silent too long. He spoke for an hour and a half, beginning with a half-filled Senate. When he concluded the Senate was nearly full, and there were few vacant seats in the galleries.

Mr. Piles paid a glowing tribute to the resources and development of the Northwest, both in respect to its agricultural interests and the commerce of the Pacific. He declared that the commerce is not as great as it should be, Germany and Great Britain have paid more attention to that field of activity than have the United States. The exposition in behalf of which he speaks, he said, would promote interest in the great feature of American ascendancy on the Pacific.

Piles said the people and the State of Washington had contributed \$2,000,000 dollars to the great exposition. He said the foreign exhibits will be confined strictly to the product of nations bordering upon the Pacific Ocean and directly interested in the development of the Pacific trade. The exposition will, he said, illustrate the wonderful mineral resources of Alaska and will enable the United States to enter into trade relations with Asia and South America and will increase commerce.

Piles pictured in vivid language the settlement of the great Northwest in the face of predictions made by distinguished statesmen adverse to the practical utility of that region.
