SAILORS QUIT SHIP

Hindu Seamen Take French Leave of Strathgyle.

HER SAILING IS GELAYED

Men Demand 24 Hours Ashore and Desert Vessel Without Further Ado-Delay Will Be Expensive to Owners of the Ship.

Desertion of the ship by five Hindu sailors has delayed departure of the British steamship Strathgyle, lumber laden for Shanghai, and has entailed a loss of about \$500 to the owners of the vessel. The sailors walked ashore, leaving all their effects on board, about an hour before the hour set for sailing yeshour before the hour set for sailing yea-terday morning. They refused to return until they had been ashore for 24 hours. The situation is a peculiar one and Cap-tain Grant was powerless to act yester-day. On the disappearance of the sailors from the ship he called up the Sailors' Home and told of his trouble. He was in-formed that he would be supplied a suffi-cient number of men to man his ship within an hour and to make the necessary arrangements with the British Consul. irrangements with the British Consul-Later Captain Grant said that he would Later Captain Grant said that he would be compelled to wait until today, as one of the firemen would be paid off. It seems that the colored members of the crew have some hold on the master in the way of a contract and that he permitted the

same action at Calcutta.

The Strathgyle has on board 3,500,000 feet of lumber and is bound for Shanghai. She is a vessel of 2837 net tons burden and the delay of 38 hours will make a difference to her owners of close to 890. Aside from the delay there will be the additional ex-pense of new men. The vessel will not be able to leave down before noon today.

NEW YORK, May 17.-Prices of se NEW YORK, May 17.—Prices of se-curities advanced last week with growing impetus and increasing vol-ume of transactions, the total sales on Thursday rising to the largest of any day since last Summer before the financial crisis developed. sistence of the advance and its freedom from influence on check by events seemingly unfavorable to values, gave it impressiveness and had the effect of converting a growing number of skeptics in the professional operating class who had contested the advance by short sales at various stages and had tried repeatedly to cover a loss.

Abandonment of opposition by this class and their turn to the long side had not a little to do with the increased animation and buoyancy of the market. The success with which all obstacles were overcome and perhaps aggressively advanced from the inception of the political movement has been convincing proof of the wide resources commanded by the leaders of the movement who are commonly believed to include great banking houses and individual capitalists whose influence commands the resources of the most powerful group of capitalists in the country. in the country.

Public Gains Confidence.

The suspicion of a manipulative origin, rise in the prices, for the purpose of creating a semblance of improvement where the reality did not exist, served to hold aloof from the market most of the general public which generally joins in an important market movement. The confidence and constancy with which the movement is pursued had growing influence on sentiment last week and had the increasing offect of causing a belief in the satisfaction thus expressed on the part of great capitalists with the degree of improvement in affairs.

Securities Steadily Advance.

In the department of the money market this condition was clearly per-ceptible. For the easy money market to further the success of the plans of corporations, however, there was nec-essary the additional demand of con-fidence in security values. The rise in the stock market has operated as such a demonstration. . Th with which it was accepted at first was due to the conflicting evidence of news affairs in general. This discrep-ancy continued last week, in spite of the growing force of the rising stock

That prices of securities continue to rise in spite of unfavorable industrial and commercial advices was summed up to mean that promising signs could be discerned beyond this immediate situation that prompted the large commitments to holding of stocks which market tide. W. J. Standley, superintendent of the manual training schools of this city, has been invited by Manager Freeman, of the Oaks, to arrange a series of prizes, which will be put up by the park management for at least six of the handsomest bird boxes to be turned out by the pupils under Mr.
