SAYS MRS. EDDY EXPLAINS BIBLE

F. H. Leonard, Christian Science Lecturer, Speaks at The Heilig.

IN HARMONY WITH CHURCH

He Contends the Denomination Was Never Opposed to Christianity, But Has Interpreted the Scriptures Aright.

Before an addience that completely filled the Heilig Theater, Frank H. Leonard, of Brooklyn, N. Y., delivered a lecture yesterday afternoon on the principles of Christian Science, Mr. Leonard has been a student of Christian Science for many years and as a member of the board of lectureship of that denomination is well qualified to impart its philosophy. His method of presentation is simple and is well qualified to impart its philosophy. His method of presentation is simple and logical and is directed more to the seeker after the truth than to the Christian Science adhorent. Mr. Leonard's opening remarks were devoted to a statement of the general principles of Christian Science and a refutation of some of the errors which have arisen by reason of misconceptions with regard to the doctrine. The speaker was introduced by Judge

ceptions with regard to the doctrine.

The speaker was introduced by Judge Williams, who said that while he is not a Christian Scientiat, there was much in it that he could readily accept and he hoped the speaker would enlighten him regarding some matters which he did not now understand. In order to accommodate the large crowds who desired to hear Mr. Leonard, the lecture was repeated at the Heilig Theater last night.

Mr. Leonard's Address.

Mr. Leonard's Address.

The Christian Science board of lectureship, of which I have the henor of being a member, has been organized and instituted, under the direction of Mrs. Eddy, for the purpose of affording these desirous of knowing what Christian Science is, and what it teaches and does for menkind, an opportunity to get this knowledge through an authorized channel.

I was not born in Misseaut, but I might as well have been, from my nature, because I have always been one of the kind that would not believe anything until I had absolute proof that it was true. The Truth has been very good to me all these years, because, as a Christian Science practitioner, I have been brought face to face continually with the wonderful healing work that has been brought face to face continually with the wonderful healing work that has been brought out by the use of this Truth as Mrs. Eddy has given it to us. I have seen cancers, tumors, locometer ataxia, drunkenness and immorality destroyed, and men and women made where merally and physically just by the teach of Divine Love as understood and demonstrated in Christian Science. For this reason, and for the reason that I am convinced, as the result of my study, that Christian Science is transcendentally and practically the highest sporchension of Good the human consciousness and content of the Christian Science is transcendentally and practically the highest propolection of the face with the content of the content of the moral propolection of the highest propolection of the content of the content of the content of the propolection of the highest propolection of the content of the content of the propolection of the human consciousness and content of the content of the

Scientists Use Bible.

I have heard it said that Christian Scientists do not use the Bible, that all we use a "Science of Health with Key to the Scriptures," written by Mrs. Eddy. No statement midd be more unitrue, because the discourse of the Spirit of the Word which maketh allwe, cames only as the result of the continuous study of the Bible with the aid of the Christian On Science text-book. Almost every denomination has its Bible-helps, prepared for the lay members in the church, by home preaumed to have the knowledge of what seem the Reriptures have for mankind, in which a manner that Bible study may be instituted by the seem of the lay members in the church, by home preaumed to have the knowledge of what seem the Scriptures have for mankind, in which a manner that Bible study may be instituted by the seem of the Scriptures, and the Christian Science text-book is—it is what Christian Science text-book is—it is our Rible-help. It is the book that has rent the veil of mystery from top to bottom, revealing the epiritual moort of the Scriptures, opening to us the Holy of Holles, wherein it is revealed to us that God is no longer an unknown God; no imper a God to be ignorantly worshinged, but of God to be loved a God who is a Pather to list children; a God who is a Pather to list children; a Father thore tender, more considerate, more companionate, more leving, the have doubtless heard people say, in Scientists Use Bible.

realize.

You have doubtless heard people say in speaking of "Science and Health with Key in the Scriptures," the text-hook of Christian Science written by Mrs. Eddy: "I have read that hook from cover to cover and nobody on earth can made any sense out of it." Hand a text-hook of algebra to a child! Tell him to read it through from cover to cover without any previous instruction as to how to read it, and then, when he has finished it sak his opinion of it. What will be say Naturally enough he will say. "I have read it from cover to cover and nobody on earth can make any sense out of it." Then you say to him, "Take that text-hook and go to someone who is a student of algebra and let him tell you what it means." He follows your advice, and the result is that what appeared like a meaningless jumble to him, becomes an avenue through which he is smalled to work out problems that he never could work out before. Is that what people do when they want to know about Christian Science? No; generally speaking, it is not. They find somebody that deem't know anything about it, and ask them what I means, and they only learn what he other fellow doesn't know that he deem't know, and it becomes a self-evident case of the bilind leading the bilind, with an inevitable result—they both fall into the ditch. And this to the kind of investigation that precedes alleged criticism of Christian Releace.

Belleves in God and Christ. ou have doubtless heard people say, in

Belleves in God and Christ.

Belleves in God and Christ.

Ome allegation made is that Christian Science denies God and the Christ. In refusation of this attendent of desire to say that God is referred to over 1200 times and Jesus the Christ over 800 times in the Christian Science, text-hook, an average of over three limes to every page thereof, and every reference to either God or Christ brings out a more exalted thought shout them than the world has ever known. If you will get a copy of "Science and Health with Key to the Scriptures," written by Mrs. Eddy, and read her definition of God on page 587, and of Christian on page 583 thereof, you will never spatia question the exalted position accorded them in the teachings of Christian Science. We have been taught for ages that the time for miracles, so called, has gone by. That He only did the healing of the slok that the Jewa, who were a stiff-necked people, might be convinced that He was the Messiah. Are there any stiff-necked people on earth today who need to be convinced that He is the Messiah?

Where in the Bible, do we find the permission gives to anyone to separate any part of

the Messiah? Where in the Bible, do we find the permission given to anyone to separate any part of this promise from the rest of it? Whene comes the authority to say that God's Word may still be used to destroy sin and save eithers but it can't be used to destroy sickness and save the sick?

Does it not come dangerously near to being

einiters but it can't be used to destroy sickness and save the sick?

Does it not come dangerously near to being sacriling to deay the right and duty of man to be obsidient to the whole of this virtual command, and a practically, dear sthat Jeans told the truth? Don't you see where the irouble lies?

Look back to the time of the Emperor Constantine, when he assumed to be the head of the church of Christ on earth. He found the sick still being brought to the churches so that the elders might heal them. He began to clothe the simple faith in form, ceremony and ritual! He elothed himself in gorgeous robes, and finally succeeded to so pleasing the even and ears of the people that they clothed the Spirit of the Word in the grave clothes of the letter, and the ability to heal was leet. Hon't you see from that time to this manified has been trying to excuse Iten't for its unboilef, because it has not been obedient to the Wayshower by and firough whom we must reach the Kingdom of God?

Learned God Is Love.

Learned God Is Love. told you what Christian Science did for I told you what Christian Science did for me physically. Igun going to tell you more. I had heard, in going to the church with which my mother was affiliated, and in which she was an ardent worker. That just the other side of the valley of the shadow of death there was that beautiful New Jerusalem, the dity with its golden streets and its pearly gates, wherein I was told there was no more suffering, no more serrow; but strange as it may

seem. I did not want to go to heaven if I had to die to get share, for, with the story of the New Jerusalem I also heard the story of the New Jerusalem I also heard the story of the other place, which is down, and not up, and was fold that nearly all who passed through the valley went down, and not up. The degree of uncertainty was too great to be attractive, and so there had grown up in my thought, gas a young man and hoy, a terror and a horror of God. I heard that all things were the manifestation of His infinite Wisdom, and the terror grew and grow in my thought, na I pictured Him as located on some great throne, far above me, ready and willing to crush the very existence out of me at any instant, until I had reached the point where I loafsed the nume of God.

Then Christian Science came to me and told me mentally and audibly that God is Lovel That Here is nothing of God in these things! That He has nothing to do with them, and it look away my disease and my suffering! It took away my disease housands apread all over this globe. Is it any wonder that we love the one who has been se selfless and so faithful in her work that through it. God has come to us and salvation been brought within dur apprehension? We are obsidient to her very teaching gladly, willingly, joyfully, because II is through her continued teaching. ery teaching, gladly, willingly, joyfully,

TO PUT ON GALA ATTIRE

MERCHANTS PLAN FOR FESTI-VAL DECORATIONS.

Large Supplies of Official Pink and Green Bunting and Flags Are On Hand.

The coming week will give all the pub-The coming week will give all the public-spirited citizens, merchants, business men and patriots in general, an opportunity of showing what they can do in the way of "dressing up" for the Rose Festival, which opens a week from today, Many of the stores and shops have already laid in large stocks of decorative material in the official colors—pink and green—and a canvass made by the Festival officials, Saturday, indicates that there is an abundant supply of bunting, streamers, pennants, serpentine flags and there is an abundant supply of bunting, streamers, pennants, serpentine flags and Oriental innterns and all kinds of material needed to put the city in proper gala attire. Last year's experience, when the supply of the decorative stuffs in the festival colors ran out several days before the celebration began, will not be repeated, so there will be no excuse for anyone not to put on full festival regalla for the week.

While the rivalry between the large office buildings in the down-town district was keen chough hast year in the way of displaying fine decorative effects, the festival officials have been given to understand that three or four of the big structures have worked out designs for decoration by day and illumination by night which will surpass anything Portland has seen.

And at the same time the department stores, and other shops of various kinds, will vie right merrily with one another in preparing the most artistically decorated preparing the most artistically decorated fronts and display windows. One of the stores which carried off the capital prize in its class last year, plans to spend not less than \$\overline{\text{Total}}\text{ in the capital prize in its class last year, plans to spend not less than \$\overline{\text{Total}}\text{ in the front this year, and it has secured the services of a special designer in order to uphold the honor won a year ago.

As for the rose supply to take care of the exhibits and decorations for the big exposition at the Oriental building, there is no longer any need for worry or alarm, for the splendid weather of the past two or three days has wrought a wondrous transformation in the rose gardens of the city.

the city. Several members of the Portland Rose

Several members of the Portland Rose Society and officials of the Rose Festival took an automobile trip about the city yesterdsy, visiting all sections for the purpose of seeing for themselves what the prospects are for a full crop of blooms by the time the festival opens. "Everywhere we went," said Secretary Drake, of the festival, "we found the outlook exceedingly promising and in many of the gardens the roses were just on the point of bursting into bloom by the thousands, yes, tens of thousands. While there have been only a few days of fine, sunshing weather, there is every indication that the rainy season is over, and from what we saw, it will not take more than three or four days of warm weather to make the whole city a garden of blooming roses. And if we are fortunate chough to have an entire week of clear, warm weather, it is no exaggeration to easy that before the festival is more than two days old there will be more roses in bloom than there have ever been in the city at one time. This may be accounted bloom than there have ever been in the city at one time. This may be accounted for by the fact that thousands upon thousands of rose bushes were planted last Fall in all parts of the city and many more thousand were set out early this Surface.

President Whitemore, of the festival, will issue an appeal to the people of Portland, within a day or two, urging them to clean up their yards and lawns and particularly to decorate their homes in some form for the festival. The first day of the festival is to have as a night feature a "feast of lanterns," and it is the carnest desire of the festival officials that every Chinese and Japanese lantern in the city be made use of in this lantern in the city be made use of in this unique feature of the celebration.

Boyd Putnam, Actor.

NEW YORK, May M .- Boyd Putnam. NEW YORK, May 24.—Boyd Putnam, the actor and leading man this season of the Lillian Russell Company, died today at the home of his brother-in-law, Lyman Craw, at Irvington, N. Y., from Bright's disease, which developed during a nervous breakdown. Mr. Putnam became ill in Rochester early in March and retired from the stage. The actor was a son of Judge Putnam, of Grand Rapids, Mich., and a descendant of General Israel Putnam, of Revolutionary fame.

Spiritualists Want Substitute for Cottel Ordinance.

TO MEET THURSDAY NIGHT

Plans Will Be Made Then and New Law May Be Drawn That Will Be Offered to Council

Anticipating that a sensation would be sprung as a result of the controversy between the Spiritualists of Portland and Harrison D. Barrett, the alleged author of the famous Cottel ordinance, favoring the driving of mediums from the city, local mediums packed the meeting conducted by John Siater last night in Women of Woodcraft Hall, Taylor and Tenth streets. They represented only a small fraction of the 800 or more persons who attended, but nevertheless were out as a unit, hoping to assist in some action

tended, but nevertheless were out as a unit, hoping to assist in some action whereby Barrett's ordinance would drop into the Council chamber wastebasket.

Barrett was not present. This was not surprising, according to Spiritualists who have taken exception to his alleged high-handed," as well as "underhand" methods. He was not expected, yet there were a few who had hopes he would appeaer in his own defense and explain his reason for having Councilman Cottel introduce the defense and explain his reason for having Councilman Cottel introduce the
ordinance of which he is accused of
being the author. Of Barrett's colleagues, several were identified, but
none of them arose to say anything on
behalf of their ostraclized leader.

Mr. Slater, in referring to Barrett,
declared that he preserved to see the
matter adjusted peaceably, stating that

declared that he preferred to see the matter adjusted peaceably, stating that Spiritualists had too many things to fight against to apend their time fighting among themselves. He referred, during the course of his brief lecture and demonstration, to Barrett, and said Barrett was subject to the orders and directions of a few old women who had certain ideas of their own. "Personcertain ideas of their own. "Personally, I believe that if Barrett could break away from the fussy old women who have him bound hand and foet, he would be a good fellow," said Mr. Slater.

Slater.

During the meeting, Mrs. Sophia Seip, president of the Oregon State Spiritualists' Association, who presided, announced that a meeting will be held at the home of Mrs. L. Mailory Thursday night, when an ordinance will be drafted to replace the one introduced in the Council. Just what other plans will be made at this meeting are not known at the present time, but it is said an effort will be taken to compel Barrett to leave the city. city.

It was easy to see that the Spirit-uaists of Portland who attended the meeting in Women of Woodcraft Hall

meeting in Women of Woodcraft Hall last night are not feeling very kindly toward Barrett and are prepared to back up the leaders and officers of the State Association in whatever they may attempt to do.

The case of Virginia Roe, vice-president of the association, who twas arrested recently for failing to pay her annual license, and who will be given a hearing in the Police Court Tuesday, was brought up and discussed in brief.

WANTS SUM ON BALLOT Writer Fears Confusion on Appro-

printion for State College.

UNION. Or. May 23.—(To the Editor.)—
Having been a constant reader of The
Oregonian for several years past. I have
noted the fairness with which it gives both
sides of a question, whether or not it coincides with its own views, thus giving each
and everyone a square deal.

I notice that the referendum pamphlet
distributed to the voters, containing the
various measures to be voted upon in June,
have the form of the ballot, and that all
of those measures asking for appropriations
have the amount plainly printed in the ballot, except the one calling for an annual

lot, except the one calling for an annual appropriation of \$12,000 for the State University at Eugene.

Now, is not this a scheme to keep the amount from the eye of the voter? It looks suspicious, to say the least. Probably, there ian't 10 per cent of the voters of Oregon who will know anything about the amount they are voting for or against, as the case may be. Would President Roosevelt call it a square deal? If the ballot is printed without the amount to be appropriated, in plain figures, should this not be considered prima facie evidence of a scheme or conspiracy by the premoters of the measure?

conspiracy by the promoters of the measure?

The writer sent his son to the University of Oregon, at Eugene, about 24 years ago, and had to pay \$40 for a scholarship each year until he graduated, besides his hoard, and incidental expenses, which amounted to no small item. Now, this being true, why should my son he called upon to pay somebody else's tuition?

Undoubtedly the professors and students, and everybody else in and about the institution at Eugene would like to have all the money they want, so that they can have "a good time" on somebody else's earnings. We have a pretty good example of "a good time" on somebody's money down in California, at Stanford University

week was reported as showing improvement in conditions, and the action of the securities market, although somewhat unsettled and breaking viciently at the end, was not interpreted as belying this acceptance. There has been heavy accumulation of stocks through a considerable preceding period on the assumption that the then existing prostration of affairs might be assumed to represent the turn of the tide with betterment to follow. With the demonstration of the actual improvement there was large seiling to take profits. The result was a broad, active and varied market. The daily average of sales at the stock exchange his been well over 1,000,000 shares, and Wednesday's total of 1,00,000, was the largest since the days of the "silent panic." in March. 1907. Probably the most decisive factor to forming the conviction of a positive improvement in business was the enlarged demand for iron. Price concessions in that commodity had become general and without any formal abandonment of the facilt agreement among producers to maintain prices. Placing of orders on a growing scale was the consequence. Iron is proverbially the great basic industry and the speculative market accepts its action as an aimost infallible index of the great course of trade is general.

Advices from other mercantile lines were at the same time more encouraging, and buyers were reported to be placing orders with more confidence than has been shown since the panic of last Oc-

ing orders with more confidence than has been shown since the panic of last October. Confidence in the present promise of crops remained unimpaired.

EXCURSION SEASON IS ON

STEAMER BAILEY GATZERT RUNS TO CASCADE LOCKS.

Chas. R. Spencer Will Be Ready for Business by Last of the Present Week.

Summer excursion business opened yesterday in grand shape, when the steamer Bailey Gatzert made the run from Portland to Casacde Locks with

from Portland to Casacde Looks with a crowd of sightseers on board. The Gatzert left Portland at 9 clock and returned at 5. She carried a good-sized crowd for this time of year.

The steamer Chas. R. Spencer did not make a trip yesterday. She has been tied up for repairs for the past week, and it will be Thursday or later before she is placed in commission. New tubes are being placed in the boiler of

the Spencer, and Captain E. W. Spencer her owner, is confident that she will de-velop more speed when the boiler is in condition to hold steam.

condition to hold steam.

Heretofore, the steamer Spencer has been handleapped by had tubes in her boiler, which prevented her from keeping enough steam to supply the engines when they were working wide open. Captain Spencer is certain that he will be close to the Gatzert when he opens out and all leaks in the boiler have out, and all leaks in the boiler have been effectually sealed.

FULTON'S BILL KNOCKED OUT

Revenue Cutter Will Not Be Placed in Commission Here.

Advices from Washington, D. C., state that Senator Fulton's amendment to the sundry service bill, in which the Oregon Senator asks for \$250,609 for the maintenance of a revenue cutter on the Oregon coast, has been knocked out. The committee alleges the appropriation was never asked for or recommended by the department.

The object of Senator Fulton's amendment was to have a suitable vessel on hand to so our to when the dis-

sel on hand to go out to ships in distress and to take such action as was necessary when trouble was reported to

the land forces by lookouts.
At the same time, the conference committee cut the Seattle appropriation down by some \$59,000. It also sliced the Alaskan and Oriental exhibits.

Tacoma Shipping News.

TACOMA, May 24 .- The American-Hawaiian tiner Nevada is import load-ing general freight for the Islande. She discharged a quantity of New York freight at the Commercial ddck this morning, and later shifted to the flour mills. The steamer Meteor is in port to load 700 tons of grain for San Fran

The Boston Towboat Company's steamer Hyades finished her Tacoma cargo and left port early this morning for Seattle. She will leave for Nome May 30. The Pacific Cold Storage Company is

loading the steamer Elihu Thomson and the barge Dashing Wave with frozen meats for Alaska. The Thomson will leave Friday morning, and she will have in tow the Dashing Wave and the new Yukon river barge Trinder.
