Begins Court Proceedings to Condemn Right of Way on Bull Run Reserve.

WILL BE FORCED TO TRIAL

C. W. Miller, Representative of the Company, Says He Prefers This Method to Gift of Right by the Council of Portland.

Suit to condemn the right of way for an electric line across the Buil Run reserve that the City Council at its adjourned meeting last Thursday refused to grant, was yesterday begun in the State District Court, at Oregon City, by the Mount Hood Railway & Power Company. C. W. Miller, manager of the company, says that the suit will be forced to trial as quickly as possible, and yesterday expressed entire satisfaction with the turn taken by affairs. He retterated the statement he made on the floor of the Council chamber, that he did not place any particular value on a gift of the right of way from the city and, in fact, rather preferred to secure it by condemnation. Suit to condemn the right of way for

He declared emphatically that he has not expected the city to give him what he asked, and virtually admitted that the summary defeat of the ordinance he had submitted, asking for the right of way, pleased him better than its passage, in-assnuch as it removed all obstacles to the filing of the condemnation suit which was begun yesterday. In the former con-demnation suit, Mr. Miller explained, his company lost only because it could not show that application for the right of way had been duly made and by the city

The matter was not of sufficient me ment to justify a fight in the Council," said Mr. Miller. "If I had had plenty of time, I am satisfied that I could have proved to the Council that there was absolutely nothing objectionable in my or-dinance, but I could not afford to wait. Court is not held at Oregon City every month in the year as it is in this county, and we deemed it wise to get the suit filed in time for a hearing at the term of court that is about to open. This explains our unwillingness to wait indefinitely on the Council."

The suit commenced by the Mount

nitely on the Council."

The suit commenced by the Mount Hood Company yesterday is identical as to cause of action with the one dismissed several months ago. It is for the condemnation of a strip of land across lands owned by the city lying between the mouth of the Buil Run River and the county bridge across that stream five miles below the intake of the city water system. For most of the distance the strip is 100 feet wide, although through one purcel of land a 200-foot right of way is asked. A little more than 13 acres of land is sought to be condemned.

demned.

"The land is of little or no value," said
Mr. Miller. "In the former suit Mayor
Lane stipulated that it should be regarded as worth \$75 an acre, and in filing our present suit we make a tender of that sum for each acre. The land is miles below the city's intake and the question of polluting the water supply does not arise in the litigation."

HIDES PURSE IN STOCKING

Chehalis Woman, Accused of Theft, Searched and Money Found.

CHEHALIS. Wash. March I.—(Special.)—Mrs. Guy Morgan was arrested today, charged with stealing two purses containing \$220 from Frank McKnight, a Pe Ell merchant. The alleged theft was committed Wednesday, when Mrs. Morgan was left temporarily in charge of the store while a clerk stepped outside. When captured the woman protested her innocence. At the jail Sheriff Deggeller found her possessed of several hundred dollars. A careful search by two women whom the Sheriff called to his aid revealed the fact that in her effort to save all her loot she had not only kept the money, but that deep down in her stockings she had hid the purses as well. Case of Violation, Money Advanced Cannot Be Recovered, Declares Judge Galloway.

Primitive men did not need Cascarets.

They lived out-doors, ate plenty of fruit, and all of their food was coarse.

We modern people are different.

We exercise too little, eat little fruit; and our food is too fine, too rich.

We can't have the bowels clogged up and keep well.

It means that the food retained there decays. The decay creates poisons. And those poisons are sucked into the blood through the very ducts intended to suck in the nutriment. So we must make our choice
