## BETTER GOLF ON THE THIRD DAY

Seattle Players Win Honors in Play for Men's Championship.

#### TODAY THE LAST OF MATCH

seattle Men Will Play for Championshin-Flight Cup Calls Forth Good Playing - Putting Contests Are Very Interesting.

Better golf all the way through and by far better scores marked the third day's play of the state golf tournament on the links of the Waverly Golf Club. In the play for the men's championship the Seattle players carried off the bonors, but it was not antil they had been forced to play their game to the limit to Win.

Mr. C. R. Spooner disposed of both of his opponents and reached the finals, as did Mr. Voorhies, and this afternoon the two Seattle players will play for the championship. In the morning play Mr. Spooner met and defoated Mr. Ernest Webb. Mr. Spooner was sadly out of form and was in trouble for over half of the 18 holes. Mr. Webb at one time looked all over the winner but a stroke into the long grass made him lose the big lead he had over Mr. Spooner up to this hazard. On the way home Mr. Spooner recovered his stroke and beat Mr. Webb 2 up and 1 to play.

Good Play in Afternoon.

#### Good Play in Afternoon.

Good Play in Afternoon.

In the other scores Mr. Young best Mr. Lewis. 2 up and 1 to play. Mr. Ned Ayer beat Mr. Shevlin, 1 up and 1 to play. Mr. Ned Ayer beat Mr. Shevlin, 1 up and 1 to play. Mr. Voorhies beat Mr. Andrews, 3 up and 2 to play. In the afternoon play Mr. Spooner made the finals by defeating Mr. Young, 5 up and 4 to play. In his match with Mr. Young Mr. Spooner played a steady and beady game throughout. He avoided all of the troublesome long grass and won with case. The match between Mr. Ayer and Mr. Voorhies was a clever battle, Mr. Voorhies finally disposing of his opponent, 2 up and

was a clever battle. Mr. Voorhies finally disposing of his opponent. 2 up and to play. This brings Mr. Spooner and Mr. Voorhies is the finals and the result of their game today will decide which will carry away with them the Oregon state championship.

There was plenty of good golf in the matches for the Flight cup. Mr. Castelman beat Mr. Tidmarsh, of Seattle, 3 up and 2 to play. Mr. Murphy beat Mr. Vaniyle, of Seattle, 5 up and 3 to play. Mr. Zan beat Dr. Morrison, 1 up and 1 to play, and Mr. Lewis beat Mr. Treat, 3 up and 2 to play. Not one of the Seattle players managed to make the finals in the Flight. Today Mr. Murphy beat Mr. Castelman, in the match for the finals, 3 up and 2 to play, and Mr. Lewis beat Mr. Zan, 4 up and 2 to play. This leaves the cup winner to be decided between Mr. Lewis and Mr. Murphy.

Miss Flanders Wins by Default.

#### Miss Flanders Wins by Default.

Because of an indisposition Miss Flanders won her match with Mrs. Jilbert by default. Mrs. W. B. Ayer defeated Mrs. Berry and Mrs. Koehler defeated Mrs. Dougherty. Miss Flan-ders will play the match off for the women's championship with Mrs. Ayer.

ders will play the handless will play the handless of the local golfers did not keep the hear of the local golfers did not keep the hear is marked success, both socially and from a golfing standpoint. The four days of play will end this afternoon, and the tournament will close with a dinner served at the club house and a hop. OREGON PICKED AS WINNER

## Eugene Athletes Expected to Take

noon in the annual three-cornered intercollegiste track meet between the state Universities of Oregon, Washington and Idaho.

It is generally conceded that Oregon will win the meet and it looks like idaho for second place. Edmundson, the crack distance man of Idaho, will undoubtedly be the star of the meet. Edmundson recently wen in the Olympic tryout in California. His hest race is the half mile, in which he has a mark of better than 3 minutes. In the three-cornered meet between idaho, Whitman and Puliman he won the quarter, the half and the mile, besides being the chief factor in winning the relay race.

besides being the chief factor in winning the relay race.

Dodson and Downs, of Oregon, will
give Edmundson a race in the half, for
both have marks close to 2 minutes.
Oregon is strong in the sprints with
Roberts, Huston and Moon. With
Moulien. Zacharias, Gardner and
Meintyre she is also very strong in
the weight events, Mays is a good
representative in the mile, but if Edmundson runs in that event he probabily will have to be content with second place. Moulien will probably take
the pole vauit, and if Huston can equal the pole vault, and if Huston can equal his 26-second mark in the low hurdles he will probably win that event.

## TOURNAMENT OPENS TODAY

# What About Salmon Protection?

That the food fish of our state need better protection than is now afforded is agreed.

You have already or doubtless will receive considerable literature on the subject, but no matter how attractive the argument, stop and consider how much it may be colored by self-interest.

The United States Bureau of Fisheries are the greatest expert authorities on the subject and have NO AX TO GRIND. Read what they say:

# Department of Commerce and Labor OFFICE OF THE SECRETARY, WASHINGTON, D. C.

Hon Charles W. Fulton,

United States Senate, Washington, D. C.

Sir: The Department realizes the importance of the various questions affecting the salmon fishery in the Columbia River brought up in your letter of the 18th ultimo, and has taken this opportunity to make a thorough investigation of the matter. There can be no question that the status of the fishery is unsatisfactory, and that under existing conditions the trend may be expected to be steadily downward, with the result that in a comparatively few years the run of salmon in that stream will be reduced to such a degree that thousands of fishermen may be thrown out of employment and much capital rendered idle. The Federal Government is without any jurisdiction whatsoever in the premises, and the duty of conserving the salmon supply in the Columbia devolves on the States of Oregon, Washington and Idaho; but this Department has been charged by Congress with important fish-cultural operations in the Columbia basin, and has felt impelled from time to time to direct attention to the necessity for giving adequate protection to the various species of salmon frequenting that stream. The Department is convinced that the run of salmon in the Columbia can be amply maintained for an indefinite period if artificial propagation is supplemented by rational protection; but artificial propagation gation alone cannot cope with the situation, and, as a matter of fact, the recent experience of the Department has shown that its beneficial labors are rendered almost futile by the failure of the states to appreciate this fact.

The Department sees no reason for advocating the elimination of fish wheels from the river, as there is no evidence to show that this form of apparatus is particularly destructive to salmon.

A condition that is specially favorable for the passage of salmon-namely, very high water-renders the wheels unserviceable and, on the other hand, periods of very low water, when the fish are much restricted in their movements, are also unfavorable for the wheels. During the past two or three seasons the catch of salmon by wheels has been comparatively small; but even if it were very large it would be a fact of no special significance in the present connection.

The Columbia River is, however, made to yield a quantity of salmon far greater than regard for the future supply permits, and the drain is yearly becoming more serious. No one familiar with the situation can fail to appreciate the menace to the perpetuity of the industry that is furnished by the concentration of a tremendous amount of fixed and floating apparatus of capture in and near the mouth of the river.

This apparatus comprises about 400 pound nets or traps, over 80 long-sweep seines, and more than 2200 gill nets, the last having an aggregate approximate length of over 570 miles; and these appliances capture more than 95 per cent of the fish taken in the Oregon and Washington waters of the river -the figures of 1904 being nearly 34,000,000 pounds, or 98.7 per cent of the total yield. Under such conditions, it is selfevident that but comparatively few fish are permitted to reach the upper waters where the spawning grounds are located.

The details of the measures necessary to place the salmon industry of the Columbia River on a permanent basis cannot be elaborated by the Department at this time, but in general it may be said that there should be (1)a restriction on the amount of apparatus employed in a given section; (2) an adequate weekly close season covering possibly two days at first, but reduced later if the circumstances warrant it; (3) an annual close season, preferably at the beginning of the salmon run, and (4) joint arrangements between the States, so that protective measures may be harmonious. Respectfully yours,

(Signed) OSCAR S. STRAUS, Secretary.

Bill No. 318 Embodies Government Recommendations and Should Pass. It is a Square Deal for All.
