That Tired Feeling

That comes to you every spring is a sign that your blood is wanting in vitality, just as pimples and other eruptions are signs that your blood is impure.

One of the great facts of experience and observation is that Hood's Sarsaparilla always removes that Tired Feeling, restores the appetite, gives new life, new courage, strength and animation; cleanses the blood, clears the complexion, builds up the whole system.

This is one of the reasons why Hood's Sarsaparilla is the Best Spring Medicine.

MINE MAKERS ORGANIZE

Form Association to Exploit Coeur d'Alenes by Square Dealing.

Not Decided About Stanford.

STANFORD UNIVERSITY, Cal., April 6.—Regarding the announcement at Spokane and Portland by President David Starr Jordan that within five years Stanford would be transformed into a great graduate school, with neither freshmen nor sophomores represented, Professor Stillman, head of the chemistry department and acting president during the absence of the president, and Professor John C. Brannan, vice-president, gave out the following interview last night:

"President Jordan's idea has been under consideration for some time, but thus far it has not reached the stage of discussion. Dr. Jordan has been conferring with prominent educators throughout the country, but no steps have been taken to present the scheme to either the faculty or the trustees. When that formal move will be taken is uncertain. It is

select its representative. A constitution and by-laws were adopted that provide for the exploitation of the district by the association, for a fair deal for every legitimate mining promoter, but which frowns with disfavor upon the least sign of wildcat mining. A member of the association who makes a false report on stock or property, or who reports fictitious sales or circulates false rumors, will be ousted, and every member notified of his discharge.

WALLACE, Idaho, April 6.—(Special)—Not since the last state political campaign has there been evinced so much enthusiasm in this city as tonight, when the mine makers of the Coeur d'Alenes organized for the primary purpose of boosting Six hundred delegates filled the main body of the theater, and from the moment the three special trains arrived in Wallace until the meeting adjourned enthusiasm was beyond bounds, finding expression in applause, cheering and shouting.

E. F. Samuels, chief owner and manager of the Slocum mine, was unanimously elected president. He was unable to attend, being sick, and C. H. Jackson, first vice-president, presided.

The constitution provides for 14 trustees to be selected from various districts of the Coeur d'Alenes, each district to

within the province of the board to make out of Stanford any kind of a university it sees fit. Nothing prevents the trustees from making a change even more radical than the one suggested by Dr. Jordan."

JAPANESE JINGOES ARE BUSY

Find Material in the Fisher Incident at Harbin.

TOKIO, April 7.—Negotiations between America and Russia concerning the administration of affairs at Harbin are being closely watched by Japan. The alarmist newspapers suggest Japanese administration of South Manchuria as the real object of American action. The sensationalists connect the coming of the American fleet with possible future representations concerning South Manchuria.

A Washington special says the Government has decided to oppose the action of Russia and Japan in Manchuria. A dispatch from Harbin quotes Consul Fisher as saying that the American Government on its own initiative demands the abandonment of Japan's present status in Manchuria. These telegrams have aroused much comment. The Japanese Foreign Office, however, refuses to accept the sensational view, and says that it is not prepared to believe that the American Gov-
