The lawest New York papers say of conditions in that state:

The market is in about the same condition as reported last week, possibly a little more quiet. There have been several lots of hops picked up by local dealers in the neighborhood of Clinton and Bridgewater at 11 %, but nothing that indicated any great change in the tone of the market.—Waterville Times.

There is no change in prices in the local market. About 300 bales have been purchased by Cooperstown buyers during the week at prices ranging from 11c to 14c.—Cooperstown Journal.

The local hop market has been exceptionally strong during the past week, Dornet alone having hought about 1000 bales. The prices ranging of from 9 to 13 cents. Zenas Lawyer sold his crop to Howard Shafer for 12 cents.—Cobleskill Times.

Stock Market Becomes Almost Stagnant.

BUT UNDERTONE IS GOOD

Statistics of American Railway Association Show 15 Per Cent of Total Car Equipment Is Idle. Bonds Are Very Irregular.

NEW YORK, Feb. 4.—Transactions in stocks fell to the point of stagnation today. There was a light demand during the early part of the day, centering in a few stocks and coming from only a few brokerage houses which have been active sellers for the past few days, supposedly on the short side of the market. The slight effect on prices produced by the developments, which were regarded as unfavorable recently, prompted the hears to cover their short contracts.

were regarded as unfavorable recently, prompted the hears to cover their short contracts.

There was, at the same time, a cessation of the acute weakness in special stocks, which has proved disquieting recently and also of the reports current to explain this weakness and which alleged troublesome features regarding the finances of some companies. No more was heard of the talk of the intended receivership for the Rock Island and the socurities of that company enjoyed a substantial recovery.

There was not much in the news of the day to afford positive grounds for speculation. Statistics of the American Railway Association on Idle cars in the United States and Canada on January 22, placed the number at \$15,000, or 15 per cent of the total equipment. The inforence is that some \$900 locomotives also are idle and the valuation of the property thus earning no revenue may be computed at hundreds of millions of dollars. Another source of embarrament to the economies planned by the railroads is the large cost of moving empty cars, which is prompted by the heavy pensities attached to retaining cars of other companios, which were put in force at the time of oar familie resulting from the crush of traffic.
