

VINCENNES FIXED FOR CARGO

French Vessel Will Load at Antwerp for Voyage to Portland.

RATE NOT MADE PUBLIC

Owners of Bark Have Chartered Her for Round Trip and It is Supposed That Association Prices Will Hold—Marine News.

Balfour, Guthrie & Co. have chartered the French bark Vincennes, which recently arrived out at Ipswich from Portland with a cargo of grain, to load general cargo at Antwerp for a return voyage to the Columbia River. While the rate is not made public as yet, it is understood that the owners of the French vessel will receive 40 shillings for the round trip westward with cement and home with grain of next season's crop.

SHIPPING COMMITTEE MEETS

Body Created by Chamber of Commerce Organizes for Work.

Members of the newly appointed committee on rivers, harbors and navigation of the Chamber of Commerce met Monday afternoon and organized for work. The committee is composed of J. C. Planders, chairman; William D. Wheeler, S. H. Myers, Philip Buchner, E. Wilcox, Peter Kerr, L. J. Wentworth, J. E. Laidlaw and D. C. O'Reilly.

The committee will make it a point to investigate any grievances reported by ships entering port and to keep shipping owners informed as to conditions existing here. The committee will meet upon call of the chairman at the Chamber of Commerce matters which may come up from time to time, and will hold regular monthly sessions.

CAPTAIN ANDERSON RESIGNS

New Master for the Henry Villard Arrives in Portland.

Captain Anderson has resigned as master of the American ship Henry Villard and will leave in a few days for his old home in Norway for an extended visit. Captain Davidson arrived yesterday from San Francisco and assumed command of the ship immediately. The Henry Villard is to charter to carry cannery supplies to Alaska for the Union Fishermen's Association of Alaska.

Captain Davidson is one of the best known masters of sailing craft on the Pacific. He was formerly commander of the American ship Emily Reed, which went ashore on Nehalem on the morning of February 14. On the voyage out from San Francisco Captain Davidson laid off and the ship was taken by Captain Kessel. It was the intention to have her former master join the craft on her arrival in Portland.

STORM GOES TO WESTWARD

Warnings Ordered Displayed, but Wind Dies Out.

At an early hour yesterday morning storm warnings were ordered displayed at all coast ports. Rain and fog fell rapidly and at 5 o'clock in the morning the wind was reported at North Head as blowing from the South at a rate of 47 miles an hour. Rain and fog hung over the bar, which was breaking badly. The storm, however, passed to the westward and the report from North Head last night gave a velocity of only 24 miles.

During the day frequent squalls were felt in Portland, but at no time did the wind exceed 18 miles an hour. Late in the afternoon the rain commenced to rise and the storm warnings were ordered taken in. During the illness of Forecaster Beals the local station is in charge of observer Loholz.

CAPISTRANO IS HELD BACK

Owners Join Association of Ship-owners and Vessel Will Not Sail.

Captain F. R. Harriman, master of the new steam schooner Capistrano, has been ordered by his owners not to engage a crew for the vessel and her sailing date has been postponed indefinitely on account of the engineers' strike in San Francisco. It was the intention of Captain Harriman to announce the formal turning over of the craft to the owners the latter part of next week and to sail immediately for Grays Harbor for a load.

Owners of the Capistrano have heretofore not been members of the Ship-owners' Association and the craft of the Mission line have continued to operate on the outside. The telegram to Captain Harriman would indicate that they had united with other owners against the engineers.

SAN FRANCISCO MARINE NEWS

Captain of Andromeda Deposits His Mate for Breach of Etiquette.

SAN FRANCISCO, Feb. 26.—Stodious politeness between the officers of the Triguanan barkentine Andromeda, apparently was not conspicuous during the protracted voyage of that vessel to this port from Australia. The Andromeda reached this port yesterday and Captain Turloff reported having had to depose the first officer from his position. Those on the battered barkentine say that the first officer was deposed because he insisted on keeping the captain awake by trudging over the poop deck late at night in heavy boots. The Andromeda occupied 120 days on the voyage from New-

castle and for 54 days encountered very heavy weather, during which her decks were continually filled to the rails and a number of sails were lost.

The American Shipmasters' Association of the Pacific Coast resent the statement attributed to members of the Redondo Chamber of Commerce that the majority of vessels wrecked at that port were in charge of drunken masters. Captain Alexander Bergman, secretary of the association, has drafted a letter of refutation of the statement, which is characterized as an attempt to whitewash the port of Redondo at the expense of captains of steamships who have lost their vessels in a harbor the fitness of which is questioned.

Several vessels have changed hands during the last few days. The brig Harry G. has been sold to J. A. Mathison, of Anacortes. The bark W. B. Flint has been purchased by F. W. Van Sicken. The steamer Enrol has been sold by Piper, Alden, Goodall & Company to W. P. Fuller.

The steamer Wandard, Captain A. Brullin, is chartered to leave the China Basin wharf on Saturday afternoon for Vladivostok, Siberia and North China. The Wandard, in addition to a large amount of flour and lumber, has a cargo of 100 tons of canned fruit.

At 25 shillings, Balfour, Guthrie & Company, charterers of the British steamer Arctic Stream, now at Portland, to carry wheat thence to the United Kingdom, Havre and Antwerp or Dunkirk.

The Compagnie du Bojeo has chartered the American schooner Wm. Renton, 275 tons, now at San Pedro, to convey lumber and other cargo to Grays Harbor and Santa Rosalia.

Entered Wednesday

Breakwater, Am. steamship (Mac-genn), with general cargo from Coos Bay.

Cleared Wednesday

Breakwater, Am. steamship (Mac-genn), with general cargo from Coos Bay.

Atlas, Am. steamship (Badger), with ballast for San Luis.

Hanuel, Am. steamship (McFarland), with general cargo for San Pedro and way ports.

Tungus, Nor. steamship, with 761,000 feet of lumber, valued at \$19,000 for Hongkong.

The schooner Oregon, from Bandon, with 49,000 feet of lumber, and the steamer Oregon City, from Port Bragg, with 210,000 feet, were the only vessels carrying lumber to arrive at this port today. The steam schooner Olympic came from San Pedro in ballast.

Marine Notes From San Pedro

SAN PEDRO, Feb. 26.—The North Pacific Company's steamship Geo. W. Elder, Captain Jensen, arrived this morning from Portland via Eureka and San Francisco.

The steamer J. B. Steison, Captain Bonfield, cleared for Everett to Redondo, taking freight and passengers for San Francisco.

The steamer Grays Harbor, Captain Andriessen, and the Fair Oaks, Captain Peterson, have cleared for Grays Harbor via San Francisco to load.

The schooners Meteor and Ludlow, which have been laid up at this port for several weeks, expect to receive orders within a few days to proceed north to Redondo.

Steamer Tungus Clears With Lumber

The Norwegian steamship Tungus cleared yesterday for the Orient with 28,000 feet of lumber, valued at \$9,000. This is the smallest quantity of lumber to be carried as a full cargo for a foreign port taken out of Portland for a number of years. Between \$9,000 and 1,000,000 feet is the average cargo of the steam schooners operating in the coastwise trade. The Tungus is a small craft and during the Russian-Japanese war was engaged as a blockade runner.

Cook Ill of Pneumonia

E. E. Black, cook on the British bark Crown of Germany, was taken to the Good Samaritan Hospital yesterday. He was suffering from a severe attack of pneumonia and his removal from the vessel to the hospital was ordered by Dr. Wheeler. The cook had been suffering from the grip for several days, but it was not until Tuesday morning that it turned into pneumonia.

Marine Notes

The French bark Ville de Dijon yesterday shifted to the stream.

The French bark Bayard began working grain yesterday afternoon at the elevator dock.

The oil tank steamship Atlas will leave today. She has been discharging oil at Portmouth.

The schooner Virginia will leave down from Goble today. She is lumber laden for San Francisco.

The German ship Nal will leave down today. She has been discharging oil at Portmouth.

The steamship Hanuel, for San Francisco and San Pedro, with passengers and freight, sailed last night.

The British bark Crown of Germany will move down to the elevator dock today from the foot of Mill street.

The steamship Breakwater sailed for Coos Bay last night with a full passenger list and a quantity of freight.

Arrivals and Departures

PORTLAND, Feb. 26.—Sailed—Steamship Breakwater for Coos Bay; Hanuel, for San Francisco and San Pedro; schooner Alvena, from Stella for San Francisco.

AGORIA, Or., Feb. 26.—Wind southwest, 24 miles. Arrived—Steamship 9:15 A. M. British bark Alexander Black.

YOKOHAMA, Feb. 26.—Arrived previously—Araba, from Portland, Or.; Hongkong; Leo Maru, from Seattle, for Hongkong; Hongkong, Feb. 26.—Arrived previously—Araba, from Portland, Or.; Yokohama; Asia, from San Francisco, via Honolulu and Yokohama; Cyclops, from Seattle and Tacoma, via Yokohama.

PORTLAND, Feb. 26.—Sailed—Straggary, from Tacoma, via Coronal, etc., for Falmouth.

ANTWERP, Feb. 26.—Arrived—Auchincarr, from Portland, Or., via Coronal and St. Vincent, C. V.

SAN FRANCISCO, Feb. 26.—Arrived—Home, from Coos Bay; barkentine Andromeda, from Newcastle, Australia; Sailed—Schooner Annie Larsen, for Grays Harbor.

BOURNE IN CONTROL

Keeps the Name of Schuebel Before President.

OTHERS CAN ONLY WAIT

Mention of Rival Candidates at the Present Time Premature—Junior Senator May Be Playing a Deep Political Game.

Failure on the part of either President Roosevelt or the members of the Oregon delegation to take some action towards selecting a successor to Oregon's States Attorney Bristol leads to the conclusion that Bourne is still exercising a controlling influence with the President in the matter. It had been reported that when Representative Hawley returned to Washington, the members of the delegation would confer and decide on some candidate who would meet with the approval of the President and bear the scrutiny of representatives of the Government who are assigned to inquire into the qualifications of candidates who may be named for the place.

But no such selection has been reported and the name of Christian Schuebel, law partner of W. P. Gray, of Oregon, remains before the President. All talk of T. J. Cleston and other aspirants for the appointment is altogether premature until Schuebel's name has been withdrawn. In the meantime, the Clackamas County candidate has the inside track so far as temporary position is concerned, but Cleston's friends are besieging the President and the members of the delegation with recommendations of his appointment. Cleston has been named by many members of the Multnomah County bar, various Circuit Judges and District Attorneys of the state and by Justices Moore and Bean, of the Supreme Court. But Cleston's candidacy is presumed to have been successfully checked by the opposition of Hensley, while John H. McNary, of Marion County, who was considered another possible aspirant, has declined positively to consider the position.

As a result of the failure to act in Washington, it is likely that Bourne, in the interest of his original candidate, Schuebel, is holding up the appointment of Bristol's successor until the Republican primaries can be held in well and the chances of Fulton for re-election have been determined. Should Fulton be put out of the contest, it is argued that Bourne, having intimate relations with the President, would be in a position to insist on the appointment of Schuebel. It is asserted no other construction can be placed on the failure of the delegation either to insist on the withdrawal of Schuebel's name or the nomination of another candidate to succeed Bristol.

FOR CITY ROCK-CRUSHERS

Special Committee Named by Council to Investigate Subject.

A special committee, composed of City Engineer Taylor and Councilmen Cellars, Menefee and Bennett, was elected by the Council in its meeting Tuesday to investigate the advisability of the purchase by the municipality of rock-crushers and the expenditure of \$25,000 therefor. It will be the duty of these officials to examine into every phase of the question and to make a report to the Council as soon as possible.

In the meantime United States Attorney Bristol, while maintaining his office at his private quarters in the Fenton building, is attending to the business of the District Attorney's office.

SPECIALIST

The doctor "thinks." The doctor treats. The doctor relieves the symptoms. A good doctor has some instruments and equipment for all ailments.

The specialist KNOWS. The specialist CURES. The specialist goes further and removes the cause. A good specialist has ALL scientific mechanical aids for his specialty.

There can be no comparison between the ability of the ordinary physician and that of the trained and scientific specialist. The former in trying to explore and conquer the whole field of medicine and surgery, becomes proficient in no particular branch. The latter conscientiously confines himself to a single class of ills and masters them. I do not scatter my faculties, but I concentrate them on diseases and weaknesses peculiar to the male.

YOU PAY WHEN CURED \$10

MY FEE IN ANY UNCOMPLICATED DISEASE MEN'S DISEASES MY SPECIALTY

I have treated hundreds of men who had long suffered a gradual decline of physical and mental energy as a result of private ailments and have been interested in noting the marked general improvement that follows a thorough cure of the chief disorder. My success in curing difficult cases of long standing has made me the foremost specialist treating men's diseases. This success is due to several things. It is due to the original, distinctive and thoroughly scientific methods of treatment I employ.

Weakness

So-called "weakness" in men is curable—fully curable. It has not been cured by those measures commonly employed, for they are methods based upon supposition and not upon fact. Weakness in men is due to a chronic state of inflammation in the prostate gland and not to a disordered nervous condition, as has been supposed. I treat the inflammation by a local process that does not fail to accomplish its purpose and with this condition corrected full and complete strength and ambition return.

Contracted Disorders

Every case of contracted disorder—fully curable. It has not been cured by those measures commonly employed, for they are methods based upon supposition and not upon fact. Weakness in men is due to a chronic state of inflammation in the prostate gland and not to a disordered nervous condition, as has been supposed. I treat the inflammation by a local process that does not fail to accomplish its purpose and with this condition corrected full and complete strength and ambition return.

Varicocele

Without using knife, ligature or cautery, I cure varicocele in one week. If you have a cure elsewhere and been disappointed, or if you fear the harsh methods that are resorted to in the treatment of this disease, come to me and I will cure you soundly and permanently by a gentle and painless method. Don't delay. Varicocele has its dangers and brings its disastrous results. If you will call I will be pleased to explain my method of curing SPECIFIC BLOOD POISON.

The DR. TAYLOR Co. Cor. 2d and Morrison Sts. Private Entrance 234 1/2 Morrison St., Portland, Or. HOURS—9 A. M. to 9 P. M. SUNDAYS 10 A. M. to 1 P. M.

more, the dealers now engaged in the business manage so to arrange things as to keep the supply short all the time.

GRATULATION FROM PASCO

Commercial Clubs Exchange Messages on Driving of Last Spike.

An exchange of courtesies and congratulations between the Pasco Commercial Club and the Portland Commercial Club went over the wires yesterday. The occasion was the driving of the last spike on the line connecting Vancouver and Pasco of the Spokane, Portland and Seattle road. The following was sent from Pasco:

Pasco, Wash., Feb. 26.—Pasco, the future jobbing center and battle ground between cities of the Coast for supremacy in the trade of the inland Empire, extends felicitations to Portland upon the completion of the railroad line that now unites us by the North Bank Road.

PASCO COMMERCIAL CLUB. Attest: J. E. Siersten, B. A. Kluge, Committee on Transportation. To which this reply was sent: Portland, Feb. 26.—Portland reciprocates Pasco's greetings. While our interests have always been identical, our new bond of union serves to cement the ties more closely. Your future growth means much to Portland. We congratulate you. PORTLAND COMMERCIAL CLUB. C. W. Hodson, President.

M'KINLEY FACING PRISON

Way Open for Passing Sentence on Land-Fraud Operator.

Horace G. McKinley, convicted land-fraud operator, will be brought before Judge Wolverton in the United States Court at 10 o'clock tomorrow morning for sentence. The impression prevails that McKinley will share a fate similar to that of his co-conspirator, S. A. D. Puter, who was sentenced to two years' imprisonment and fined \$7500.

Contrary to published reports there remains neither a motion for a new trial nor a motion for an arrest of judgment to be disposed of in McKinley's case before he can be sentenced. It is the practice of the Federal Court that where a motion, either for a new trial or arrest of judgment, has not been disposed of

STOMACH IS SEAT OF MAN'S LIFE

New Theory Advanced by Young Man Is Spreading Over Entire Country.

L. T. Cooper's theory concerning the human stomach, which he claims to prove with his new medicine, is being given more respect and comment every day.

Cooper claims that 90 per cent of all ill health is due to stomach trouble. When interviewed about his theory recently, he said: "Stomach trouble is the great curse of the 20th century, not so far as the civilized races are concerned. Practically all of the chronic ill health of this generation is caused by abnormal stomachic conditions. In earlier days, when the human race was closer to nature, and men and women worked all day out of doors, digging their frugal existence from the soil, the tired, droopy, half-sick people that are now so common, did not exist."

"To be sure, there was sickness in those days, but it was of a virulent character, and only temporary. There was none of this half-sick condition all the time with which so many are afflicted nowadays.

"I know positively that every bit of this chronic ill health is caused by stomach trouble. The human stomach in civilized people today is degenerate. It lacks tone and strength. This weakness has gradually come through a sedentary existence. I further know that few people can be sick with the chronic ill health that I treat. The sole reason for my success is be-

prior to the adjournment of the term before which the motion is offered, to hold that the motion has been waived.

All that is needed to complete the record in the McKinley case is for Judge Wolverton to grant a formal motion directing that the records show that the motion was made and overruled previous to the adjournment of the term of court at which it was presented.

ENGINEER TO PLAN BRIDGE

Council Provides for Assistant for City Engineer Taylor.

An appropriation of \$500 was authorized by the City Council yesterday afternoon for the purpose of employing a competent consulting engineer, to assist City Engineer Taylor in drawing up plans and an estimate for a new bridge across the Willamette River on Madison street. The ordinance was introduced by Councilman Rushlight, and met with no opposition.

"It is necessary to have a new bridge across the river on Madison street," said Councilman Rushlight, "and I will require a consulting engineer to assist our engineer in drawing up the plans and to secure an estimate of the cost."

Petitions are now being circulated for the new bridge, authorization for which must be given by vote of the people, under the initiative law. It is said that the present bridge is in an unsafe condition, and that a new one should be built at the earliest possible date.

Applies for More Watchmen

Immigration Inspector Barbour has applied to the department for the appointment of four additional watchmen to be used in guarding the Chinese crews of the various steamships plying between Portland and the Orient. Of late there have been many desertions from the ranks of the sailors on the vessels operating between Portland and Oriental ports, and it is only by the addition of watchmen that the landing of Chinese can be stopped.

Holly Pleads Not Guilty

R. H. Holly, colored, was arraigned before Judge Cleland, in the Circuit Court, yesterday. He is charged with assaulting John Degnor with a revolver, February 4. He pleaded not guilty, and the case was set for trial March 9.

Rich Hair

We publish the formula of Ayer's Hair Vigor. You know what you are using. Your doctor knows why it does things.

Ayer's Hair Vigor

NEW IMPROVED FORMULA

You may easily hide your ignorance of South Sea politics or North Pole explorations, but you cannot hide a scraggly, worn-out, ignorant-looking head of hair. Ayer's Hair Vigor is the natural exponent of intelligent hair culture. The hair promptly yields, becomes manageable, and appears well.

We have no secrets! We publish the formulas of all our medicines.
