TWO MORE GRAIN SHIPS CHARTERED

En Route List to the Columbia River Increased by Sailing Craft.

TO LOAD NEW CROP WHEAT

One May Take Cargo on Pugel Sound-French Bark Will Bring Coal From Newcastle to Portland-News of Waterfront.

cas. The French back Societacquelein was fixed to bring a carge of oad from Newcostle, N. S. W., to the Columbia Newcomatie, N. S. W., to the Columbia River, and the British bank Balmoral was chartered to carry outward grain, now comp. October of Newtonber Institute. The Balmoral has the option of Poget Sound in Portland leading. The rate on the latter craft was IT shillings and 6 perce. The Halmoral is a vessel of 24th set tone register and is now in the harbor at Callan, at which port she arrived March 2. She will probably come south in tailast.

tallist. There are a number of disengaged ves-pais in the barbor at the present time. The latest addition to the fleet of vessels nithout charter is the Joans Francesca. She has been reported as fixed for act-ward loading but no confirmation of the typert can be secured. The vessels now in port are not available for new crop, business and the rates for this season's arein are so low that the owners cannot secret.

The only craft flying the French Hag-which is on the disenguaged list is the Corall Eart. If business is not sectived within a short time she will take ballast and sall in quest of a charter, claiming money on the French bounty act. She was offered a lumber charter which was

WORK IS BEGUN ON JETTY

Contractors Will Supply Rock During Spring and Summer.

Work on the jetty at the mouth of the Columbia River will be resumed tomorrow and will be rushed as rapidly as possible ducting the Summer months. The tig Samaon, which has been tied up at Yancouver for some time, will go into commission today and will proceed at once to Pieber's Landing, where she will pick up a barge load of cock for Fort Striems.

Streens. Colonel Rocaster, in charge of the United States Engineers' office for this district aucocoded in making arrangements with the contractors, whierebe they were to continue to furnish rock for the letty work and to await adepties by Congress of the sundry civil bill for the money. The amount of Londs on hand was approximately \$80,000, which will be used to pay the laborens at Port Steven. The contractors for the rock and materials will walt for the money.

WIRELESS CIRCUIT

Messages Are Exchanged With All Stations but One on Pacific Coast.

EXPERT EXPLAINS SYSTEM

Ex-Government Employe Gives Interesting Data on Communicating Through Air and Prophesies. Still Greater Wonders.

The Council Crest station of the United Creless Telegraph Company has just een put in operation and is now work-ing with San Francisco, Tatoon Laami ad the Table Binff station, near Sureka.

ing with San Francisco, Tatoosh Island and the Table Stoff station, near Strekks, Cal. The operator at Council Crest can bear all wredeas stations working from Varcouver Island to Magdagana Bay. The only station on the Pucific Coast that the Portland operator continct lafk with a that at Sike, Alexks, Sunday night the Council Crest uperator picked up the atomiship Sisterprise, so relies out from San Prancisco for Honolulu.

13. L. Milligan is an export in wheleas work, who was in the Government empion for years and has watched the development of wireless telegraphy from the first few attempts at transmission of messages without wires, when inventors first succeeded in sending a distance of four infles. Mr. Milligan came here to tune the local station. Tolk is reduced necessary by the fact that different mations send out other waves of different lengths. Three have to be harmonized a process that is accomplished by a special device.

In Service for Years.

In Service for Years.

Mr. Milligan was an electrical engineer in the United States Signal Corps for years and installed wireless apparatize in the Jolo Peninsula. Philippine islands. He also not in the wholess station at St. Michaels. Alaska. This was established in 180 and was the first commercial wireless station ever established. Mr. Milligan says \$4000 words of press matter were handled by this station on the night of President Rosesvelt's election.

This station will handle all the degraph business of the Seward Peninsula. "ask Mr. Milligan. "At the time we were installing this station. I noticed telegraph poles placed near Nome that were put there in 1866 by the Western Union, which started a line to Europe by way of

startical a line to Strone by way o Behring Stratts that was projected across Siberia. But while this line was build inc. the Sred cable was laid across the Atlantic and the Alaskan line was benefit to the strategy of the

Atlantic and the Alaskan line was abandoned.

The best line of wireless stations in the world will seen be installed on this Coast. Wireless telegraphy works here better than in the East, because there is less himidity in the alt. I shall go from Partland to Alaska, where the company will install it attations. The United Wireless Telegraph Company new has about 100 land stations and 120 steamers have been equipped with its apparatus.

Wireless telegraphy is not wholly new, although the receiving and sending apparatus that has perfected it is new. The theory is as old as the Bertialah ways. Morse, who perfected the old system of telegraphy; really transmitted a wireless message across the Susquehans filter, although he believed he was sending the message under the river, vires were laid to the water's edge on each side and the message was carried in the other instead of the water.

Travels Fast as Light.

Travels Fast as Light.

When a message is started by wireless telegraphy, it is not altogether inlike a pebble droped in a lake. Waves
are started in each direction and travel
faster than lightning. The wave is about
300 meters long, which means it extends
that far above the surface of the ground,
or water, although a theory naw somewhat generally accepted is that the wave
is half above and half beneath the surface. These waves have no resemblance. face. These waves have no reasonblance to sound, for sound waves move in the air, the Herteian wave is in the ether. These waves travel as fast as light. ISONO miles a second. If one of these waves were sent from the Portland station and lasted a single second, it would, at the end of the second, pass Portland on the seventh lap around the world. The further a wave travels, the more energy is lost, although it will cross mountain ranges, pass through elies, forests, and leap across an ocean before breaking up. The ocean offers the best surface for the waves to travel. They will so further without being broken up and lost.

"Wonderful as wireless telegraphy has

Livers Exchanged

IF the active liver of the cod-fish could be put into the place of the torpid liver of the consumptive it would probably do him a world of good. Next best thing is

Scott's Emulsion

of Cod Liver Oil. Almost as good as a new liver. The great power of SCOTT'S EMULSION as a flesh-producer proves that much of the activity of the cod's liver is contained in every spoonful.

A large sample will be sent free upon receipt of this set, and your address. SCOTT's BOWNE, 400 Pearl St., N.T. All druggists; 50c. & \$1.00.

UNREARABLE

Terrible liching Burning Skin Disease Now Quickly Cured.

breaking up. The ocean offers the best surface for the waves to travel. They will go further without being broken up and lost.

Wonderful as wireless telegraphy has been, I believe there are great discoveries yet to be mind along the same file. I believe we will make sunlight by the proper control of ether wave. The wave differs only from light in the number of vibrations, and it is a question only of withing waves short coough such the vibrations, and it is a question only of withing waves short coough such the vibrations high enough to make daylight. When, that is accomplished, we shall have color photography.

Send Power Through Air.

It think there are great possibilities in future for the transmission of power without wires in the same way. There is now a question whether electricity it making a pathway for the electricity. I have seen a motor that Tusia operated across a hail without wires the work power being sent through the air.

Wireless telephones are already accomplished. Admiral Evane feet is quipped with these instruments, which were used repeatedly on the trip sround to the Partice Coast. Thoy work in the same way as wireless telegraphy, sending and receiving an other wave of high frequency.

The uses of the wireless are almost limitless. It has been developed intil now two measures can be received in the same station, the old system. This is exceed a hortly as only and the only operators can work at the same time at the same station, the old system. This is greatlessed to apply it. It was mirrounded to apply the first the only work in the same station, the old system. This is accomplished by changing the frequency of the spark.

OPENED TO PUBLIC THURSDAY, APRIL 9

WE CURE MEN

Our Cures Are Thorough and Permanent

NO EXPERIMENTS! NO FAILURES! OUR GUARANTEE—NO PAY UNLESS CURED MEN-When You Need the Services of a Doctor, Con-

sult One of Wide Experience. WE ARE just now completing our TWENTIETH year as specialists in MEN'S DISEASES. If we accept your ease for treatment a cure is but a matter of reasonable time. Each and every patient receives skillful, scientifle and expert treatment, and he sees and knows from the beginning of treatment that he is getting the BEST medical attention obtainable, and

that the cure he craves is being rapidly brought about. Our entire time and practice is devoted to the cure of BLOOD POISON. VARICOCELE, STRICTURE, LOST VITALITY, HYDROCELE, PILES, FISTULA, DISEASES OF THE KIDNEYS, BLADDER AND PROSTATE GLAND, CONTRACTED DISORDERS, WEAKNESS AND ALL DIS-BASES COMMON TO MEN.

OUR METHODS are up-to-date, and are indorsed by the highest medical authorities of Europe and America. Hence our success in the treatment of men's diseases. MEN, if you are suffering from any disease or weakness, we want you to know you have a friend in us, We want you to feel that you can come to us, with the troubles you'd tell to your closest friend or that you would even hesitate to tell him. Our relations will be as PRIVATE and CONFIDENTIAL as they have been with multitudes of others who have received our assistance. Be careful in selecting a doctor to treat you, for it all depends upon the physician you go to as to whether you get the cure you seek. WE FULFILL

CONSULTATION AND ADVICE PREE. TERMS reasonable and made to suit the convenience of the patient—our services are within the reach of every one. If you cannot CALL, write for self-examination blank and free literature. Many cases can be cured at home. OFFICE HOURS: 9 A. M. to 8 P. M., daily; Sundays, 10 to 12 A. M. only.

ALL OUR PROMISES and never hold out false hope. You need health and strength first -that's money;

OREGON MEDICAL INST. 2911/2 Morrison St., Bet. Fourth and Fifth

PORTLAND, OREGON

SPECIALIST

The doctor "thinks." The doctor treats. The doctor relieves the

symptoms. A good doctor has some instruments and equipments

The specialist KNOWS. The specialist CURES. The specialist goes further and removes the cause. A good specialist has ALL scientific mechanical aids

for his specialty. for all ailments. There can be no comparison between the ability of the ordinary physician and that of the trained and scientific specialist. The former in trying to explore and conquer the whole field of medicine and surgery, becomes profesent in no particular branch. The latter conscientiously confines himself to a single class of ills and masters them. I do not scatter my faculties, but I concentrate them on diseases and weaknesses peculiar to the male.

I have treated hundreds of men w ho had long suffered a gradual decline of physical and mental energy as a result of private ailments and have been interested in noting the marked general improvement that follows a thorough cure of the chief disorder. My success in curing difficult cases of long standing has made me the foremost specialist treating men's diseases. This success is due to several things. due to the study I have given my specialty; to my having ascertained the exact nature of men's ailments, and to the original, distinctive and thoroughly scientific methods of treatment I employ.

To those in doubt as to their true condition who wish to avoid the serious results that may follow

neglect. I offer free consultation and advice, either at my office, or through correspondence. If your case is one of the few that has reached an incurable stage, I will not accept it for treatment, nor will I urge my services upon any one. I treat curable cases only and cure all cases I treat.

My Fee Is Only

In Any Uncomplicated Case Pay After I Cure You

STRICTERE-My. treatment is absolutely painless and perfect recan be depended upon in ev-I do no cutting or dilating whatever.

Contracted Disorders

Every case of contracted disease I treat is thoroughly cured; my palients have no relepsos. When I pronounce a case cured there is not a particle of infection or inflammation remaining and there is not the slightest danger that the disease will return in its original form or work its way into the general system. No contracted disorder is so trivial as to warrant uncertain methods of treatment, and I especially solicit those cases that other doctors have been inable to cure.

I have the largest practice be-

cause I invariably fulfill my promlises. My Colored Chart, showing the mile anatomy and affording an interesting study in men's diseases free at office. SECTFIC BLOOD POISON—No dangerous minerals to drive the virus to the interior, but harmiens blood-cleansing remedies that remove the last poisonous faint.

Varicocele

Without using knife, lighture or. caustic without pain and without detention from business. I rire detention from business. I the Varioceele in one week. If you have sought a once elsewhere and heen disappointed, or if you fear the harsh methods that most physicians employ in treating this disease, come to me and I will cure you soundly and permanently by a gentle and painless method. Don't delay. Varioncele has be dangers and brings its disastrous results, if you will call I will be pleased to explain my method of suring.
