REJOINDER FROM DR.C. T. WILSON

Says Trial Disclosed What Crookedness John H. Hall Was Guilty Of.

NOT A GOOD PROSECUTOR

Preacher Declares Hall's Record of 16 Years Did Not Reflect Credit on Him-Moral Lessons From the Case.

PORTLAND, Feb. 12 .- (To the Editor. -I read with care the letter of Hon. John H. Hall, addressed to me, asking what crookedness he had been guilty of, and ondly, what blame attaches to him in secondly, what blame attaches to him in the matter of dismissing the indictment against W. E. Burke? In reply will say that the sermon of Sunday night was not on the character of Mr. Hall or his po-litical career, much less to express an opinion on the dismissal of the case against Burke. Burke's name was not mentioned by me, but a mass of evi-dence was presented in the case, in court, which gave a perfect picture of the way dence was presented in the case, in court, which gave a perfect picture of the way public office was secured and handled, and the method in which political schemes were conducted during the old regime. My sermon was therefore on "Moral Lessons from the Hall Trial." And it was delivered for the purpose of pointing out the evils of the system in vegue in Oregon politics in the last decade, and pointing out the better way of independence in voters, reform of abuses and the impartial administration of laws.

I have no disposition to make Mr. Hall out worse than his class. He was a creature of the system and he did as the others did. I have just been told by two prominent business men of a day when they saw Mr. Hall with his hand full of hills, standing near the polls and openly buying votes. He now says that his con-acience does not condemn him for any of his public life; but that is a reflection on his conscience. Many others did the same; but I doubt if they would profess that they have no regrets. For 16 years Mr. Hall was a prosecuting attorney in Portland. It was during that period that the land-fraud deals were on

Pull Counted in Land Fencing.

How many of them would not have been attempted with a strict and impar-tial District Attorney in office it is diffi-cult to say; but this we know, that the systematic robbery of the Government lands did not stop till he left the office, and that when a man came who struck, larger to the hearts of the robbers. Mr. terror to the hearts of the robbers, Mr. Hall joined with others and tried to have Heney removed. This trial brought out clearly how the little fellows with a cow pasture of 160 to 250 acres of public land inclosed were threatened till their fences came down; but the group with 20,000 acres and a pull kept up their fence for years. The secret of this influence was clearly brought out at the trial, and be-aldes, in an interview with Senator Ful-ton, published in The Oregonian January 13, he admitted that he asked Mr. Hail not to indict Sjeiwer, as he was "an in-fluential citizen," and he was not during Hall's administration. Hall's administration.

Hall has much to say about the Burke case—a man I did not refer to in any way—but evidently Mr. Hall's lenlency did not reform him, for in the J. H. Mitchell trial it was admitted that Mr. Burke paid the Senator \$500 to have approved an irrigation scheme in Eastern Oregon. But since Mr. Hall's reference to Burke I have looked up their testimony, and it appears that A. B. Hammond, president of the As-toria & Columbia River Railroad, had toria & Columbia River Railroad, had W. E. Burke and W. G. Gosslin load a W. E. Burke and W. G. Gosslin load a car with 20 North End burns, take them to Oregon City, and have them make affidavit that they had personally examined said land and from personal knowledge could describe it, that they did not apply for the land on speculation, "but in good faith to appropriate it to my own exclusive use and benefit; that I have not directly or indirectly made any agreement or contract or in any way or manner, with any person or persons whomseever, by any person or persons whomsoever, by which the title I may acquire from the Government of the United States may inure in whole or in part to the benefit of any person except myself." Every affidavit contained this note: "Every person swearing falsely to the fore-going affidavit is guilty of perjury and will be punished as provided by law,

False Swearing Is Common.

Not one of the statements was true, not one of the applications was in good faith. Burke and Gosslin had led these men into wholesale perjury, and now Mr. Hall asks me to state, as a Christian minister, that I indorse his dismissing the cases without even an at-tempt to punish their subornation of perjuring of 20 men. But I think it would have been better to have made an example there and so stopped this false swearing, which became so com-

men in Oregon. "With reference to the other matters: After a three-weeks' trial, 12 good men have unanimously found him guilty of conspiracy to prevent the free passage of the public over Government land. I did not on Sunday, nor do I now, wish to comment on that decision, except to say that, having heard Mr. Hall's own testimony, I would have been compelled to have decided the same way if there had been nothing else in the case.

Legacy of Hall's Administration.

Next, it is certainly true that all these land-fraud cases which have been carried to conviction through the pros-ecution of Heney and Bristol are cases where the crimes were committed dur-ing the Hall administration, and that sort of thing was not stopped in Oregon until he was superseded. It is also true that both he and his friends made a desperate effort to get rid of Heney, and no man was engaged in hindering that Government prosecution who did not have something to cover up or else had a secret sympathy for the lawbreakers he was after.

Mr. Hall says he has been 16 years a Prosecuting Attorney hereabouts. I have only to say that the history of Portland and Oregon in those 16 years, judging from facts now coming to light, does not from facts now coming to light, does not reflect great credit on its Prosecuting Attorneys. With reference to his leniency toward young men who violate the law, I will say that one vigorous prosecution might have prevented 100 others from becoming criminals. What Solomon said to soft and easy-going parents might apply to Prosecuting Attorneys: "Spare the rod and spoil the child." I think the methods of Prosecutor Heal.

There would have been no such scandals as the Jim Lotan optum smuggling, etc., with a vigorous prosecution of offenders, If the facts brought out that the little fellows who had 180 acres fenced were compelled by him to remove the fence,

If the facts brought out that the little Olympia Beer. "It's the water." Brew-llows who had 180 acres fenced were ery's own bottling. Phones, Main 671, ampelled by him to remove the fence,

but that big transgressors with 20,000 acres of Government land fenced were allowed to go unmolested represents Mr. Hall's ideas of good government, then it is no wonder the people of Oregon are so rapidly discarding the old-line of politicians and are lacking for a new beautiful. and are lacking for a new brand of man-hood to put in public office to imparitally administer the laws of the land. All honest men are reformers when every-

thing is wrong. Burke was ever ordained a Methodist minister. In that Mr. Hall's letter is in error. Also the text of my Sunday night sermon was Romans 13th chapter, first 10 verses, a statement of the relation of Christianity to good government, a study of which I commend to those who do not think ministers should discuss current events of moral moment in their pulpits.

Lessons of the Trial.

It remains true that the lessons I mer tioned on Sunday night are the important ones for the young men of Oregon and that the facts brought out in the Hall trial appropriately suggest them. Not only what the career of Mr. Hall proyes, but the many drawn into the case show, that crooked methods do not succeed in the long run unless you acree with Mr. that crooked methods do not succeed in the long run, unless you agree with Mr. Hall's letter that they all got into this trouble with the Government for just doing right; that to build a character and keep it stainless is a bigger triumph than to gain a political advantage; that old-fashioned flat-footed square-dealing is the hest policy even in political office; that the type of man that God and man honor is the one who when trusted with power and office, conservatively keeps in tact all that is right and radically insists that wrongs shall at once be made right. It is this character that Christianity It is this character that Christianity seeks to develop, and for which the church ought always to stand and which I advocated on Sunday night. If Mr. Hall was governed by these principles, while in office, he did not make it appear when , even in his own testimony. CLARENCE TRUE WILSON.

BLOCKS PARK BOARD'S PLAN

COUNCIL REFUSES TO PASS A SPECIAL SALARY ORDINANCE.

Squabble Over Appointment of Emil T. Mische as Parkkeeper Not Yet Ended.

Certain members of the City Council are opposed to the employment of Emil T. Mische, of Madison, Wis., as parkkeeper for the city at a salary of \$2500 a year, and the proposed ordinance creating a fund out of which to pay him was not put on its final passage yester-day, as Mayor Lane, the members of the Park Board and others had desired it should. There must be suspension of the rules in order to put an ordinance through on its first reading, and in order to suspend the rule, there must be unanimous consent of the members. When it was sought to accomplish this yesterday afternoon, Councilman Dunning objected, caus-ing the measure to be laid over. It must now go through the regular channels and cannot become a law, if at all, until the next session of the Council.

It seems that there is a division of sen-timent regarding the advisability of em-ploying a non-resident of Portland for the position. While this is evidently the primary reason for objection to the new man, it is known to a certainty that some of the Councilmen are indignant over the manner in which the Mayor and the members of the Park Board went about em-ploying Mr. Mische. It was done secretly, behind clesed doors, and when the Coun-cil did not pass an appropriation of \$3000, which the Board supposed had been asked for I. Lang, a member of the Board, addressed a communication to each Councilman, upbraiding them for alleged in-stignt of a public duty, and charging that by the Council's failure to appro-priate the necessary sum, the Park Board was greatly humiliated. While Mr. Lang has since apologized, after being assured \$5000, the sting still is felt by sor

of the Councilmen, and they apparently intend to ignore the Board.

Another matter not yet settled to the satisfaction of the Council is as to the disposition to be made of the present incumbent, Parkkeeper Monteith. He was granted an increase of salary to the extent of \$15 a month by the Council, but it seems to be the disposition of the Park Board not to pay the increase. They re-fused to do so last month, and no one seems to know what will be done with Monteith. Councilmen Concannon, Kella-her and others favor the retention of Monteith in the parks, at the increase they granted him, even if Mr. Mische

supersedes him in authority.

Some of the Councilmen yesterday de-clared that a salary of \$5500 a year for the new man is too much. Mr. Mische is due here March 1.

ENFORCES SQUARE DEAL

Council Passes Ordinance Creating Inspector Weights and Measures.

Councilman Kellaher's ordinance, ing the office of Inspector of Weights and Measures and providing for the stationing of deputies at every wood and coalyard in Portland, passed the Council yesterday afternoon and will become a law, as soon as Mayor Lane affixes his superstant of the council of signature, or after the expiration of the legal time limit, if he does not. That he will not veto the bill is thought to be certain, as it is said to be a measure purely for the benefit of the public.

purely for the benefit of the public.

The ordinance was recommended for passage by the ways and means committee, and passed without any comment, with but a few minor amendments. It is declared by those who have carefully investigated, to be one of the best ordinances ever framed for the projection of the householder. The new of tection of the householder. The new offices created by the measure will be filled by the Civil Service Commission. The by the Civil Service Commission. The Chief Inspector will draw a salary of \$125 a month, and the deputy who is actively to assist him, will be paid \$100 a month. The law provides for deputies to serve without pay in all wood and coalyards and such other establishments as may require the services of an inspector. Councilman Kellaher, the author of the law, declares there is a crying need for the measure, as he says the public is being cheated outrageously through short weights and measure in all lines short weights and measure in all lines of business, especially wood and coal.

Exhibition Game at Expo Rink Tonight.

Educational Problem Is Taken Up by the Y. M. C. A.

REFORM PUBLIC SCHOOLS

Leaders in Great Religious Organization Believe Industrial Training Is the Crying Need-Hold a Conference at Seattle.

A meeting of the secretaries of all Pacific Coast Young Men's Christian Associations was held in the rooms of the Seattle association last Monday and Tuesday, when a committee of seven carefully went over the question of industrial education, which is being advocated by leading educators throughout the country. Among those present at the Seattle conference were Fred B. Pratt, of Pratt Institute, New York; H. W. Stone, general secretary of the Portland Y. M. C. A., and M. A. Kees, educational director of the Portland association. Speaking of the meeting yesterday Mr. Stone said:

The statement was made over and over again at the Chleago convention of American educators, January 23 to 25, that the Y. M. C. A. is the best vocational school in the United States, although it cannot in any sense take the place of the public school system of the country. It is now training young men in more than now training young men in more than lic school system of the country. It is now training young men in more than 150 vocations. But there is an educational problem which must be taken up by secular schools of the country before the public schools will take it up. We have hundreds of young men who apply to the employment department for work, but who cannot do anything well. They haven't been educated. We can, perhaps, get one of them a job at \$40 a month, but after he has worked a short time he strikes the 'boss' for a raise, and as he is not earning any more than \$40 a month, is not earning any more than \$40 a month, he doesn't get it. As a result he quits, and seeks work elsewhere.
"It is a fact that we now have in this

country a large number of foreigners who are earning larger wages at their trades than are our own native-born young men. In fact between 75 and 50 per cent of the industrial work of the country is now done by foreigners. We

can't go on this way forever.
"The trouble is that the public school system is had in some respects. It is all right for boys who are especially adapted to some profession, but for the rank and file of young Americans it does not provide. It is geared up with the idea that every youngster is to become President or to enter one of the professions. What is needed is an opportunity. sions. What is needed is an opportunity for the boy, when he reaches the age of say 12 years, to receive his education with particular reference to the indus-trial line which he is to enter, rather than with reference to entering a pro-

"The steady increase in crime and juvenile delinquency in America is di-rectly traceable to our educational sys-tem. In Germany during the last ten years there has been a steady decrease in years there has been a steady decrease in crime and juvenile delinquency. Conditions in America ought not to be different, and the Y. M. C. A. is attempting to help solve some of these problems, which mean so much to us as a nation. "It was said at the Chicago conference that it would be necessary for some secular institution to take this matter up before the public schools could be induced to do so. We turn back into the public schools large numbers of the boys who come to us, as we believe that is the best place for them to get their fundamental education, but there is a technical training which the public school does not give. We have enough lawyers, doctors give. We have enough lawyers, doctors and preachers in the country now, what we need is men who can do material things."

COUNCIL AUTHORIZES CITY EN-GINEER TO ACT.

Official Voted Assistant and \$1000 Is Appropriated to Pay Prelim-

inary Expenses of Work.

An appropriation of \$1000 was voted by the City Council yesterday afternoon, and the employment of a com-petent consulting engineer authorized, to assist City Engineer Taylor in draw-ing plans and specifications for the proposed new bridge across the Willamette River at some point north of the Steel bridge. Pet lons are now by circulated for the proposed structure, which it is estimated will cost about \$3,000,000.

Councilman Menefee introduced a resolution directing City Engineer Tay-lor to ascertain the estimated cost, and to draw up plans and specifications for the proposed structure. As it is greatly desired by the citi-

zens of the northeast portion of the city, and those directly interested, that the matter should be hastened in every manner, the Council put the resolution and the ordinance on final passage yes terday afternoon, and both were made effective thereby, it being practically, certain that Mayor Lane will not veto the ordinance. The selection of a conculting engineer will be left to Mr

The proposed high bridge is absolutely necessary, it is used by those who are favorable to the project. At a recent conference of the East Side Improvement clubs, the movement was set on foot, and it has been made a special subject of attention on the East Side.

When Councilman Menefee introduced the ordinance yesterday, Councilman Celiars asked why it would not be a good plan to also authorize the City Engineer to ascertain the cost of construction of a tunnel under the river construction of a tunnel under the river at a point about Stark street. There seemed to be no enthusiasm, however, on this point, and the matter was al-

TO KEEP STREETS CLEAN

CHAMBER OF COMMERCE FA-ORS DISTRICT PLAN.

Co-operation of Various Civic Improvement Leagues in the Cause Are to Be Invited.

Portland streets are to be cleaned and kept clean if the standing com-mittee on municipal affairs of the Chamber of Commerce, composed of S. H. Gruber, James O. Rountree, J. C. Alnsworth, H. M. Cake, Matt Foeller and J. C. Bayer can have their recom-

mendations accepted.

The committee met yesterday at the rooms of the Chamber and discussed street cleaning in its different phases and agreed to advocate a plan of disoperation of the various civic and improvement organizations. Chairman Gruber, in referring to the matter last night, said that the old plan of doing a spot of cleaning here and there in the city had brought absolutely no satisfactory results, and the sentiment of his committee was that the city should be laid out in districts and responsible persons put in control of each district and be required to keep their districts clean.

The committee will meet again in a few days at the call of the chairman, at which time resolutions will be pre-pared to present to the board of trus-tees, together with recommendations that the different commercial and that the different commercial and civic improvement organizations be requested to act in harmony toward bringing about reform in the way of repairing and cleaning the streets of the city.

It was brought out at the meeting

that the streets should be put in first-class condition before the coming Rose Festival, when thousands of vis-tiors will be in Portland, and that it is most desirable the city make the very best possible showing on that

The committee will consider at the changed to electricity. Just what method shall be recommended to the Council of the city to accomplish the change has not been fully figured out, but that some early action by the au-thorities is to be favored is pretty well settled in the minds of the com-

STRIKE IN SHINGLE MILL

Forty Union Men Walk Out of University Company Plant.

As the result of a disagreement as o wages, 40 union workmen employed by the University Lumber & Shingle Company yesterday left their positions and are organizing for a fight against their former employer. The men repre-sent that A. J. Kroenert, manager of the mill, undertook to restore the 1996 wage schedule, amounting to a reduc-tion of about 1 cent per 1000, to both the sawyers and the packers. Mr. Kroenert, on the other hand, reports that the laborers entered into an agreement by which they were to work at the old scale, and after working two days, walked out. In view of these facts, the mill management contends that the men have worked themselves out of a job, since their places have been filled with nonunion men. "The former employes of the com-

pany have only themselves to thank," said Mr. Kroenert yesterday. "The mill had been closed down for some time, and the men came to us and agreed to work on a basis of the wage schedule of 1905 if we would start up. We agreed to the terms, and started the plant. Two days later the men said they were dissatisfied and walked out. We have secured other help, and expect no trouble in operating the plant

to its capacity.
"Under the 1906 wage schedule, packers were earning on an average \$3.50 a day, while the wages of saw-yers ranged from \$4 to \$4.50. Last year we paid wages averaging about 25 cents a day more for both sawyers and packers."

Asks Change of Venue.

LA GRANDE, Or., Feb. 12 .- (Spe cial.) — Judge Crawford today stated that arguments for a change of venue in the E. W. Bartlett case would be heard February 17. A motion was de-nied that the case come up here the last days of the month before the The committee will consider at the adjourned meeting some plan where-by steam motive power on the Harriman Fourth-street line shall be changed to electricity. Just what method shall be recommended to the Council of the city to accomplish the and he now asks change of venue to Umstills County.

PHOTO VALENTINES THE LATEST.

KILLS THE GERMS

One of the unchangeable laws of nature is that "like shall beget like." Parents who are related by the ties of blood, or who have a consumptive tendency, or other family blood taint are sure to transmit it to their children in the form of Scrofula. Swollen glands, brittle bones, weak eyes, hip disease, pale, waxy complexions, sickly bodies, running sores and ulcers, etc., are the usual manifestations of the disease. Those who have inherited a scrofulous tendency may succeed in holding it in check during young, vigorous life, but after a spell of sickness, or when the system begins to weaken and lose its vitality from other causes the ravages of the trouble will become manifest and sometimes run into Consumption. S. S. S. goes down into the circulation and forces out the scrofulous deposits, kills the germs and completely cures the disease. It changes the quality of the blood by removing all impurities and poisons, and supplying this vital fluid with rich, health-sustaining qualities. S. S. S. is a purely vegetable medicine, and is especially adapted to systems which have been weakened and poorly nourished by scrofulous blood. Literature on Scrofula and any medical advice desired sent free to all who write.

"The Man Who Hesitates Is Lost"

cialists and other physicians to ascribe cases of Lost Vitality to lack of nerve force, and to treat them as such with Tonics, Electricity and Stimulants, resulting in but temporary benefit—or none at all. Beware of such treatments. They not only WILL NOT CURE you, but CERTAIN harmful reaction is sure to follow their use. They never fail to leave you in a far worse condition than they

Every day there come to me men who have Every day there come to me men who have been nearly ruined by such treatments. Had these same men come to me in the first place I could have cured them in one-fourth to one-half the time required after they had been poisoned with powerful drugs, or victimized and rendered nearly incurable by "Cheap" treatments, Tonic Dopes, Electric Belts, or some other worthless makeshifts.

Never was the old saying, 'He Who Hesitates is Lost," more aptly illustrated than in the case of the man who suffers from WEAKNESS, VARICOCELE, a CONTRACT-ED DISORDER or CONTAGIOUS BLOOD DISEASE, and who neglects to have his allment treated.

My Fee In Any Uncom-Is Only plicated Case

Choose the Right Specialist

The most important thing for you to do, if you are an alling man, is to seek the services of THE RIGHT DOCTOR. Don't go to the first one you see, simply because he happens to be a physician. Choose the physician who makes a specialty of curing the kind of allments from which four suffer. The ordinary medical man really knows but little about curing diseases peculiar to men. He merely has a general knowledge of such diseases, because his practice is spread out over the whole range of diseases to which flesh is heir. He therefore knows a little about all diseases and not a great deal about any. If you should go to him he may conscientiously try to cure you, but not knowing HOW, he would have to experiment upon you. In brief, he is a medical "jack of all trades and master of none." Knowing these facts, would you want to trust your life in his hands? If your watch were to break or get out of order, you wouldn't take it to a machinist to have it repaired. No; you would know better. You would take it to the very best WATCH-MAKER you could find. Then why should you not use the same kind of good, sound judgment when you need a doctor? Your health is certainly as important as your timeplece.

Make Haste to Seek Expert Treatment Make haste to seek the services of the most skillful Specialist in Men's Diseases possible to you—the doctor who has a reputation for performing CURES. Don't put the matter off. Delay is dangerous. Every moment you are hesitating the disease is gaining greater headway and will be that much harder to cure. If you delay too long your condition will certainly pass beyond the power of human skill. Remember that your ailment will not cure itself.

Why My Methods Cure

Bear in mind that for twenty-five years I have made a specialty of the half dozen aliments peculiar to men. I do not dose the stomach with powerful drugs, as do other specialists. I have no electric belts or other trick-a-trap devices to sell you for a fat price—or any other price; neither have I any nostrums or tonics to work off on you for so much per; but I have developed a Direct-Method Treatment that will CURE ANY CASE of WEAKNESS in men. Instead of destroying the digestive and assimilative processes of the stomach and howels by filling them up with drugs, I apply curative medicines DIRECTLY to the DISEASED REGION, and thus effect a CURE in a comparatively short time.

short time.

In any diseased condition Nature needs help. The right kind of medicine administered TO THE CENTER OF DISEASE will assist Nature in overcoming inflammation and congestion, strengthen and REVITALIZE diseased tissues and soothe and heal, where barrels of drugs taken internally would merely impair the digestion, deplete the blood, weaken the vital functions and produce general have throughout the system.

. I WILL GUARANTEE A CURE AND YOU NEED NOT PAY UNTIL YOU ARE WELL

MY MODERN and up-to-date methods will effect a certain and sedy cure of CONTRACTED DISORDERS, LOST STRENGTH, and all flex allments. HYDROCELE and STRICTURE positively cured WITHOUT the

Specific Blood Poison

I cure this leprous disease complete. The system is thoroughly cleaned and every poisonous taint removed. The last symptom vanishes to appear no more, and all is accomplished by the use of harmless blood-cleansing remedies. Do not submit to the dangerous mineral dosing commonly indulged in. Such treatment merely obscures the

Varicocele, Cured Without Cutting

The time was when every man with varicoccle had no choice other than allow the alsease to go, undermining his power and health, or submit to a surgical operation. Now he can choose a thorough cure by painless treatment. I cure varicoccle in one week, and it is seldom necessary that the patient be detained from his business even a single day. My method is original with myself, and is the only safe and successful treatment for varicoccle ever devised.

EXAMINATION AND ADVICE FREE.

I offer not only FREE CONSULTATION and ADVICE, but of every case that comes to me I will make a Careful Examination and Diagnosis without charge.
