Charity Dance Proves Great Success.

SIR KNIGHTS

Brilliant Assembly Gathers at Ma-Is Realized for Support

of Baby Home.

One of the most brilliant affairs of recent years was the charity ball given last night in the Masonic Temple by Oregon Commandery, No. 1, Knights Templar, in aid of the Baby Home. Over 1000 people joined in the danc-ing. The committees in charge were much gratified with the results of their efforts, and a substantial fund is as-

sured for the worthy charity.

The entire four floors of the new Masonic Temple, at Yamhill and Park streets, were used in caring for the large number of guests. The handsome ballroom on the second floor, which was used for the second time last night, was tastefully decorated with flags, ferns and paims and myr-fads of colored lights. A large Ma-sonic emblem, composed of red, white and blue incandescent lights, covered one entire wall and lent a brilliant dash of color to the ensemble. Many handsome gowns were worn. The

mented orchestra.

The ball opened with an intricate Templar movement, executed by the drill corps of Oregon Commandery No. 1, which lasted 15 minutes.

The reception-rooms on the fourth floor were given over to card-playing and were crowded throughout the evening. During the early hours of the ball the following programme was ren-dered in the cardroom by the Wilder Harp and String Quartet:

BANKS READY TO REPORT

Portland Institutions Have Less Deposits, but More Depositors.

Calls for reports to the Controller of the Currency are expected any day by the Portland National banks. More than the usual 70 days have elapsed since the last call but this is generally accounted for by the retirement of William B. Ridgely as Controller and the appointment of Lawrence O. Murray. It is expected that the new Controller will Issue a call at once in order to familiarize himself with

banks which he controls.

As far as Portland National banks go, the information that will be asked for within a short time, it is believed, will show that deposits have shrunken somewhat, although the banks are recovering in fine shape from the money tightness of in fine shape from the money tightness of last Fall. Although it will not appear in the statements, it is a fact that the local banks have more depositors than ever before, showing confidence in the financial institutions.

Current business is not up to normal for this season and the people are drawing on the money received for last year's crop. This accounts for smaller deposits. The lumber business, which is usually at its heat during the Spring months, is very full, due to the controversy between the raliroads and the lumbermen over rates. This is one of the biggest items in the business of this section and the falling off in the total deposits is largely attributable to this cause.

Buy now and get in at rock bottom rance-20c per share

Our stock is being taken up with surprising rapidity. The millionaire, the merchant, the doctor, the lawyer, the mechanic, are all buying it. Why not you? I And do it now. We want to hear the hum of the wheels of our mill within a few months, then the shipping of our lumber, and then the income. Will you be one of the lucky ones to share in the profits? \$100 invested now will give you

I can positively convince you that there is no better investment on the present market than the

one here offered.

Think of it! Four billion feet of high-priced, hardwood, merchantable timber, located on the Coast, accessible and easily logged, on good, wide, tidewater rivers. The market for every foot of this vast tract is already established, and the profits will be enormous. Ten million feet per year can be sold in the immediates, ricinity of our plant. This one market guarantees a net profit of 30 per cent on the entire investme ent, and represents but a small propor-

tion of our output. This large tract of timber is located on the Pacific Coast, where we have the best shipping facilities to any port in the world available.

The timber consists principally of the highest-priced v goods used in the manufacture of pianos, hotel fixtures, shipbuilding, railroad and electric cars, he use and office trimmings, furniture, and

many other indispensable wood commodities.

The woods comprise MAHOGANY, LIGNUM VITAE, EFONY, CEDAR, ROSEWOOD, OAK, RUBBER, BALSAM, COPOEBA, COCOBOLA.

The net price of this valuable tract of timber is less than 20¢ PER THOUSAND FEET, and most of it finds a ready market at prices ranging from \$100) to \$400 per thousand. The LIGNUM VITAE is in great demand, and marketab he at more than \$1000 per thousand feet. The Board of Directors of the Northwestern Exploration & Development Co., which controls this timber, has authorized me to sell a limited number of share 3 of its stock at 20¢ per share (par value

\$1.00), for the purpose of installing a plant of sufficient size it is meet the demands of the market.

I have on exhibition at my office samples of wood (high by polished), cut from this tract; also cruisers' reports and other data, which will convince at onc a the most skeptical of the wonderful

money-making resources of this enterprise. Call or write and secure subscription blanks. Do not d elay, or you may miss the opportunity I have received numerous requests for evening appoint nents from persons interested in this
