son's hope for a Navy greater than all the other navies combined is ever saddled on us, it will mean \$400,000,000 a year. The cost of the Army and Navy ought to decline as we advance in civilization. To keep increasing the outlay on the Navy is to cling to a lower civilization. American supremacy depends not on letting other powers give us the measure of civilization, but on our raising a standard to which they shall measure up. In an age when monarchies are bound hand and foot by bureaus who force expenditures for armies and navies, why should our United States tag along behind, instead of leading the thought of humanity into peace? It is often said "these powers of the world are not so advanced as we." Why take them as a model then? If every man in Europe engaged in peaceful pursuit must carry some soldler or sailor on his back and support him as well as himself, why in the name of common sense should Americans do the same foolish thing?

Granted that some protection is needed spainst those least removed from barbarism, a National police could be maintained, a skeleton of an Army and Navy, without entering into any competition to see who could mobilize the largest force in time of peace. It is pathetic to observe that the bigger the navy becomes, the greater the certainty of its promoters that we are in immediate danger of attack from other powers. Every new battleship, instead of its mental of its promoters that we are in immediate danger of attack from other powers. Every new battleship, instead of the Navy to speak of, we heard nothing of these enemies, now it is the stock talk. Instead of the Navy to speak of, we heard nothing of these enemies, now it is the stock talk. Instead of the Navy being a peace measure and a source of strength, it seems to become a source of danger and an added incentive to conflict.

many and America would be an insane double suicide of two highly developed civilized nations.

Our Pacific Coast states are menaced less by focs without than by those within With the cost of one war vessel devoted to internal improvement, good roads could be built, which, in five years, would do more for us than 50 years of patrolling our coast by a great navy. Instead of begging for a few thousand dollars to secure a proper teaching staff for our university, the cost of a single battleship would give every state a Harvard University with an endowment of millions of dollars. The patriotism needed today is the patriotism of peace. Not in vast territory and sea-giviling navies consists the greatness of a suiton, but in the broad humanity which gives to each his due, in that liberty which theves none oppressed and in justice which is unfallingly invoked. The conviction and posishment of the men who murdered the poor Hindu will do far more to exalt human life in Oregon than ten new battleships along our coast. The need of the hour is not for guns nor for a club, but for brotherhood. As Universalists we are to say gladiy, triumphantly; National honor means service to the world. Milton's wish for England was that she might teach nations how to live. Surely that must be the wish of Americans for America. To teach she must live nobly.

Dr. Heppe Says Worldliness Is Low and Sordid.

GAZE IS NEVER UPWARD

Pastor's Last Sermon Before Leaving for General Methodist Conference Is a Strong Appeal to Higher Things.

Speaking at the Grace Methodist

Church last night on "Worldliness and Other-Worldliness," Rev. William H. Heppe told his hearers that even though they were referred to as "green," this was to be preferred to indulgence in questionable amusements. Dr. Heppe took for his text Eph. vi:10-13, in which Paul tells the Ephesians to put on the whole armor of God, figuratively speaking, that they may war "against the rulers of the darkness of this world." rulers of the darkness of this world."

It was Dr. Heppe's last Sunday in Portland before leaving to attend the Methodist General Conference, which will be held at Baltimore, Md., for one week, beginning May 6. Dr. Heppe goes as the first reserve delegate from the Oregon Conference. Three regular delegates have been chosen, and three reserves. The regular delegates are Rev. serves. The regular delegates are Rev. B. F. Rowland, W. B. Hollingshead and J. W. MacDougall. Rev. M. C. Wire, of Eugene, is the second reserve delegate, while Dr. Clarence True Wilson, of Centenary Methodist Church, is the third reserve. While in the East, Dr. Heppe will preach the annual university sermon at his alma mater, the Iowa Wesleyan University.

In his sermon last night Dr. Heppe said:
In Puni's philosophy of life there was no room for an emanculated gospel. He judged life from the standpoint of a warrior. His gospel is therefore strong, athletic, full of battle cries and flashing sahers, and it is charged with spiritual ozone, refreshing as a sait breeze from the sen. Caul's gospel stands out in hold contrast to the effeminate, weak-as-water gospels, offered in our day as substitutes. They would make life a huge joke and the world one vast plat-ground, with man as at actor to amuse and to be amused.

Dr. Wilson Opposes Home Rule Amendment.

FINDS IT IS UNAMERICAN

Says While It Pretends to Advocate Home Rule for Cities, Its Purpose Is to Nullify Criminal Laws of the State.

Dr. Clarence True Wilson, of the Centenary Church, gave a prefude to his sermon last night, in which he discussed the pending constitutional amendment, proposed by initiative petition and to pear on the official ballot numbered 320 and 321. He said:

This proposed amendment to the constifution is deceptively worded or pretends to advocate home rule for cities, and says the majority shall rule, but in reality its pur pose is to nullify all the criminal laws of the state as far as cities and towns are concerned, and give any little rum-hole town exclusive say as to tneaters, race-tracks, poolrooms, bowling-alleys, billiard halls and the sale of liquors.

Such towns might go on furnishing a large proportion of the crime, pauperism and instanty of an entire county, and doubling the taxes thereof, but neither Sheriff. District Attorney nor grand jury would have any power to suppress their gambling dens and objectionable saloons or other vicious resorts. There is no proposition, however, that the municipality shall pay the bills. It may defy the public sentiment and moral laws of the state witheut hearing the expense of the crime, paupose is to nullify all the criminal laws of

sition, however, that the municipality shall pay the bills. It may defy the public sentiment and moral laws of the state withdeau hearing the expense of the crime, pauperism and insanity that is caused. The amendment would leave the state with the dead expense of the whole of it, and without power to prevent it. The constitution now provides that the city charters must be "subject to the constitution and criminal laws of the state." The proposed amendment emanated from that class that proposes to exploit the troes of city life for their own profit and carefull for the first proposes to exploit the troes of the state. The principle is un-american. Statutory law emanates from the supreme power of the state, that is the people of the cuties commonwealth, and to permit the counsel of a mere municipality to override the laws enacted by the people of the whole state, and to set at naught the moral centric commonwealth, and to permit the counsel of a mere municipality to override the laws enacted by the people of the whole state, and to set at maught the moral centric commonwealth, and to permit the counsel of a mere municipality to override the laws enacted by the people of the whole state, and to set at maught the moral centric commonwealth, and to permit the authority of our state, create an authority within municipal bounds in conflict with the authority of our state, create an authority within municipal bounds in conflict with the authority of our state create an authority thrown the moral law of the state cannot be permitted in separate minicipalities without thrown making separate principalities of our cities and towns, and establishing a principle of disunion and or confusion. It would put the moral law of the public exclusively in the hands of the lowest and vilest creations.

Albany albany so distance, or depriving ourselves in Portland of the protection of our state criminal laws of the lowest and vilest creations, with reference to gambling and Sunday liquor closing, and leaving ourselves at the

led to restrictions of gamblers, Sunday saloons and bawdy houses that could have been gotten through the present Jounell. Remember all these things have had to be accomplished through the laws of the state. This amendment proposes: First, exclude the state from the control or these matters. Second, to intrench the saloon and nullify the local option law. Third, to make the towns and cities of Oregon wide open in defiance of the prevailing sentiment for better things throughout the state. Fourth, to deceive the voter in the act of stamping his ballot by putting the faise and misleading wording of the official ballot, "Subject to the provisions of the local option is we of the State of Oregon," when the main purpose of the amendment is to nullify said local option haw in all corporate towns. Our present law makes the county the unity of government. The proposed amendment gives exclusive power to cities and towns reagrifices of state laws.

The people of Oregon defeated the proposed liquor dealers' amendment to our local option law two years ago, by a majority of more than 11,000. Dr. Reddy's amendment to the constitution is even a bolder attempt to tamper with our constitution in reversion of the entire structure of our government, and merits a still more overwhelming defeat. All good clitzens who are loyal to the State of Oregon and believe in the enforcement of its criminal laws should vote no on this amendment. It is hoped that this will effectually stop the attempt of the liquor dealers and purveyors of vice from tampering with our laws and amending our constitution, and thus nullifying the growing moral sentiment of Oregon.
