The part of the Blood that gives it red color is the mass of microscopic bodies called red corpuscles. These also carry oxygen, the great supporter of life, to every organ of In anaemia these red corpuscles

are reduced in number and the patient becomes pale and weak. It is the oxygen they carry that enables the stomach to digest food. Reduce the quantity and indigestion

There is also a close and scientifically recognized relation between the number of red corpuscles in the blood and the health of the nerves.

Dr. Williams' Pink Pills actually and indisputably increase the number of red corpuscles in the blood and therefore increase its oxygen-carrying capacity. In this way they core anaemia in the most direct way and give color to the cheeks and lips, prevent and cure stomach trouble and rheumatism and have proved of wonderful value in neryour troubles.
