MILLS DOUBLE CAPACITY Tie-Cutting Plants on Sandy River Are Active.

There is much activity among the small sawmills on the Sandy River. Davenport & Co. have secured control of the Bram-hall and the Fox sawmids, located a short distance from the Sandy. Already the Bramhall mill has been completely overhauled and remodeled and where be-fore it was cutting about 60 railroad ties daily, the output has been doubled. The Fox mill is being overhauled and the capacity will be about doubled. The new owners are experienced mill men and are improving both sawmills. Thes will new owners are experienced mit men and are improving both sawmills. Ties will be run into the Sandy River by flumes such as had been used before, and then rafted down to Troutdale. Sometimes there are many thousands of ties floating down the Sandy River in bunches, all mixed together. Each sometimes heard which is starmord

The market for railroad ties is never satisfied. Trout-dale continues to be one of the largest tie-shipping points in Oregon.
