Dispute Over Number of Engineers Employed on the Boats.

TEST CASE TO BE MADE

Owners Desire to Cut Number of Engineers From Three to Two. Engineers' Association Resists and Trouble May Ensue.

SAN FRANCISCO, Feb. 14 .- At a meetred to deal with the Shipowners Association was instructed to refuse the demand by the owners that the force of engineers on steam schooners plying north of Crescent City and south of Point Conception carry but two engineers inatead of three, as heretofore. The result of this action doubtless will be a lockout of the engineers of the association to-

morrors

The owners attempted to take out the steam schooner Bowdoin, bound from this port to Gray's Harbor for lumber, with but two engineers today. They were unable to secure two members of the association to take her out, however, and she was detained until tonight, when two of the members were permitted to take her. Her owners will probably be arrested and tried under a provision of the Federal law which gives the United States Inspectors of Hulls and Bollers the right to designate what crew a vessel of the members were permitted to

Messra Bowles and Bulger, the United Messra Bowles and Bulger, the United States Inspectors, when appealed to by the engineers today, instructed the owners of the Bowdoin to carry three engineers. In spite of this the versel sailed with but two, on the understanding that a test case of the matter is to be made.

Today the shipowners belonging to the association met and unanimously decided to break the fight at this time assingt. to break the fight at this time against the rule of the engineers' association that three engineers must be carried. The ac-

tion of the engineers was perfunctory and in line with the decision of both sides to light the matter out. There are only about 100 steam schooners running along the Coast now, and about 300 engineers are affected. The en-gineers hope to induce the firemen, waiters and deckhands to go out in sympa-thy, but no action toward this end has us yet been taken.

GRAND JURY INDICTS UNION

Dock and Cotton Council Leaders of New Orleans in Tolls.

NEW ORLEANS, Feb. 14.-Seventy-two NEW ORLEANS, Fob. 1.—Seventy-two men, representatives of all the classes of labor employed on the New Orleans riverfront, and which compose a union known as the Dock and Cotton Council, were indicted by the United States Grand Jury today on the charge of conspiring to restrain trade in violation of the Sherman

anti-trust law.

The indictments followed the refusal of the Dock and Cotton Council to per-roll the Coulwheelers' Union to coal the steamer Habil, which cleared from here several days ago for Puerto Cortez. The it for the Habil signed an agreement the union, had its vessel couled, placed the matter in the hands of the United States District Attorney

Nevada Arming New Police.

RENO, Nev., Feb. 14.—Lieutenant-Governor Dickerson yesterday telegraphed a Chicago firm to ship by express 59 38-38-cailber Winchester carbines, 59 latest model Colts pistols, 100 rounds of ammunition for each gun and badges for officers and privates in the new police force to be organized under the recent act of the Legislature. Uniforms will be ordered by wire by the first of the week. All possible speed will be used to get the police in the field to relisve the Federal troops at Goldfield, according to the request of President Roosevelt.

Open Shop on Rio Grande Road.

DENVER, Feb. 14.—Notices were posted at the Rio Grande shops yesterday to the effect that after March 13 all agreements with shopmen as to wages, hours of work, etc., will be abrogated. Union men take this to mean that the future policy of the road will be to employ union and non-

PROTECT ALASKA FISHERIES

Secretary Straus Says Department Will Lend Aid to Cannerymen.

ASTORIA, Peb. 14.—(Special.)—L. O. Belland, of this city, superintendent of the Columbia River Packers' Associa-Hon's Bristol Bay, Alaska, cannery, has received a letter from Oscar S. Straus, Socretary of the Department of Commerce and Labor, relative to the enforcement of the recent order prohibiting all fishing for salmon in Nushagak and Wood Rivers, Alaska. The Secretary in his letter ways.

s letter says: "The department will undoubtedly have one or more representatives on Wood River or in the Nushagak Bay region throughout the coming season, and assurance is given you that the necessary attention will be paid to the and that the order be obeyed by all parties. The department expects that all camperyment partment expects that all cannerymen, and especially those who have supported the issuance of the order, will control their jown fishermen and prevent them from fishing within the closed district. The fishermen themselves having through The insermen themselves having through their representatives strongly urged the closing order, will presumably be disposed toward its right observance. In may case, it is the intention of the department to see that it is literally obeyed, dust what equipment will be available for the patrol of the region has not yet been decided, but it is not likely that it will be expedient to purchase a launch at this time."

Norwegian Liquor System.

LAUREL, Or., Feb. 12.—(To the Editor.)
-In the editorials of The Oregonian of

that we can learn something from other countries.

In dealing with the liquor question let us try what is called the Norwegian system. It had its origin in Gottenberg, Sweden, as far back as 1874. A number of good citizens are given a license to sell fiquor. They secure a large, plain hall with a har extending the full length or the hall; barrels of liquor are helind the bar; the hall is void of all attractions except the liquor, Customers going there pay for exactly the amount they wish to drink and the amount they are allowed to take home is limited. This system has been used in Sweden, Norway and Finland for a number of goars and the consequence is that no liquor is manufactured in Finland and women have equal suffrage.

If this letter is published I will write more on the same subject.

GLOVES, WAISTS.

Do not overlook the great special sale of long silk and kid gloves, white lawn waists, muslin gowns, skirts, drawers and corset covers, today at McAllen & McDonnell's, headquarters for linens, blankets, quilts and curtains.

Modoc Reserve Increased. WASHINGTON, Feb. H .- The President has signed a proclamation creating additions amounting to nearly 600,000 acres, to the Modec National Forest, in Northeastern California. All the lands put within the forest by this proclamation are in Modoc County, except a small area in the northern part of Lassen County.

Limits Drinking on Cars.

COLUMBUS, O., Feb. 14 .- Governor Harris today signed the Rothburn bill prohibiting the drinking of intoxicants on trains excepting in compartments of cars. Violation of the law is made a nisdemeanor punishable by fine.

HOUSE IS DOWN TO BUSINESS

Knocks Out Increased Salaries for Assistant Secretaries.

WASHINGTON, Feb. 14 .- Oratory in the House today gave way to legisla-tion, with the result that material pro-gress was made with the executive, leg-islative and judicial bills.

The first attack upon the increases taries of several departments which the bill authorizes, was made by Macon, Arkansas, who raised a point of order against the increase for the Assistant Secretary of State. He objected to increases in salaries proposed for other assistant secretaries, and, when the proposition affecting the Treasury Department salaries was read, these increases went out on point of order raised by him.

The proposed increase in the salary of the Supervising Architect of the Treasury was rejected on a point of order by Macon, who objected also to an amendment by Smith, Arizona, proposing increased salaries of the territorial judges of Arizona. Macon made another point against the increase of the salary of the Assistant Secretary of War and it was stricken out.
On a point of order by Mann the ap-

propriation for a monthly pilot chart of the North Pacific Ocean, published by the Navy, was stricken out.
Crumpacker, Alabama, offered an amendment reducing the mileage allowed to Senators, members and delegates from "90 cents to 8 cents but of the senators." gates from 20 cents to 8 cents, but on an objection by Inglebright, California, it was refused on a point of order.

MAY BE LABELED CORN SYRUP

Important Decision in Pure-Food Administration Announced.

WASHINGTON, Feb. 14.—An important question in the administration of the pure food act was settled today in a decision made public by Secretaries Wilson, Cortelyou and Straus. It bears upon the controversy regarding the labeling of syrup. The decision follows:

syrup. The decision follows:
"We have each given careful consideration to the labeling under the pure food law of the thick viscous syrup obtained by the incomplete hydrolysis of the starch of corn and composed essen-tially of dextroso, maitrose and dextrine. "In our opinion it is lawful to label this syrup as 'corn syrup,' and if to the corn syrup there is added a small per-centage of refihera syrup, a product of the cane, the mixture, in our judgment, is not misbranded if tabeled, 'corn syrup with cane flavor.'"

It is understood the decision has the concurrence of the President and a majority of the Pure Food and Drug Beard. Dr. Wiley, chief of the Chemistry Bureau of the Department of Agriculture, discenting on the ground that the label should be "glucose."

WHO SHOULD ISSUE MONEY:

Aldrich Bill Draws Out Various Views on Currency.

WASHINGTON, Feb. 14.—The Senate today gave attention to a speech on the Aldrich currency bill by Clay, of Georgia. Clay's declarations in favor of the issuance of paper money by the Government provoked a controversy between him and Republican Senators. Lodge and Teller both gave their views on the policy of issuing paper money on the policy of issuing paper money by the Government.

—Clay reviewed the banking system

of the country and carefully analyzed the plan under consideration for issu-ing emergency currency. He analyzed the Aldrich bill and de-clared it was wrong and victous, and would give no relief to the South and West He corrected that it simply would give no relief to the South and West. He contended that it simply enlarged the powers of the National banks, and that Congress was relinquishing the sovereign right to issue and circulate money, which it ought never have to do. The plan of the minority to the Senate for the Government to issue \$500,000,000 of Treasury notes and to use them in paying the expenses of the Government that they might find their way into all observed of trade, was advocated by all channels of trade, was advocated by

Clay said there are now in circulation \$350,000,000 of Treasury notes, not costing the Government anything and performing all the functions of money, and that this amount could be easily increased to \$500. own out could be easily increased to sow.

600,000 without in any way disturbing our
finances, and could not possibly result
in a depreciated ourrency.

"If the Aldrich bill becomes a law,"
said Clay, "the Government guar-

said Clay, "the Government guarantees the redemption in gold of the additional notes issued by the National banks. Would not this be as great a strain on the gold reserve as Treasury

notes?"

Teller spoke briefly, saying he wanted to make it clear that the issuing of money is not banking business.

"It is the exercise of a sovereign power," he said. "Where would we have been today if we had not slipped in and helped the banks? They were certainly unable to do business without Government aid?"

Government aid?"

"If," interposed Lodge, "we had a system like England, France or, best of all, Germany, the banks would have been able to meet the emergency."

Teller said that when the gold standard law was enacted in 1900, that was supposed to be a panacea for all ills, He said there was no reason why the Government should guarantee the notes of somebody else, but the theory was one thing and the present necessity was another. "The bill," he said, "is an attempt to provide practical treatment for a condition that may arise almost any time." nost any time."

EXPERTS TO HELP, FARMERS

Kansas Solon Has Plan for Better and Bigger Crops.

WASHINGTON, Feb. 14 .- Represen tative Scott, of Kansas, chairman of the House Committee on Agriculture, has conceived a novel plan which, he believes, if adopted, will enable the farmers of the country to produce bet-ter and far larger crops than hereto-

fore.

Mr. Scott's proposition involves the establishment of 100 experimental farms of one acre each in every county in a group of four Western agricultural States for the purpose of giving the farmers a practical demonstration of the best methods of growing different kinds of crops. It is proposed that the lands for this purpose shall be furnished by the farmers themselves, and that they 60 the work of cultivation under the direction of the experts of the Department of Agriculture.

No additional appropriation from Congress will be required to test Mr. Scott's plan, it is explained, as the Agricultural Department now has the requisite number of experts to carry

equisite number of experts to carry out the plan.

INCREASE OF PAY GRANTED

Committee Recommends 27 Per Cent, Less Than Asked.

WASHINGTON, Feb. 14 .- The longdeferred agreement to report favorably a substantial percentage increase of pay for the eplisted men of the United States Army, was reached today by the House committee on military affairs. The committee has decided to recommend an average increase approximating 27 per cent or 6 per cent less than was requested by General Bell, Chief of Staff. This increase will apply also to the enlisted men of the Marine Corps.

INLAND EMPIRE EXCURSION-ISTS AT LOS ANGELES

Welcomed by Former Oregon and Washington Citizens and Chamber of Commerce.

LOS ANGELES, Cal., Feb. 14.-(Special.) -More than 200 prominent citizens of Spo-cane and Walla Walla arrived this evening on the Inland Empire excursion for a week's visit and were formally welcomed at 8 o'clock at a big reception at the Chamber of Commerce, at which hundreds of Angelenos were present. More than 100 former residents of Oregon, each wearing a tiny blue badge significant of his native state, assisted in receiving the

Washingtonians.
At the Oregonian reunion Monday night several speakers said they came to this several speakers said they came to this
city because their interest was aroused
by viewing the California exhibits at the
Portland Exposition. Now they are fullfledged Angelenos, eager to boost this
section to their neighbors from the north.
President W. D. Stephens of the Chamber of Commerce delivered the address of
welcome to the visitors and responses
were made on behalf of the excursionists
by F. E. Goodall, president of the Spokane Chamber of Commerce, and Dr. N.
G. Bialock, National director of the Open

G. Blalock, National director of the Open River Association of Spokane.

Plain Facts About the Hair

It is the duty of everyone who is interested in hair preservation to learn enough about the subject to tell whether an advertisement for a hair remedy is reasonable or unreasonable. In this connection, the United States Post Office department has begun a much needed campaign against faise and misleading statements in advertisements in general. While this work is highly commendable and should be greatly extended, still at the same time it tends to paternalism rather than to personal self-reliance. It YOU know that the claims for a hair remedy are unreasonable and untrue, that knowledge will save you money and prevent disappointment,

The trouble lies in the fact that certain over-ambitious Proprietors employ advertising writers who do not know the composition of the remedies they write about, and even if they did, they are not expected to know the therapeutic action of the various ingredients. Two very familiar and off repeated statements are, that the hair must be watered and fed just like a plant, and that the color of the hair, once destroyed can be re-stored by natural process. While both of these state-ments are false in every particular, it requires some little knowledge of the hair follicle to understand why the statements are false,

The hair follicle is a pear shaped sack in the scalp that holds the hair root. At the bottom of the hair follicle and extending up into it for a short distance, is a nipple shaped projection that remains in the scalp when a hair root is forcibly pulled out. This pro-jection is the hair pupilla from which the hair "root" grows. The continuous addition to the bottom of the hair root forces the hair proper out through the

The hair papilla is surrounded by the hair root, which thus takes a bulbous form. Above the hair root or bulb-which occupies about three-fourths of the en-

tire follicle-is the neck of the hair follicle, below which the most penetrating fluids known to Medical Science can not penetrate. Therefore, the story of feeding the starved and impoverished hair roots with

an external application is all a myth. The short portion of the hair follicle above its neck opens somewhat like a funnel and is filled with the uter scalp,skir. Opening into this outer portion are the highly important oil or sebaceous glands which, from their location, are most exposed to disease. When these off glands become infected with a certain microbic growth (the cause of dandruff) there is hair disease and finally hair death. Fortunately this outer portion of the hair follicle can be treated by carefully rubbing into the scalp a suitable remedy. What remedy should be used? Manifestly one that will destroy the growth

be used? Manifestly one that will destroy the growth that causes dandruff, itching scalp, and falling hair.

Newbro's Herpleide is the first remedy that was prepared for the particular purpose of destroying this invisible vegetable growth. In fact, it is called the "ORIGINAL remedy that kills the dandruff germ." Newbro's Herpleide was not made until after Frof. Unna, of Hamburg, Germany (ask your doctor about him) discovered that dandruff is a highly contagious disease caused by a microbe. The almost marvelous success of Newbro's Herpleide has caused advertising writers to claim germicidal properties for other hair remedies, many of which were on the market years before Prof. Unna's discovery. De yea think that this new claim for old remedies is a reasonable one? Remember, that the hair gets its life, color, and strength direct from the blood, and that good blood, deep breathing, and sun-light, favor hair development. Outdoor exercise, to insure free circulation in the scalp, also scalp massaging for the same purpose, are very helpful. Worry, indigestion, and sedentary habits oppose hair growth, while the dandruff germ will actually destroy the hair, unless it is eradicated and kept out of the scalp with Newbro's Horpicide.

Herpfeide is delightfully cooling and refreshing to the scalp, and almost marvelous results sometimes follow its continued use. It stops itching of the scalp almost instantly.

Gained 24 Pounds in Four Months

MR. MICHAEL PITTS.

Mr. Michael Pitts, of Cambridge, Mass., who had been greatly run down and suffered agonies from "painters' colic," was completely cured by Duffy's Pure Malt Whiskey and gained 24 pounds in four months.

Thousands of convincing letters come from grateful men and women who, like Mr. Pitts, have been cured of different diseases by Duffy's Pure Malt Whiskey after all other remedies failed.

"Last December I suffered great agonies from a trouble known as 'painters' colic.' I tried many remelies, and after they had all failed me I took Duffy's Malt Whiskey, I found almost immediate relief. It completely cured me and I have gained 24 pounds in four (4) months, thanks to Duffy's Pure Malt Whiskey. I am able to work again and feel like a new man. I hope that my praises of Duffy's Pure Malt Whiskey will be taken seriously and in the right spirit by all men who suffer from diseases resulting from the use of paint. I assure you that you may en-

roll my name among the thousands who know that your tonic stimulant deserves the name of the best medicine on earth. Michael Pitts, 22 Donell street, Cambridge, Mass., April 16, 1907.

is an absolutely pure distillation of malted grain; great care being used to have every kernel thoroughly malted, thus destroying the germ and producing a predigested liquid food in the form of a malt essence,

which is the most effective tonic stimulant and invigorator known to science; softened by warmth and moisture, its palatability and freedom from injurious substances render it so that it can be retained by the most sensitive stomach, It cures nervousness, typhoid, malaria, every form of stomach trouble, all diseases of the throat and

lungs, and all run-down and weakened conditions of the body, brain and nerves. It is prescribed by doctors and is recognized as a family medicine everywhere. CAUTION—When you ask your drugglat, grocer or dealer for Duffy's Pure Malt Whiskey be sure you get the genuine. It's the only pure medicinal mait whiskey, and is sold in scaled bottles only; never in bulk. Price \$1.90. Look for the trade-mark, the "Old Chemist," on the label, and make sure the scal over the cork is unbroken. Write Dr. R. Curran, Consulting Physician, for a free flustrated medical booklet and free advice. Duffy Malt Whiskey Co., Rochester, N. Y.
