Socialist Hunter Accuses Officers of Cruelty.

DEPLORES BOMB OUTRAGE

Declares Fanatic Injured Cause of New York's Unemployed-Six Russians and One American

NEW YORK, March 29.—Robert Hunter, the noted sociologist, today declared that he was not only present at the demon-stration of the memployed in Union Square that ended in a bomb explosion, square that enter in a counce exposion, but said had opportunity offered he would have addressed the crowd in defiance of police opposition and brought about a test in the court for the right of free speech. It had been advertised that Mr. Hunter would address the meeting, but in the excitement that followed the action of the police in driving the rowds from the square, he was lost sight of, and not ontil today was it generally known that the settlement worker was on hand prepared to carry out his part of the programme, even if it

ter was set forth in a statement over his signature given to the Associated Press. The writer deplored the "outrage" of the bomb, and referred to its author as a tanatic who injured the cause of the unemployed. Mr. Humer said until he arrived at the square he was ignorant of the fact that speech-making had been forbidden. He learned this of the police and then destermination to speak, in order that the right of peaceful assembly and free speech might be trated in the courts. He added that he had no chance to be heard, for the "police charged the crowl eard, for the "police charged the crowd with incredible brutallty."

heard, for the "police charged the crowd with incredible brutailly."

Mr. Hunter described his own escape from under the horses' hoofs; told how he was dragged by efficers from the steps of a building from which he had hoped to speak, and how what was intended as a peaceful assembly in furtherance of aid for the unemployed was broken up with a scene that he thought could not be displicated outside of Russia.

Selig Silversiein, the youth in whose hands the bomb exploded as he was about to hard it at Captain O'Reilly and his squad of 29 men, bas still alive in Bellevue Hospital tonight. Though the explosion tore off his right hand, temperarily binded him, and caused frightful bodily injuries, he may survive. As yet, he cannot see, but the sight of one evenay be restored. Seven men arrested after the bomb exploded were arraigned after the bomb exploded were arraign-

A general committee of the local Sociologist party met today and set forth their side of the story. They claimed that the meeting was made up of law abiding persons, and accuse the police of incuting the people to riot. Many statements were issued by individuals, all deploring the act of violence and all taking the police to account.

EQUAL TO STEAMSHIPS Sailing-Vessels Make Remarkable

Time Down the Coast.

SAN FRANCISCO, March 29.-The schooners Spokane and Salem had a great race down the coast. They both started from Puget Sound and crossed out into the open occan almost at the same time. The Salem was the winner, making the very remarkable time down the coast of four days from Everett. The Spokane was five days from Port Gamble and 42 days from Port Townsend. Each vessel is commanded by a Captain Jamleson, who, although they are of the same name, are

not related.

The records of the two vessels in the race showed unusual speed for sailing vessels, the time being equal to that of some of the coast steamships.

Second Explosion in Hanna Mine of Terrific Force.

LISTS OF THE DEAD VARY

at 71-Bravery of Workmen in Going to Rescue Responsible for the Large Death-Roll.

DENVER, Colo., March 29.—A Republi-can special from Hanna, Wyo., says that a carefully prepared list of the missing as a result of the two explosions yesterday in mine No. 1 of the Union Pacific Coal Company contains 58 names, and of this number five dead bodies have been recovered. Before further attempts at rescuing the dead men can be made, the fire in the tenth level, which was the direct cause of the two explosions, must be ex-

It was while Superintendent Briggs and 17 companions were fighting the fire at the tenth level yesterday that the first explosion of gas occurred. But one man s known to have escaped death who was is known to have escaped death who was with this party. This was Charley Harris, colored. After going to his home to notify his family of his escape, Harris returned into the mine with the rescuing party organized by State Mine Inspector tunates who met death from the first ex-plosion. Harris' name appears in the list of missing resulting from the second ex-

Rescue Party Scatters.

According to the story of Alfred Campbell, who reached the entrance to the mine with the bodies of Warburton, Munson and Perry, killed in the first explosion, and thereby escaped death him self, Inspector Elias scattered the mem bers of the rescue party through the entrance for a distance of 1500 feet, re-moving wrockage and making temporary repairs. The fire at the tenth level wa repairs. The fire at the tenth level was raging furiously and inspector Elias and several others with him discussed the wisdom of bratticing No. 8 entrance. It was decided that this would be suicidal, as the gas would be forced back on to the fire at the tenth level and would probably cause an explosion more terbably cause an explosion more ter rific and direful than the one which had already snuffed out a score of lives. The party continued to work their way slowly toward the fire, abandoning the idea of closing No. 8 entrance way.

Stragglers Cause Explosion.

the stragglers in the rear, struck with the same idea of cutting off the spread of gas by closing this entrance, imme-diately put the plan, into effect, with the result as reasoned out by Ellas and his immediate followers. Be that as it may, the second explosion occurred, and, although it is known that 58 persons met death in the two explosions, preparations are being made to care for more than this number of bodies should it become

sary.

reason that no definite estimate
me number in the mine when the econd explosion occurred can be made second explosion occurred can be made is that the rescue party was made up hurricity and many who went into the mine entered after the first regularly organized squad had been inside the mine several minutes. It is known that a dogen or more of the rescuers were sent back to the surface, to get supplies with which to work. Campbell remembers that this order was given, and believes that the men started on their lieves that the men started on their crrand. He does not recall who they were and is not sure they ever reacued the outside. If so, they possibly had no time to re-enter the mine and there-

Tennant's head and one arm were blown off. His ployed by the Parific States Telephone head has not been found as yet. The dismembered arm was found quite a St. John, and is survived by his wife.

distance from where the rest of the body was picked up. The evidence of the terrible force accompanying the second explosion makes certain that none can possibly have lived through it and if any did the deadly gases that spread throughout the mine quickly asphyxiated them.

That none hesitated in responding to the call for volunteers in the rescue of their fellow workers after the first explosion is shown in the fact that scarcely a working force of the three mines of the Union Pacific Coal Company in this camp is left. All were in the mine seeking to aid their siricken friends when the second explosion transformed mine No. I into a shamble.
